A violation under the jurisdiction of the commission is enforceable as provided by Chapter 7.

(b) The action may be brought by the railroad commission in any court of competent jurisdiction in the county where the offending activity is occurring or where the defendant resides.

(b) If a public hearing has been held, the railroad commission shall make findings of fact, and it shall issue a written decision as to the occurrence of the violation and the amount of the penalty that is warranted, incorporating, when appropriate, an order requiring that the penalty be paid.

(c) If appropriate, the railroad commission shall consolidate the hearings with other proceedings under this chapter.

  - (A) forward the amount to the railroad commission for placement in an escrow account; or
  - (B) in lieu of payment into escrow, post with the

railroad commission a supersedeas bond in a form approved by the railroad commission for the amount of the penalty, such bond to be effective until all judicial review of the order or decision is final.

(c) If through judicial review of the decision or order it is determined that no violation occurred or that the amount of the penalty should be reduced or not assessed, the railroad commission shall, within the 30-day period immediately following that determination, if the penalty has been paid to the railroad commission, remit the appropriate amount to the person, with accrued interest, or where a supersedeas bond has been posted, the railroad commission shall execute a release of such bond.

(d) Failure to forward the money to the railroad commission within the time provided by Subsection (b) of this section results in a waiver of all legal rights to contest the violation or the amount of the penalty.

For the purposes of this chapter, the term "aggregate production operation" does not include:

(A) a site at which the materials that are being removed or extracted from the earth are used or processed at the same site or at a related site under the control of the same responsible party for the production of cement or lightweight aggregates, or in a lime kiln;

(B) a temporary site that is being used solely to provide aggregate products for use in a public works project involving the Texas Department of Transportation or a local governmental entity;

(C) an extraction area from which all raw material is extracted for use as fill or for other construction uses at the same or a contiguous site; or

(D) a site at which the materials that are being removed or extracted from the earth are used or processed for use in the construction, modification, or expansion of a solid waste facility at the site or another location.

(2) "Aggregates" means any commonly recognized construction material originating from an aggregate production operation from which an operator extracts dimension stone, crushed and broken limestone, crushed and broken granite, crushed and broken stone not elsewhere classified, construction sand and gravel, industrial sand, dirt, soil, or caliche. For purposes of this section, the term "aggregates" does not include clay or shale mined for use in manufacturing structural clay products.

Sec. 30.025. WASTE DISPOSAL CONTRACTS BY DISTRICT. A district may make contracts with any person, including any public agency located inside or outside the boundaries of the district, under which the district will collect, transport, treat, or dispose of waste for the person.

Amended by Acts 1977, 65th Leg., p. 2207, ch. 870, Sec. 1, eff. Sept. 1, 1977.

Sec. 30.026. CONTRACTS BY RIVER AUTHORITY. Each river authority may make contracts authorized by this chapter with any person, including any public agency situated wholly or partly inside its boundaries and any public agency situated wholly or partly inside the river basin and any public agency situated wholly or partly

inside the coastal basins adjoining its boundaries, but a river authority may not make contracts to serve a public agency situated wholly inside the boundaries of another river authority or to serve facilities of a person situated wholly within the boundaries of another river authority, except with the consent of the other river authority.

Amended by Acts 1977, 65th Leg., p. 2207, ch. 870, Sec. 1, eff. Sept. 1, 1977.

Sec. 30.027. CONTRACT WITH PUBLIC AGENCY. A public agency may make contracts with a district under which the district will make a disposal system available to the public agency and will furnish waste collection, transportation, treatment, and disposal services to the public agency, group of public agencies, or other persons through the district's disposal system.

Amended by Acts 1977, 65th Leg., p. 2207, ch. 870, Sec. 1, eff. Sept. 1, 1977.

Sec. 30.028. CONTRACT PROVISIONS. (a) The contract may provide for:

(1) duration of the contract for a specified period or until issued and unissued bonds and refunding bonds of the district are paid;

(2) assuring equitable treatment of parties who contract with the district for waste collection, transportation, treatment, and disposal services from the same disposal system;

(3) requiring the public agency to regulate the quality and strength of waste to be handled by the disposal system;

(4) sale or lease to or use by a district of all or part of a disposal system owned or to be acquired by the public agency;

(5) the district operating all or part of a disposal system owned or to be acquired by the public agency; and

(6) other terms the district or the governing body of the public agency consider appropriate or necessary.

(b) The contract shall specify the method for determining the amounts to be paid by the public agency to the district.

(c) A contract made by a city may provide that the district

shall have the right to use the streets, alleys, and public ways and places inside the city during the term of the contract.

Amended by Acts 1977, 65th Leg., p. 2207, ch. 870, Sec. 1, eff. Sept. 1, 1977.

Sec. 30.029. CONTINUED USE OF DISTRICT FACILITIES. After amortization of the district's investment in the disposal system, the public agency is entitled to continued performance of the service during the useful life of the disposal system, on payment of reasonable charges reduced to take into consideration the amortization.

Amended by Acts 1977, 65th Leg., p. 2207, ch. 870, Sec. 1, eff. Sept. 1, 1977.

Sec. 30.030. SOURCE OF CONTRACT PAYMENTS. (a) A public agency may pay for the waste collection, transportation, treatment, and disposal services with income from its waterworks system, sanitary sewer system, or both systems, or its combined water and sanitary sewer system, as prescribed by the contract. In the alternative, a joint board defined as a public agency in Section 30.003, Subdivision (3), may pay for these services from any revenue or other funds within its control specified in the contract if the city councils of the cities which created the joint board approve, by ordinance, the contract between the joint board and the district. These payments constitute an operating expense of each system whose revenue is so used.

(b) The obligation of contract payments on the income of the public agency's water system is subordinate to the obligation imposed by any bonds that are payable solely from the water system net revenue and that are outstanding at the time the contract is made, unless the ordinance or resolution authorizing the bonds expressly reserved the right to give the contract payments a priority over the bond requirements.

(c) If a public agency having taxing power holds an election substantially according to the applicable provisions of Chapter 1251, Government Code, relating to the issuance of bonds by cities and it is determined that the public agency is authorized to levy an ad

valorem tax to make all or part of the payments under a contract with a district, then the contract is an obligation against the taxing power of the public agency to the extent authorized, and payments under the contract may be payable from and constitute solely an obligation against the taxing powers of the city or may be payable both from taxes and from revenue prescribed in the contract. Otherwise, neither the district nor the holders of the district's bonds are entitled to demand payment of the public agency's obligation out of any tax revenue.

Amended by Acts 1977, 65th Leg., p. 2207, ch. 870, Sec. 1, eff. Sept. 1, 1977; Acts 2001, 77th Leg., ch. 1420, Sec. 8.419, eff. Sept. 1, 2001.

Sec. 30.031. RATES. (a) When all or part of the payments under a contract are to be made from revenue of the waterworks system, sanitary sewer system, both systems, or a combination of both systems, the public agency shall establish, maintain, and periodically adjust the rates charged for services of the systems, so that the revenue, along with any taxes levied in support of the indebtedness, will be sufficient to pay:

- (1) the expenses of operating and maintaining the systems;
- (2) the obligations to the district under the contract;

and

- (3) the obligations of bonds that are secured by revenue of the systems.

(b) The contract may require the use of consulting engineers and financial experts to advise the public agency on the need for adjusting rates.

(c) Notwithstanding any provision of this chapter or any other law to the contrary, a district may use the proceeds of bonds issued for the purpose of constructing a waste disposal system or systems, and payable wholly or in part from ad valorem taxes, for the purchase of capacity in, or a right to have the wastes of the district treated in, a waste collection, treatment, or disposal system and facilities owned or to be owned exclusively or in part by another public agency, and a district may issue bonds payable wholly or in part from ad valorem taxes specifically for such purpose if a majority of the resident electors of the district have authorized the governing body

of the district to issue bonds for that purpose or for the purpose of constructing a waste disposal system or systems. The bonds shall be issued in accordance with the provisions of, and shall be subject to the same terms and conditions of, the laws authorizing the district to issue bonds for the purpose of constructing waste collection, treatment, and disposal systems, except as otherwise provided in this subsection.

