RAILROAD COMMISSION OF TEXAS

MACK WALLACE

JAMES E. (JIM) NUGENT
CHAIRMAN

CLARK JOBE

The Honorable Mark White
Governor of Texas
Capitol Station
Austin, Texas 78711

Dear Governor White:

The Texas Legislature has charged the Railroad Commission with the responsibility of regulating gas utility and hazardous liquids pipeline companies in Texas. The Commission has original jurisdiction over rates, operations, and services of natural gas sales in unincorporated areas, in addition to appellate review of municipal action. The Commission also has original jurisdiction over intrastate natural gas and hazardous liquids pipeline systems for safety enforcement.

The Gas Utilities Division performs the day-to-day regulatory activities on behalf of the Commission. In this Annual Report for fiscal year 1986, the Gas Utilities Division presents all information as required by law, plus pertinent 1985 data obtained from gas utilities in Texas.

The Gas Utilities Division operated on a budget of \$2,782,420 during fiscal year 1986. The Division's staff averaged 90 employees. To best fulfill its responsibilities, the division is organized into five activities: Auditing, Pipeline Safety, Hearings and Legal Analysis, Reports and Statistics, and Program Management.

The Auditing Section is charged with in-house auditing of annual reports, quarterly tax reports, and other filings required of gas utilities by the Commission. There are approximately 306 gas utilities operating in Texas. In fiscal year 1986, 129 field audits were performed in the offices of gas utilities. The Auditing Section also collects a gross receipts tax of one-fourth of one percent of a utility's gross taxable revenue. In fiscal year 1986, \$16,994,590 was collected in gross receipts taxes. The most common violation discovered during field audits concerned the filing of tariffs and monthly purchased gas adjustments.

The Pipeline Safety Section performed 2,654 safety evaluations during fiscal year 1986. Of this total, 1,800 systems were cited for 37,213 violations in various areas of non-compliance. Pipeline Safety performs safety evaluations on compressor stations, and transmission, distribution, offshore, municipal, and master metered gas systems throughout the state. A master metered system is a pipeline system for distributing gas within a definable area such as a mobile home park, housing project, or apartment complex. The operator purchases metered gas from an outside source for resale through a gas distribution pipeline system. A 1979 federal study estimated that there are approximately 40,000 master metered systems in Texas.

The Hazardous Liquids Pipeline Safety Rules enforcement became effective during fiscal year 1986. This new responsibility added the inspection of hazardous liquids systems to Pipeline Safety's evaluation program. As a result, 355 of the safety evaluations performed during the fiscal year were on hazardous liquids systems.

In addition to routine safety evaluations, on-site accident investigations and special investigations are performed in an effort to preserve human life, prevent the destruction of property, and curtail the loss of natural resources. Through this effort, there were 101 accident investigations and 148 special investigations performed this fiscal year.

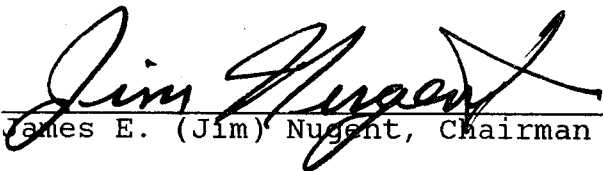

The Hearings and Legal Analysis Section holds hearings to gather evidence concerning gas utility applications, analyzes the evidence, and recommends disposition to the Commission. In fiscal year 1986, the section received 599 applications and completed 664 applications. Of the applications completed, 81 percent were within the Commission's original jurisdiction and included rates for unincorporated areas immediately surrounding municipalities, called "environs," pipeline to pipeline rates, pipeline to industrial rates, city gate rates, and rural burnertip rates. Three percent of the cases involved appeals from city rate determinations and 16 percent involved other types of cases including safety violations, audit exceptions, jurisdictional questions, abandonment, sale of property, and mergers. At the end of fiscal year 1986, there were 204 cases pending.

The Reports and Statistics Section gathers data from gas utilities subject to Commission regulation, conducts research, and publishes reports on matters of relevance to Commission responsibilities, including the annual report. This section also monitors compliance with docket orders, tariff filings, and the statewide curtailment plan. This section responded to 4,221 complaints and inquiries from the general public during fiscal year 1986. This section also serves as a centralized micrographics facility.