Amended by Acts 1977, 65th Leg., p. 2207, ch. 870, Sec. 1, eff. Sept. 1, 1977.

Sec. 30.032. SERVICE TO MORE THAN ONE PUBLIC AGENCY. A contract or group of contracts may provide for the district to render services concurrently to more than one person through constructing and operating a disposal system and may provide that the cost of these services be allocated among the persons as provided in the contract or group of contracts.

(b) To accomplish the purposes of the chapter, a district may exercise the power of eminent domain to acquire all or any interest in property inside or outside the boundaries of the district. The power shall be exercised according to the laws applicable or available to the district.

Amended by Acts 1977, 65th Leg., p. 2207, ch. 870, Sec. 1, eff. Sept. 1, 1977.

electric transmission line, pipeline, or telephone or telegraph properties or facilities in the exercise of powers granted under this chapter, the district shall pay all of the actual cost of the relocating, raising, rerouting, changing in grade, or altering of construction and shall pay all of the actual cost of providing comparable replacement of facilities without enhancement, less the net salvage value of the facilities.

The initial designation of groundwater management areas shall be completed not later than September 1, 2003. Each groundwater management area shall be designated with the objective of providing the most suitable area for the management of the groundwater resources. To the extent feasible, the groundwater management area shall coincide with the boundaries of a groundwater reservoir or a subdivision of a groundwater reservoir. The Texas Water Development Board also may consider other factors, including the boundaries of political subdivisions.

(b) The commission may designate a groundwater management area after September 1, 2001, for a petition filed and accepted by the commission according to its rules in effect before September 1, 2001. The commission shall act on the designation in accordance with this section.

Sec. 35.007. IDENTIFYING, DESIGNATING, AND DELINEATING PRIORITY GROUNDWATER MANAGEMENT AREAS. (a) The executive director and the executive administrator shall meet periodically to identify, based on information gathered by the commission and the Texas Water Development Board, those areas of the state that are experiencing or that are expected to experience, within the immediately following 50-year period, critical groundwater problems, including shortages of surface water or groundwater, land subsidence resulting from groundwater withdrawal, and contamination of groundwater supplies. Not later than September 1, 2005, the commission, with assistance and cooperation from the Texas Water Development Board, shall complete the initial designation of priority groundwater management areas across all major and minor aquifers of the state for all areas that meet the criteria for that designation. The studies may be prioritized considering information from the regional planning process, information from the Texas Water Development Board groundwater management areas and from groundwater conservation districts, and any other information available. After the initial designation of priority groundwater management areas, the commission and the Texas Water Development Board shall annually review the need for additional designations as provided by this subsection.

(b) If the executive director concludes that an area of the state should be considered for designation as a priority groundwater management area, the executive director shall prepare a report to the commission.

(c) Before the executive director requests a study from the executive administrator under Subsection (d), the executive director shall provide notice to the persons listed in Section 35.009(c) of areas being considered for identification as experiencing or expected to experience critical groundwater problems and shall consider any

information or studies submitted under this subsection. Not later than the 45th day after the date of the notice, a person required to receive notice under this subsection may submit to the executive director information or studies that address the potential effects on an area of being identified as experiencing or expected to experience critical groundwater problems.

(d) The executive director shall begin preparation of a priority groundwater management area report by requesting a study from the executive administrator. The study must:

(1) include an appraisal of the hydrogeology of the area and matters within the Texas Water Development Board's planning expertise relevant to the area;

(2) assess the area's immediate, short-term, and long-term water supply and needs; and

(3) be completed and delivered to the executive director on or before the 180th day following the date of the request. If the study is not delivered within this 180-day period, the executive director may proceed with the preparation of the report.

(e) The executive director shall request a study from the executive director of the Parks and Wildlife Department for the purpose of preparing the report required by this section. The Department of Agriculture may also provide input to the executive director for purposes of the report. The study must:

(1) evaluate the potential effects of the designation of a priority groundwater management area on an area's natural resources; and

(2) be completed and delivered to the executive director on or before the 180th day following the date of the request. If the study is not delivered within this 180-day period, the executive director may proceed with the preparation of the report.

(f) The report shall include:

(1) the recommended delineation of the boundaries of any proposed priority groundwater management area in the form of an order to be considered for adoption by the commission;

(2) the reasons and supporting information for or against designating the area as a priority groundwater management area;

(3) a recommendation regarding whether one or more districts should be created in the priority groundwater management area, whether the priority groundwater management area should be added to an existing district, or whether a combination of those

actions should be taken;

(4) a recommendation as to actions that should be considered to conserve natural resources;

(5) an evaluation of information or studies submitted to the executive director under Subsection (c); and

(6) any other information that the executive director considers helpful to the commission.

(g) The executive director must complete the report and file it with the commission on or before the 240th day following the date on which the executive administrator was requested to produce a study. The executive director shall make the report available for public inspection by providing a copy of the report to at least one public library and the county clerk's office in each county in which the proposed priority groundwater management area is located and to all districts adjacent to the area of the proposed priority groundwater management area.

Sec. 35.008. PROCEDURES FOR DESIGNATION OF PRIORITY GROUNDWATER MANAGEMENT AREA; CONSIDERATION OF CREATION OF NEW DISTRICT OR ADDITION OF LAND IN PRIORITY GROUNDWATER MANAGEMENT AREA TO EXISTING DISTRICT; COMMISSION ORDER. (a) The commission shall designate priority groundwater management areas using the procedures provided by this chapter in lieu of those provided by Subchapter B, Chapter 2001, Government Code.

(b) The commission shall call an evidentiary hearing to consider:

(1) the designation of a priority groundwater management area; and

(2) whether one or more districts should be created over all or part of a priority groundwater management area, all or part of the land in the priority groundwater management area should be added to an existing district, or a combination of those actions should be taken. Consideration of this issue shall include a determination of whether a district is feasible and practicable.

(c) Evidentiary hearings shall be held at a location in one of the counties in which the priority groundwater management area is located, or proposed to be located, or in the nearest convenient location if adequate facilities are not available in those counties.

(d) At the hearing, the commission shall hear testimony and receive evidence from affected persons. Affected persons shall include landowners, well owners, and other users of groundwater in the proposed priority groundwater management area. The commission shall consider the executive director's report and supporting information and the testimony and evidence received at the hearing. If the commission considers further information necessary, the commission may request such information from any source.

(e) Any evidentiary hearing shall be concluded not later than the 75th day after the date notice of the hearing is published.

(f) At the conclusion of the hearing and the commission's considerations, the commission shall issue an order stating its findings and conclusions, including whether a priority groundwater management area should be designated in the area and recommendations regarding district creation as set forth in Subsection (g).

(g) The commission's order designating a priority groundwater management area must recommend that the area be covered by a district in any of the following ways:

- (1) creation of one or more new districts;
- (2) addition of the land in the priority groundwater management area to one or more existing districts; or
- (3) a combination of actions under Subdivisions (1) and (2).

(h) In recommending the boundaries of a district or districts under Subsection (g), the commission shall give preference to boundaries that are coterminous with those of the priority groundwater management area, but may recommend district boundaries along existing political subdivision boundaries at the discretion of

the commission to facilitate district creation and confirmation.

(i) The designation of a priority groundwater management area may not be appealed nor may it be challenged under Section 5.351 of this code or Section 2001.038, Government Code.

(j) The commission may adopt rules regarding:

(1) the creation of a district over all or part of a priority groundwater management area that was designated as a critical area under Chapter 35, Water Code, as that chapter existed before September 1, 1997, or under other prior law; and

(2) the addition of all or part of the land in a priority groundwater management area described by Subdivision (1) to an existing district.

(a) The commission shall have notice of the hearing published in at least one newspaper with general circulation in the county or counties in which the area proposed for designation as a priority groundwater management area is located. Notice must be published not later than the 30th day before the date set for the hearing.

(b) The notice must include:

(1) if applicable, a statement of the general purpose and effect of designating the proposed priority groundwater management area;

(2) if applicable, a statement of the general purpose and effect of creating a new district in the priority groundwater management area;

(3) if applicable, a statement of the general purpose and effect of adding all or part of the land in the priority groundwater management area to an existing district;

(4) a map generally outlining the boundaries of the area being considered for priority groundwater management area designation or notice of the location at which a copy of the map may be examined

or obtained;

(5) a statement that the executive director's report concerning the priority groundwater management area or proposed area is available at the commission's main office in Austin, Texas, and at regional offices of the commission for regions which include territory within the priority groundwater management area or proposed priority groundwater management area and that the report is available for inspection during regular business hours;

(6) a description or the name of the locations in the affected area at which the commission has provided copies of the executive director's report to be made available for public inspection;

(7) the name and address of each public library, each county clerk's office, and each district to which the commission has provided copies of the executive director's report; and

(8) the date, time, and place of the hearing.

Sec. 35.012. CREATION OF DISTRICT IN PRIORITY GROUNDWATER MANAGEMENT AREA. (a) Following the issuance of a commission order under Section 35.008 designating a priority groundwater management area and recommending the creation of one or more districts, or the addition of land to an existing district, the landowners in the priority groundwater management area may:

(1) create one or more districts under Subchapter B, Chapter 36;

(2) have the area annexed to a district that adjoins the area; or

(3) create one or more districts through the legislative process.

(b) Except as provided by Section 35.013, within two years, but no sooner than 120 days, from the date on which the commission issues an order under Section 35.008 designating a priority groundwater management area, for those areas that are not within a district, the commission shall create one or more new districts under Section 36.0151.

(b-1) For purposes of this section, the commission may consider territory in two separately designated priority groundwater management areas to be in the same designated priority groundwater management area if:

(1) the two areas share a common boundary and one or more common aquifers; and

(2) the commission determines that a district composed of territory in the two areas will result in more effective or efficient groundwater management than other options available to the commission.

(c) Following the issuance of a commission order under Section 35.008, the Texas Agricultural Extension Service shall begin an educational program within such areas with the assistance and cooperation of the Texas Water Development Board, the commission, the Department of Agriculture, other state agencies, and existing districts to inform the residents of the status of the area's water resources and management options including possible formation of a district. The county commissioners court of each county in the priority groundwater management area shall form a steering committee to provide assistance to the Texas Agricultural Extension Service in accomplishing the goals of the education program within the area.

Sec. 35.013. ADDING PRIORITY GROUNDWATER MANAGEMENT AREA TO EXISTING DISTRICT. (a) If the commission in its order under Section 35.008 recommends that the priority groundwater management area or a portion of the priority groundwater management area be added to an existing district, the commission shall give notice to the board of the existing district recommended in its order and to any other existing districts adjacent to the priority groundwater management area.

(b) The commission shall submit a copy of the order to the board of the district to which it is recommending the priority groundwater management area be added. Not later than the 120th day after the date of receiving the copy, the board shall vote on the addition of the priority groundwater management area to the district and shall advise the commission of the outcome.

(b-1) If the district described by Subsection (b) has not approved an ad valorem tax on the date of the commission's order issued under Section 35.008 and the board of the district votes to accept the addition of the priority groundwater management area to the district, the board shall enter an order adding the territory in the district.

(c) If the district described by Subsection (b) has approved an ad valorem tax on the date of the commission's order issued under Section 35.008 and the board votes to accept the addition of the priority groundwater management area to the district, the board:

(1) shall enter an order adding the territory in the district;

(2) may request the Texas AgriLife Extension Service, the commission, and the Texas Water Development Board, with the cooperation and assistance of the Department of Agriculture and other state agencies, to administer an educational program to inform the residents of the status of the area's water resources, the addition of territory to the district, and options for financing management of the groundwater resources of the district;

(3) shall call an election to be held not later than the 270th day after the date of the board's vote under Subsection (b) within the priority groundwater management area, or portion of the priority groundwater management area, as delineated by the commission to determine if the added area will assume a proportional share of

the debts or taxes of the district; and

(4) shall designate election precincts and polling places for the elections in the order calling an election under this subsection.

(d) The board shall give notice of the election and the proposition to be voted on. The board shall publish notice of the election at least one time in one or more newspapers with general circulation within the boundaries of the priority groundwater management area. The notice must be published before the 30th day preceding the date set for the election.

(e) The ballots for the election shall be printed to provide for voting for or against the proposition: "The assumption by the \_\_\_\_\_ (briefly describe the territory added under Subsection (c)(1)) of a proportional share of the debts or taxes of the \_\_\_\_\_ District instead of the assessment of fees in the described area to fund the groundwater management activities of the district."

(f) Immediately after the election, the presiding judge of each polling place shall deliver the returns of the election to the board, and the board shall canvass the returns for the election within the priority groundwater management area and declare the results. If a majority of the voters in the priority groundwater management area voting on the proposition vote in favor of the proposition, the board shall declare that the priority groundwater management area assumes a proportional share of the debts or taxes of the district. If a majority of the voters in the priority groundwater management area voting on the proposition do not vote in favor of the proposition, the board shall adopt rules to implement Subsection (g-1). The board shall file a copy of the election results with the commission.

(g) The board of the district to which the priority groundwater management area is added shall provide reasonable representation on that board compatible with the district's existing scheme of representation. Not later than the 30th day after the date on which the board declares that the priority groundwater management area is added to the district, the board of the existing district shall appoint a person or persons to represent the area until the next regularly scheduled election or appointment of directors.

(g-1) If the voters do not approve the assumption of a proportional share of the debts or taxes of a district under Subsection (e), the board shall assess production fees in the added territory based on the amount of water authorized by permit to be

withdrawn from a well or the amount actually withdrawn. A district may use revenue generated for any purpose authorized by Section 36.206 or 36.207. Initial production fees may not exceed production fees as set in Section 36.205(c), but may be increased by the board on a majority vote after the first anniversary of the commission order. Production fees may be raised incrementally by 40 percent and 10 percent every following year until the maximum production fees equal:

- (1) \$2 per acre-foot, payable annually, for water used for an agricultural purpose; or
- (2) 30 cents per 1,000 gallons, payable annually, for water used for any non-agricultural purpose.

(h) Not later than the first anniversary of the date on which the proposition is defeated, or the board of the existing district votes not to accept the addition of the area to the district, the commission shall, except as provided under Subsection (i):

- (1) create under Section 36.0151 one or more districts covering the priority groundwater management area; or
- (2) recommend the area be added to another existing district as provided by this section.

(i) For an area that is not feasible for the creation of one or more districts as determined in the commission's findings under Section 35.008, the commission shall include in its report under Section 35.018 recommendations for the future management of the priority groundwater management area.

(j) Another election to add the priority groundwater management area to an existing district may not be called before the first anniversary of the date on which the election on the proposition was held.

(b) The costs of an election to add a priority groundwater management area to an existing district at which the voters approve adding the priority groundwater management area to the district shall be paid by the existing district.

(c) The costs of an election to create a district or add a priority groundwater management area to an existing district at which the proposition fails shall be paid by the commission.

Sec. 35.017. STATE-OWNED LAND. If state-owned land or a portion of state-owned land is located in a priority groundwater management area, the state agency that has management and control over that land under the constitution or by statute may elect by written agreement with the commission and the district to include the state-owned land in the district. The agreement shall be entered into as provided by the Texas Intergovernmental Cooperation Act, Chapter 741, Government Code, and may include provisions for the payment by the state agency of reasonable fees to the district. If the state does not elect to enter into the agreement to include the state-owned land in the district, the state agency must establish a

groundwater management plan that will conserve, protect, and prevent the waste of groundwater on that state-owned land.