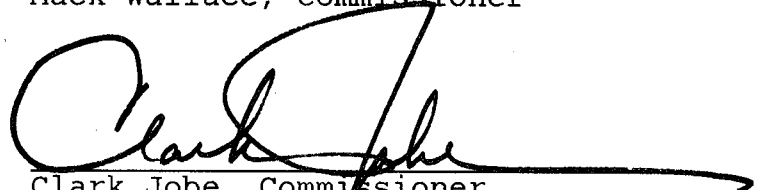

Program Management plans, organizes, coordinates, and controls the work of the division as a whole. It is also responsible for fiscal matters, rulemaking proceedings, statutory notices, and communication between the division and other parts of the Commission.

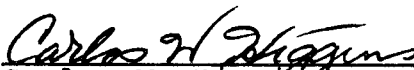

In accordance with TEX. REV. CIV. STAT. ANN. art 6061, (Vernon 1962), we hereby transmit the Annual Report of the Gas Utilities Division of the Railroad Commission of Texas for Fiscal Year 1986.

Respectfully submitted,

James E. (Jim) Nugent, Chairman

Mack Wallace, Commissioner

Clark Jobe, Commissioner

The weighted average 10 Mcf bill for residential customers in the 25 cities listed above:

January 1978 - \$24.92	January 1981 - \$36.57	January 1984 - \$53.45
January 1979 - \$28.09	January 1982 - \$44.79	January 1985 - \$54.38
January 1980 - \$30.70	January 1983 - \$54.96	January 1986 - \$50.99

The median 10 Mcf bill in January 1986 was \$53.14 (Houston, Texas). The base rate increased in Amarillo, Austin, Beaumont, Bryan, Corpus Christi, El Paso, and Laredo by approval of the city and decreased in San Antonio. Base rates did not change in the remaining 17 cities. The net 10 Mcf gas bill increased in Amarillo, Bryan, and San Antonio and decreased in the remaining cities.

The above 25 cities have 1,777,892 residential customers which represent approximately 57% of the total residential customers in the state. (This information is based upon municipally-owned and investor-owned company reports.)

*Degree-days measure the deviation from normal temperature by accumulating the difference between 65°F and the daily mean temperature. A mean temperature of 60° for one day would be five heating degree-days. A greater number of heating degree-days than normal indicates colder weather. Less heating degree-days than normal indicates warmer weather. These figures are on a calendar year basis.

**Normal Heating Degree-Days are based on NOAA records. The above norms are based on the 30-year period from 1951-1980.

Note: Table 2A has been added to this report this year to show the difference between the percentage of unaccounted for gas for the calendar year as compared to the July 1, 1984 - June 30, 1985, reporting period. West End Gas Co. provided service to East Central, Farmers, Natalia, and Sunset, Von Ormy, Macdon from Jan-Jun. Gulfside Gas Co. provided service to Port Aransas from Jan-Jun. Mustang Energy Corp. took over these two companies on July 1, 1985, and provided service to these cities for the balance of the year.

Note: This report is based on July 1, 1984 - June 30, 1985 data. It has been expressed to us many times by companies and the public that this reporting period would reflect a more accurate percentage of unaccounted for gas because the cut-off dates are in the summer when temperatures/consumption are fairly consistent. Table 2, in comparison, is based on January 1 - December 31, 1985, data.

Note: The reporting period for this report is July 1, 1985 - June 30, 1986. There are 87 municipally-owned systems in Texas. Alto, Bullard, Cotulla, and White Deer did not report. Municipally-owned systems are not classified as gas utilities but are regulated by the Commission in the area of pipeline safety. Grey Forest Utilities is a municipally-owned system; however, it is classified as a gas utility because it makes a sale for resale to the city of Boerne and pays the RRC gross receipts tax on this sale.

Note: The reporting period for this report is July 1, 1985 - June 30, 1986. There are 87 municipally-owned systems in Texas. Alto, Bullard, Cotulla, and White Deer did not report. Municipally-owned systems are not classified as gas utilities, but are regulated by the Commission in the area of pipeline safety. Grey Forest Utilities is a municipally-owned system; however, it is classified as a gas utility because it makes a sale for resale to the city of Boerne and pays the RRC gross receipts tax on this sale.