(7) a report on educational efforts in newly designated priority groundwater management areas; and

(8) any other information and recommendations that the commission considers relevant.

(c) If the commission determines that a district created under

(b) The commissioners court of a county in a priority groundwater management area may:

(1) require a person seeking approval of a plat required by Subchapter A, Chapter 232, Local Government Code, to show:

(A) compliance with the water availability requirements adopted by the court under this section; and

(B) that an adequate supply of water of sufficient quantity and quality is available to supply the number of lots proposed for the platted area;

(2) adopt standards or formulas to determine whether an adequate water supply exists for the platted area; and

(3) adopt procedures for submitting the information necessary to determine whether an adequate water supply exists for the platted area.

(c) The water availability requirements established by a commissioners court under this section may require that:

(1) a person seeking approval of a plat or attempting to sell a lot in a subdivision:

Sec. 36.0015. PURPOSE. In order to provide for the conservation, preservation, protection, recharging, and prevention of waste of groundwater, and of groundwater reservoirs or their subdivisions, and to control subsidence caused by withdrawal of water from those groundwater reservoirs or their subdivisions, consistent with the objectives of Section 59, Article XVI, Texas Constitution, groundwater conservation districts may be created as provided by this chapter. Groundwater conservation districts created as provided by this chapter are the state's preferred method of groundwater management through rules developed, adopted, and promulgated by a district in accordance with the provisions of this chapter.

Sec. 36.002. OWNERSHIP OF GROUNDWATER. (a) The legislature

recognizes that a landowner owns the groundwater below the surface of the landowner's land as real property.

(b) The groundwater ownership and rights described by this section:

(1) entitle the landowner, including a landowner's lessees, heirs, or assigns, to drill for and produce the groundwater below the surface of real property, subject to Subsection (d), without causing waste or malicious drainage of other property or negligently causing subsidence, but does not entitle a landowner, including a landowner's lessees, heirs, or assigns, to the right to capture a specific amount of groundwater below the surface of that landowner's land; and

(2) do not affect the existence of common law defenses or other defenses to liability under the rule of capture.

(c) Nothing in this code shall be construed as granting the authority to deprive or divest a landowner, including a landowner's lessees, heirs, or assigns, of the groundwater ownership and rights described by this section.

(d) This section does not:

(1) prohibit a district from limiting or prohibiting the drilling of a well by a landowner for failure or inability to comply with minimum well spacing or tract size requirements adopted by the district;

(2) affect the ability of a district to regulate groundwater production as authorized under Section 36.113, 36.116, or 36.122 or otherwise under this chapter or a special law governing a district; or

(3) require that a rule adopted by a district allocate to each landowner a proportionate share of available groundwater for production from the aquifer based on the number of acres owned by the landowner.

(e) This section does not affect the ability to regulate groundwater in any manner authorized under:

(1) Chapter 626, Acts of the 73rd Legislature, Regular Session, 1993, for the Edwards Aquifer Authority;

(2) Chapter 8801, Special District Local Laws Code, for the Harris-Galveston Subsidence District; and

(3) Chapter 8834, Special District Local Laws Code, for the Fort Bend Subsidence District.

#### **SUBCHAPTER B. CREATION OF DISTRICT**

Sec. 36.011. METHOD OF CREATING DISTRICT. (a) A groundwater conservation district may be created under and subject to the authority, conditions, and restrictions of Section 59, Article XVI, Texas Constitution.

(b) The commission has exclusive jurisdiction over the creation of districts.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.

Amended by Acts 2001, 77th Leg., ch. 966, Sec. 2.32, eff. Sept. 1, 2001.

Sec. 36.012. COMPOSITION OF DISTRICT. (a) A district may include all or part of one or more counties, cities, districts, or other political subdivisions.

(b) A district may not include territory located in more than one county except on a majority vote of the voters residing within the territory in each county sought to be included in the district at an election called for that purpose.

(c) The boundaries of a district must be coterminous with or inside the boundaries of a management area or a priority groundwater management area.

(d) A district may consist of separate bodies of land separated by land not included in the district.

(e) A majority of the voters in a segregated area must approve the creation of the district before that area may be included in the district.

(f) This section does not apply to districts created under Section 36.0151.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.

Amended by Acts 1997, 75th Leg., ch. 1010, Sec. 4.22, eff. Sept. 1, 1997; Acts 2001, 77th Leg., ch. 966, Sec. 2.33, eff. Sept. 1, 2001.

Sec. 36.013. PETITION TO CREATE DISTRICT. (a) A petition requesting creation of a district must be filed with the commission for review and certification under Section 36.015.

(b) The petition filed pursuant to this section must be signed by:

- (1) a majority of the landowners within the proposed district, as indicated by the county tax rolls; or
- (2) if there are more than 50 landowners in the proposed district, at least 50 of those landowners.

(c) The petition must include:

- (1) the name of the proposed district;
- (2) the area and boundaries of the proposed district, including a map generally outlining the boundaries of the proposed district;
- (3) the purpose or purposes of the district;
- (4) a statement of the general nature of any projects proposed to be undertaken by the district, the necessity and feasibility of the work, and the estimated costs of those projects according to the persons filing the projects if the projects are to be funded by the sale of bonds or notes;
- (5) the names of at least five individuals qualified to serve as temporary directors; and
- (6) financial information, including the projected maintenance tax or production fee rate and a proposed budget of revenues and expenses for the district.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995. Amended by Acts 1997, 75th Leg., ch. 1010, Sec. 4.23, eff. Sept. 1, 1997; Acts 2001, 77th Leg., ch. 966, Sec. 2.34, eff. Sept. 1, 2001.

Sec. 36.014. NOTICE AND PUBLIC MEETING ON DISTRICT CREATION.

(a) If a petition is filed under Section 36.013, the commission shall give notice of the application and shall conduct a public meeting in a central location within the area of the proposed district on the application not later than the 60th day after the

date the commission issues notice. The notice must contain the date, time, and location of the public meeting and must be published in one or more newspapers of general circulation in the area of the proposed district.

(b) If the petition contains a request to create a management area in all or part of the proposed district, the notice must also be given in accordance with the requirements in Section 35.006 for the designation of management areas.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.  
Amended by Acts 1997, 75th Leg., ch. 1070, Sec. 1, eff. Sept. 1, 1997; Acts 2001, 77th Leg., ch. 966, Sec. 2.35, eff. Sept. 1, 2001.

Sec. 36.015. COMMISSION CERTIFICATION AND ORDER. (a) Not later than the 90th day after the date the commission holds a public meeting on a petition under Section 36.014, the commission shall certify the petition if the petition is administratively complete. A petition is administratively complete if it complies with the requirements of Sections 36.013(b) and (c).

(b) The commission may not certify a petition if the commission finds that the proposed district cannot be adequately funded to carry out its purposes based on the financial information provided in the petition under Section 36.013(c)(6) or that the boundaries of the proposed district do not provide for the effective management of the groundwater resources. The commission shall give preference to boundary lines that are coterminous with those of a groundwater management area but may also consider boundaries along existing political subdivision boundaries if such boundaries would facilitate district creation and confirmation.

(c) If a petition proposes the creation of a district in an area, in whole or in part, that has not been designated as a management area, the commission shall provide notice to the Texas Water Development Board. On the receipt of notice from the commission, the Texas Water Development Board shall initiate the process of designating a management area for the area of the proposed district not included in a management area. The commission may not certify the petition until the Texas Water Development Board has adopted a rule whereby the boundaries of the proposed district are coterminous with or inside the boundaries of a management area.

(d) If the commission does not certify the petition, the commission shall provide to the petitioners, in writing, the reasons for not certifying the petition. The petitioners may resubmit the petition, without paying an additional fee, if the petition is resubmitted within 90 days after the date the commission sends the notice required by this subsection.

(e) If the commission certifies the petition as administratively complete, the commission shall issue an order, notify the petitioners, and appoint temporary directors as provided by Section 36.016.

(f) Refusal by the commission to certify a petition to create a district does not invalidate or affect the designation of any management area.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.  
Amended by Acts 2001, 77th Leg., ch. 966, Sec. 2.36, eff. Sept. 1, 2001.

Sec. 36.0151. CREATION OF DISTRICT FOR PRIORITY GROUNDWATER MANAGEMENT AREA. (a) If the commission is required to create a district under Section 35.012(b), it shall, without an evidentiary hearing, issue an order creating the district and shall provide in its order that temporary directors be appointed under Section 36.0161 and that an election be called by the temporary directors to authorize the district to assess taxes and to elect permanent directors.

(b) The commission shall notify the county commissioners court of each county with territory in the district of the district's creation as soon as practicable after issuing the order creating the district.

(c) The commission may amend the territory in an order issued under Section 35.008 or this section to adjust for areas that, in the time between when the order was issued under Section 35.008 and the order is issued under this section, have:

(1) been added to an existing district or created as a separate district; or

(2) not been added to an existing district or created as a separate district.

(d) In making a modification under Subsection (c), the

commission may recommend:

- (1) creation of a new district in the area; or
- (2) that the area be added to a different district.

(e) Except as provided by Section 35.013(h), a change in the order under Subsection (c) does not affect a deadline under Section 35.012 or 35.013.

(f) Before September 1, 2015, the commission may not create a groundwater conservation district under this section in a county:

- (1) in which the annual amount of surface water used is more than 50 times the annual amount of groundwater produced;
- (2) that is located in a priority groundwater management area; and
- (3) that has a population greater than 2.3 million.

(g) To the extent of a conflict between Subsection (f) and Section 35.012, Subsection (f) prevails.

(h) The commission may charge an annual fee not to exceed \$500 to a county described by Subsection (f) for the purpose of studying compliance with that subsection in that county and the overall groundwater consumption in that county.

Sec. 36.016. APPOINTMENT OF TEMPORARY DIRECTORS. (a) If the commission certifies a petition to create a district under Section 36.015, the commission shall appoint the temporary directors named in the petition. If the commission dissolves a district's board under Section 36.303, it shall appoint five temporary directors.

(b) If the commission creates a district under Section 36.0151, the county commissioners court or courts of the county or counties that contain the area of the district shall, within 90 days after receiving notification by the commission under Section 36.0151(b), appoint five temporary directors, or more if the district contains

the territory of more than five counties, for the district's board using the method provided by Section 36.0161. A county commissioners court shall not make any appointments after the expiration of the 90-day period. If fewer than five temporary directors have been appointed at the expiration of the period, the commission shall appoint additional directors so that the board has at least five members.

(c) Temporary directors appointed under this section shall serve until the initial directors are elected and have qualified for office or until the voters fail to approve the creation of the district.

(d) If an appointee of the commission or of a county commissioners court fails to qualify or if a vacancy occurs in the office of temporary director, the commission or the county commissioners court, as appropriate, shall appoint an individual to fill the vacancy.

(e) As soon as all temporary directors have qualified, the directors shall meet, take the oath of office, and elect a chairman and vice chairman from among their membership. The chairman shall preside at all meetings of the board and, in the chairman's absence, the vice chairman shall preside.

Sec. 36.0161. METHOD FOR APPOINTING TEMPORARY DIRECTORS FOR DISTRICT IN PRIORITY GROUNDWATER MANAGEMENT AREA. (a) If a district in a priority groundwater management area is:

(1) contained within one county, the county commissioners court of that county shall appoint five temporary directors for the district;

(2) contained within two counties, the county commissioners court of each county shall appoint at least one temporary director, with the appointments of the three remaining directors to be apportioned as provided by Subsection (b);

(3) contained within three counties, the county commissioners court of each county shall appoint at least one temporary director, with the appointments of the two remaining

directors to be apportioned as provided by Subsection (b);

(4) contained within four counties, the county commissioners court of each county shall appoint at least one temporary director, with the appointment of the remaining director to be apportioned as provided by Subsection (b); or

(5) contained within five or more counties, the county commissioners court of each county shall appoint one temporary director.

(b)(1) In this subsection, "estimated groundwater use" means the estimate of groundwater use in acre-feet developed by the commission under Subsection (c) for the area of a county that is within the district.

(2) The apportionment of appointments under Subsection (a) shall be made by the commission so as to reflect, as closely as possible, the proportion each county's estimated groundwater use bears to the sum of the estimated groundwater use for the district as determined under Subsection (c). The commission shall by rule determine the method it will use to implement this subdivision.

(c) If a district for which temporary directors are to be appointed is contained within two, three, or four counties, the commission shall develop an estimate of annual groundwater use in acre-feet for each county area within the district.

Added by Acts 1997, 75th Leg., ch. 1010, Sec. 4.26, eff. Sept. 1, 1997.

Sec. 36.017. CONFIRMATION AND DIRECTORS' ELECTION FOR DISTRICT IN A MANAGEMENT AREA. (a) For a district created under Section 36.015, not later than the 120th day after the date all temporary directors have been appointed and have qualified, the temporary directors shall meet and order an election to be held within the boundaries of the proposed district to approve the creation of the district and to elect permanent directors.

(b) In the order calling the election, the temporary directors shall designate election precincts and polling places for the election. In designating the polling places, the temporary directors shall consider the needs of all voters for conveniently located polling places.

(c) The temporary directors shall publish notice of the

election at least one time in at least one newspaper with general circulation within the boundaries of the proposed district. The notice must be published before the 30th day preceding the date of the election.

(d) The ballot for the election must be printed to provide for voting for or against the proposition: "The creation of the \_\_\_\_\_ Groundwater Conservation District." If the district levies a maintenance tax for payment of its expenses, then an additional proposition shall be included with the following language: "The levy of a maintenance tax at a rate not to exceed \_\_\_\_\_ cents for each \$100 of assessed valuation." The same ballot or another ballot must provide for the election of permanent directors, in accordance with Section 36.059.

(e) Immediately after the election, the presiding judge of each polling place shall deliver the returns of the election to the temporary board, and the board shall canvass the returns and declare the result. The board shall file a copy of the election result with the commission.

(f) If a majority of the votes cast at the election favor the creation of the district, the temporary board shall declare the district created and shall enter the result in its minutes.

(g) If a majority of the votes cast at the election are against the creation of the district, the temporary board shall declare the district defeated and shall enter the result in its minutes. The temporary board shall continue operations in accordance with Subsection (h).

(h) If the majority of the votes cast at the election are against the creation of the district, the district shall have no further authority, except that any debts incurred shall be paid and the organization of the district shall be maintained until all the debts are paid.

(i) If a majority of the votes cast at the election are against the levy of a maintenance tax, the district shall set production fees to pay for the district's regulation of groundwater in the district, including fees based on the amount of water to be withdrawn from a well.

(b) In the order calling the election, the temporary directors shall designate election precincts and polling places for the election. In designating the polling places, the temporary directors shall consider the needs of all voters for conveniently located polling places.

(c) The temporary directors shall publish notice of the election at least once in at least one newspaper with general circulation within the boundaries of the proposed district. The notice must be published before the 30th day preceding the date of the election.

Sec. 36.018. INCLUSION OF MUNICIPALITY. (a) If part of the territory to be included in a district is located in a municipality, a separate voting district may not be established in the municipality for the purpose of determining whether the municipality as a separate area is to be included in the district.

(b) If for any other reason the territory in a municipality is established as a separate voting district, the failure by the voters in the municipal territory to confirm the creation of the district or the annexation of territory to a district does not prevent the territory in the municipality from being included in the district.

Sec. 36.019. CONFIRMATION ELECTION IN DISTRICT INCLUDING LAND IN MORE THAN ONE COUNTY. (a) A district, the major portion of which is located in one county, may not be organized to include land in another county unless the election held in the other county to confirm and ratify the creation of the district is approved by a majority of the voters of the other county voting in an election called for that purpose.

The number of directors may be changed as determined by the board when territory is annexed by the district.

(b) A member of a governing body of another political subdivision is ineligible for appointment or election as a director. A director is disqualified and vacates the office of director if the director is appointed or elected as a member of the governing body of another political subdivision. This subsection does not apply to any district with a population less than 50,000.

(c) Vacancies in the office of director shall be filled by appointment of the board. If the vacant office is not scheduled for election for longer than two years at the time of the appointment, the board shall order an election for the unexpired term to be held as part of the next regularly scheduled director's election. The appointed director's term shall end on qualification of the director

elected at that election.

(d) In a district with a population of less than 50,000, the common law doctrine of incompatibility does not disqualify:

(1) a member of the governing body or officer of another political subdivision other than a municipality or county from serving as a director of the district; or

(2) a director of the district from serving as a member of the governing body or officer of another political subdivision other than a municipality or county.

(a) Other laws governing the administration or operations of districts created under Section 52, Article III, or Section 59, Article XVI, Texas Constitution, shall not apply to any district governed by this chapter. This chapter prevails over any other law in conflict or inconsistent with this chapter, except any special law governing a specific district shall prevail over this chapter.

(b) Notwithstanding Subsection (a), the following provisions prevail over a conflicting or inconsistent provision of a special law that governs a specific district:

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.

Sec. 36.054. OFFICERS. (a) After a district is created and the directors have qualified, the board shall meet, elect a president, vice president, secretary, and any other officers or assistant officers as the board may deem necessary and begin the discharge of its duties.

(b) After each directors' election, the board shall meet and elect officers.

(c) The president is the chief executive officer of the district, presides at all meetings of the board, and shall execute all documents on behalf of the district. The vice president shall act as president in case of the absence or disability of the president. The secretary is responsible for seeing that all records and books of the district are properly kept and shall attest the president's signature on all documents.

(d) The board may appoint another director, the general manager, or any employee as assistant or deputy secretary to assist the secretary, and any such person shall be entitled to certify as to the authenticity of any record of the district, including but not limited to all proceedings relating to bonds, contracts, or indebtedness of the district.

(e) After any election or appointment of a director, a district shall notify the executive director within 30 days after the date of the election or appointment of the name and mailing address of the director chosen and the date that director's term of office expires. The executive director shall provide forms to the district for such purpose.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.

(b) As soon as practicable after a director has made the sworn statement, and before beginning to perform the duties of office, that director shall take the oath of office prescribed by the constitution for public officers.

(c) Before beginning to perform the duties of office, each director shall execute a bond for \$10,000 payable to the district and

conditioned on the faithful performance of that director's duties. All bonds of the directors shall be approved by the board and paid for by the district.

(d) The sworn statement shall be filed as prescribed by the constitution. The bond and oath shall be filed with the district and retained in its records. A duplicate original of the oath shall also be filed with the secretary of state within 10 days after its execution and need not be filed before the new director begins to perform the duties of office.

#### **SUBCHAPTER D. POWERS AND DUTIES**

Sec. 36.101. RULEMAKING POWER. (a) A district may make and enforce rules, including rules limiting groundwater production based on tract size or the spacing of wells, to provide for conserving, preserving, protecting, and recharging of the groundwater or of a groundwater reservoir or its subdivisions in order to control subsidence, prevent degradation of water quality, or prevent waste of groundwater and to carry out the powers and duties provided by this chapter. In adopting a rule under this chapter, a district shall:

- (1) consider all groundwater uses and needs;
- (2) develop rules that are fair and impartial;
- (3) consider the groundwater ownership and rights described by Section 36.002;
- (4) consider the public interest in conservation, preservation, protection, recharging, and prevention of waste of groundwater, and of groundwater reservoirs or their subdivisions, and in controlling subsidence caused by withdrawal of groundwater from those groundwater reservoirs or their subdivisions, consistent with the objectives of Section 59, Article XVI, Texas Constitution;
- (5) consider the goals developed as part of the district's management plan under Section 36.1071; and

(6) not discriminate between land that is irrigated for production and land that was irrigated for production and enrolled or participating in a federal conservation program.

(a-1) Any rule of a district that discriminates between land that is irrigated for production and land that was irrigated for production and enrolled or participating in a federal conservation program is void.

(b) Except as provided by Section 36.1011, after notice and hearing, the board shall adopt and enforce rules to implement this chapter, including rules governing procedure before the board.

(c) The board shall compile its rules and make them available for use and inspection at the district's principal office.

(d) Not later than the 20th day before the date of a rulemaking hearing, the general manager or board shall:

(1) post notice in a place readily accessible to the public at the district office;

(2) provide notice to the county clerk of each county in the district;

(3) publish notice in one or more newspapers of general circulation in the county or counties in which the district is located;

(4) provide notice by mail, facsimile, or electronic mail to any person who has requested notice under Subsection (i); and

(5) make available a copy of all proposed rules at a place accessible to the public during normal business hours and, if the district has a website, post an electronic copy on a generally accessible Internet site.

(e) The notice provided under Subsection (d) must include:

(1) the time, date, and location of the rulemaking hearing;

(2) a brief explanation of the subject of the rulemaking hearing; and

(3) a location or Internet site at which a copy of the proposed rules may be reviewed or copied.

(f) The presiding officer shall conduct a rulemaking hearing in the manner the presiding officer determines to be most appropriate to obtain information and comments relating to the proposed rule as conveniently and expeditiously as possible. Comments may be submitted orally at the hearing or in writing. The presiding officer may hold the record open for a specified period after the conclusion of the hearing to receive additional written comments.

(g) A district may require each person who participates in a rulemaking hearing to submit a hearing registration form stating:

(1) the person's name;

(2) the person's address; and

(3) whom the person represents, if the person is not at the hearing in the person's individual capacity.

(h) The presiding officer shall prepare and keep a record of each rulemaking hearing in the form of an audio or video recording or a court reporter transcription.

(i) A person may submit to the district a written request for notice of a rulemaking hearing. A request is effective for the remainder of the calendar year in which the request is received by the district. To receive notice of a rulemaking hearing in a later year, a person must submit a new request. An affidavit of an officer or employee of the district establishing attempted service by first class mail, facsimile, or e-mail to the person in accordance with the information provided by the person is proof that notice was provided by the district.

(j) A district may use an informal conference or consultation to obtain the opinions and advice of interested persons about contemplated rules and may appoint advisory committees of experts, interested persons, or public representatives to advise the district about contemplated rules.

(k) Failure to provide notice under Subsection (d)(4) does not invalidate an action taken by the district at a rulemaking hearing.

(l) Subsections (b)-(k) do not apply to the Edwards Aquifer Authority.

Sec. 36.1011. EMERGENCY RULES. (a) A board may adopt an emergency rule without prior notice or hearing, or with an abbreviated notice and hearing, if the board:

(1) finds that a substantial likelihood of imminent peril to the public health, safety, or welfare, or a requirement of state or federal law, requires adoption of a rule on less than 20 days' notice; and

(2) prepares a written statement of the reasons for its finding under Subdivision (1).

(b) Except as provided by Subsection (c), a rule adopted under this section may not be effective for longer than 90 days.

(c) If notice of a hearing on the final rule is given not later than the 90th day after the date the rule is adopted, the rule is effective for an additional 90 days.

(b) The board by rule may set reasonable civil penalties against any person for breach of any rule of the district not to exceed \$10,000 per day per violation, and each day of a continuing violation constitutes a separate violation.

(c) A penalty under this section is in addition to any other penalty provided by the law of this state and may be enforced against any person by complaints filed in the appropriate court of jurisdiction in the county in which the district's principal office or meeting place is located.

(d) If the district prevails in any suit to enforce its rules, the district may seek and the court shall grant against any person, in the same action, recovery for attorney's fees, costs for expert witnesses, and other costs incurred by the district before the court.

The amount of the attorney's fees shall be fixed by the court.

(e) In an enforcement action by a district against any person that is a governmental entity for a violation of district rules, the limits on the amount of fees, costs, and penalties that a district may impose under Section 36.122, 36.205, or this section, or under a special law governing a district operating under this chapter, constitute a limit of liability of the governmental entity for the violation. This subsection shall not be construed to prohibit the recovery by a district of fees and costs under Subsection (d) in an action against any person that is a governmental entity.

Sec. 36.1072. TEXAS WATER DEVELOPMENT BOARD REVIEW AND APPROVAL OF MANAGEMENT PLAN. (a) In this section, "development board" means the Texas Water Development Board.

(a-1) A district shall, not later than three years after the creation of the district or, if the district required confirmation, not later than three years after the election confirming the district's creation, submit the management plan required under Section 36.1071 to the executive administrator for review and approval.

(b) Within 60 days of receipt of a district's management plan adopted under Section 36.1071, readopted under Subsection (e) or (g) of this section, or amended under Section 36.1073, the executive administrator shall approve the district's plan if the plan is administratively complete. A management plan is administratively complete when it contains the information required to be submitted under Section 36.1071(a) and (e). The executive administrator may determine whether conditions justify waiver of the requirements under Section 36.1071(e)(4).

(c) Once the executive administrator has approved a district's management plan:

(1) the executive administrator may not revoke but may require revisions to the approved management plan as provided by Subsection (g); and

(2) the executive administrator may request additional information from the district if the information is necessary to clarify, modify, or supplement previously submitted material, but a request for additional information does not render the management plan unapproved.

(d) A management plan takes effect on approval by the executive administrator or, if appealed, on approval by the development board.

(e) The district may review the plan annually and must review and readopt the plan with or without revisions at least once every five years. The district shall provide the readopted plan to the executive administrator not later than the 60th day after the date on which the plan was readopted. Approval of the preceding management plan remains in effect until:

(1) the district fails to timely readopt a management plan;

(2) the district fails to timely submit the district's readopted management plan to the executive administrator; or

(3) the executive administrator determines that the readopted management plan does not meet the requirements for approval, and the district has exhausted all appeals to the Texas Water Development Board or appropriate court.

(f) If the executive administrator does not approve the district's management plan, the executive administrator shall provide to the district, in writing, the reasons for the action. Not later than the 180th day after the date a district receives notice that its management plan has not been approved, the district may submit a revised management plan for review and approval. The executive

administrator's decision may be appealed to the development board. If the development board decides not to approve the district's management plan on appeal, the district may request that the conflict be mediated. The district and the board may seek the assistance of the Center for Public Policy Dispute Resolution at The University of Texas School of Law or an alternative dispute resolution system established under Chapter 152, Civil Practice and Remedies Code, in obtaining a qualified impartial third party to mediate the conflict. The cost of the mediation services must be specified in the agreement between the parties and the Center for Public Policy Dispute Resolution or the alternative dispute resolution system. If the parties do not resolve the conflict through mediation, the decision of the development board not to approve the district's management plan may be appealed to a district court in Travis County. Costs for the appeal shall be set by the court hearing the appeal. An appeal under this subsection is by trial de novo. The commission shall not take enforcement action against a district under Subchapter I until the latest of the expiration of the 180-day period, the date the development board has taken final action withholding approval of a revised management plan, the date the mediation is completed, or the date a final judgment upholding the board's decision is entered by a district court. An enforcement action may not be taken against a district by the commission or the state auditor under Subchapter I because the district's management plan and the approved regional water plan are in conflict while the parties are attempting to resolve the conflict before the development board, in mediation, or in court. Rules of the district continue in full force and effect until all appeals under this subsection have been exhausted and the final judgment is adverse to the district.

(g) A person with a legally defined interest in groundwater in a district, or the regional water planning group, may file a petition with the development board stating that a conflict requiring resolution may exist between the district's approved management plan developed under Section 36.1071 and the state water plan. If a conflict exists, the development board shall provide technical assistance to and facilitate coordination between the involved person or regional water planning group and the district to resolve the conflict. Not later than the 45th day after the date the person or the regional water planning group files a petition with the development board, if the conflict has not been resolved, the

district and the involved person or regional planning group may mediate the conflict. The district and the involved person or regional planning group may seek the assistance of the Center for Public Policy Dispute Resolution at The University of Texas School of Law or an alternative dispute resolution system established under Chapter 152, Civil Practice and Remedies Code, in obtaining a qualified impartial third party to mediate the conflict. The cost of the mediation services must be specified in the agreement between the parties and the Center for Public Policy Dispute Resolution or the alternative dispute resolution system. If the district and the involved person or regional planning group cannot resolve the conflict through mediation, the development board shall resolve the conflict not later than the 60th day after the date the mediation is completed. The development board action under this provision may be consolidated, at the option of the board, with related action under Section 16.053(p). If the development board determines that resolution of the conflict requires a revision of the approved management plan, the development board shall provide information to the district. The district shall prepare any revisions to the plan based on the information provided by the development board and shall hold, after notice, at least one public hearing at some central location within the district. The district shall consider all public and development board comments, prepare, revise, and adopt its management plan, and submit the revised management plan to the development board for approval. On the request of the district or the regional water planning group, the development board shall include discussion of the conflict and its resolution in the state water plan that the development board provides to the governor, the lieutenant governor, and the speaker of the house of representatives under Section 16.051(e). If the groundwater conservation district disagrees with the decision of the development board under this subsection, the district may appeal the decision to a district court in Travis County. Costs for the appeal shall be set by the court hearing the appeal. An appeal under this subsection is by trial de novo.

Sec. 36.1073. AMENDMENT TO MANAGEMENT PLAN. Any amendment to the management plan shall be submitted to the executive administrator within 60 days following adoption of the amendment by the district's board. The executive administrator shall review and approve any amendment which substantially affects the management plan in accordance with the procedures established under Section 36.1072.

Sec. 36.108. JOINT PLANNING IN MANAGEMENT AREA. (a) In this section:

(1) "Development board" means the Texas Water Development Board.

(2) "District representative" means the presiding officer or the presiding officer's designee for any district located wholly or partly in the management area.

(b) If two or more districts are located within the boundaries of the same management area, each district shall forward a copy of that district's new or revised management plan to the other districts in the management area. The boards of the districts shall consider the plans individually and shall compare them to other management plans then in force in the management area.

(c) The district representatives shall meet at least annually to conduct joint planning with the other districts in the management area and to review the management plans, the accomplishments of the management area, and proposals to adopt new or amend existing desired future conditions. In reviewing the management plans, the districts shall consider:

(1) the goals of each management plan and its impact on

planning throughout the management area;

(2) the effectiveness of the measures established by each district's management plan for conserving and protecting groundwater and preventing waste, and the effectiveness of these measures in the management area generally;

(3) any other matters that the boards consider relevant to the protection and conservation of groundwater and the prevention of waste in the management area; and

(4) the degree to which each management plan achieves the desired future conditions established during the joint planning process.

(d) Not later than September 1, 2010, and every five years thereafter, the districts shall consider groundwater availability models and other data or information for the management area and shall propose for adoption desired future conditions for the relevant aquifers within the management area. Before voting on the proposed desired future conditions of the aquifers under Subsection (d-2), the districts shall consider:

(1) aquifer uses or conditions within the management area, including conditions that differ substantially from one geographic area to another;

(2) the water supply needs and water management strategies included in the state water plan;

(3) hydrological conditions, including for each aquifer in the management area the total estimated recoverable storage as provided by the executive administrator, and the average annual recharge, inflows, and discharge;

(4) other environmental impacts, including impacts on spring flow and other interactions between groundwater and surface water;

(5) the impact on subsidence;

(6) socioeconomic impacts reasonably expected to occur;

(7) the impact on the interests and rights in private property, including ownership and the rights of management area landowners and their lessees and assigns in groundwater as recognized under Section 36.002;

(8) the feasibility of achieving the desired future condition; and

(9) any other information relevant to the specific desired future conditions.

(d-1) The districts may establish different desired future conditions for:

(1) each aquifer, subdivision of an aquifer, or geologic strata located in whole or in part within the boundaries of the management area; or

(2) each geographic area overlying an aquifer in whole or in part or subdivision of an aquifer within the boundaries of the management area.

(d-2) The desired future conditions proposed under Subsection (d) must provide a balance between the highest practicable level of groundwater production and the conservation, preservation, protection, recharging, and prevention of waste of groundwater and control of subsidence in the management area. This subsection does not prohibit the establishment of desired future conditions that provide for the reasonable long-term management of groundwater resources consistent with the management goals under Section 36.1071(a). The desired future conditions proposed under Subsection (d) must be approved by a two-thirds vote of all the district representatives for distribution to the districts in the management area. A period of not less than 90 days for public comments begins on the day the proposed desired future conditions are mailed to the districts. During the public comment period and after posting notice as required by Section 36.063, each district shall hold a public hearing on any proposed desired future conditions relevant to that district. During the public comment period, the district shall make available in its office a copy of the proposed desired future conditions and any supporting materials, such as the documentation of factors considered under Subsection (d) and groundwater availability model run results. After the public hearing, the district shall compile for consideration at the next joint planning meeting a summary of relevant comments received, any suggested revisions to the proposed desired future conditions, and the basis for the revisions.

(d-3) After the earlier of the date on which all the districts have submitted their district summaries or the expiration of the public comment period under Subsection (d-2), the district representatives shall reconvene to review the reports, consider any district's suggested revisions to the proposed desired future conditions, and finally adopt the desired future conditions for the management area. The desired future conditions must be adopted as a resolution by a two-thirds vote of all the district representatives.

The district representatives shall produce a desired future conditions explanatory report for the management area and submit to the development board and each district in the management area proof that notice was posted for the joint planning meeting, a copy of the resolution, and a copy of the explanatory report. The report must:

- (1) identify each desired future condition;
- (2) provide the policy and technical justifications for each desired future condition;
- (3) include documentation that the factors under Subsection (d) were considered by the districts and a discussion of how the adopted desired future conditions impact each factor;
- (4) list other desired future condition options considered, if any, and the reasons why those options were not adopted; and
- (5) discuss reasons why recommendations made by advisory committees and relevant public comments received by the districts were or were not incorporated into the desired future conditions.

(d-4) As soon as possible after a district receives the desired future conditions resolution and explanatory report under Subsection (d-3), the district shall adopt the desired future conditions in the resolution and report that apply to the district.

(d-5) Notwithstanding Subsection (d) and regardless of the date on which a proposal may have been voted on before September 1, 2013, a proposal for the adoption of desired future conditions for the relevant aquifers within a management area is not required before May 1, 2016. This subsection does not prevent districts in a management area from voting on a proposal for the adoption of desired future conditions for the relevant aquifers within their management area before May 1, 2016. This subsection expires January 1, 2018.

(e) Except as provided by this section, a joint meeting under this section must be held in accordance with Chapter 551, Government Code. Each district shall comply with Chapter 552, Government Code. The district representatives may elect one district to be responsible for providing the notice of a joint meeting that this section would otherwise require of each district in the management area. Notice of a joint meeting must be provided at least 10 days before the date of the meeting by:

- (1) providing notice to the secretary of state;
- (2) providing notice to the county clerk of each county located wholly or partly in a district that is located wholly or partly in the management area; and

(3) posting notice at a place readily accessible to the public at the district office of each district located wholly or partly in the management area.

(e-1) The secretary of state and the county clerk of each county described by Subsection (e) shall post notice of the meeting in the manner provided by Section 551.053, Government Code.

(e-2) Notice of a joint meeting must include:

(1) the date, time, and location of the meeting;

(2) a summary of any action proposed to be taken;

(3) the name of each district located wholly or partly in the management area; and

(4) the name, telephone number, and address of one or more persons to whom questions, requests for additional information, or comments may be submitted.

(e-3) The failure or refusal of one or more districts to post notice for a joint meeting under Subsection (e)(3) does not invalidate an action taken at the joint meeting.

Sec. 36.1081. TECHNICAL STAFF AND SUBCOMMITTEES FOR JOINT PLANNING. (a) On request, the commission and the Texas Water Development Board shall make technical staff available to serve in a nonvoting advisory capacity to assist with the development of desired future conditions during the joint planning process under Section 36.108.

(b) During the joint planning process under Section 36.108, the

district representatives may appoint and convene nonvoting advisory subcommittees who represent social, governmental, environmental, or economic interests to assist in the development of desired future conditions.

Sec. 36.1082. PETITION FOR INQUIRY. (a) In this section, "affected person" means, with respect to a management area:

- (1) an owner of land in the management area;
- (2) a district in or adjacent to the management area;
- (3) a regional water planning group with a water management strategy in the management area;
- (4) a person who holds or is applying for a permit from a district in the management area;
- (5) a person who has groundwater rights in the management area; or
- (6) any other person defined as affected by commission rule.

(b) An affected person may file a petition with the commission requesting an inquiry for any of the following reasons:

- (1) a district fails to submit its management plan to the executive administrator;
- (2) a district fails to participate in the joint planning process under Section 36.108;
- (3) a district fails to adopt rules;
- (4) a district fails to adopt the applicable desired future conditions adopted by the management area at a joint meeting;
- (5) a district fails to update its management plan before the second anniversary of the adoption of desired future conditions by the management area;
- (6) a district fails to update its rules to implement the applicable desired future conditions before the first anniversary of the date it updated its management plan with the adopted desired future conditions;
- (7) the rules adopted by a district are not designed to achieve the desired future conditions adopted by the management area during the joint planning process;

(8) the groundwater in the management area is not adequately protected by the rules adopted by a district; or

(9) the groundwater in the management area is not adequately protected due to the failure of a district to enforce substantial compliance with its rules.

(c) Not later than the 90th day after the date the petition is filed, the commission shall review the petition and either:

(1) dismiss the petition if the commission finds that the evidence is not adequate to show that any of the conditions alleged in the petition exist; or

(2) select a review panel as provided in Subsection (d).

(d) If the petition is not dismissed under Subsection (c), the commission shall appoint a review panel consisting of a chairman and four other members. A director or general manager of a district located outside the management area that is the subject of the petition may be appointed to the review panel. The commission may not appoint more than two members of the review panel from any one district. The commission also shall appoint a disinterested person to serve as a nonvoting recording secretary for the review panel. The recording secretary may be an employee of the commission. The recording secretary shall record and document the proceedings of the panel.

(e) Not later than the 120th day after appointment, the review panel shall review the petition and any evidence relevant to the petition and, in a public meeting, consider and adopt a report to be submitted to the commission. The commission may direct the review panel to conduct public hearings at a location in the management area to take evidence on the petition. The review panel may attempt to negotiate a settlement or resolve the dispute by any lawful means.

(f) In its report, the review panel shall include:

(1) a summary of all evidence taken in any hearing on the petition;

(2) a list of findings and recommended actions appropriate for the commission to take and the reasons it finds those actions appropriate; and

(3) any other information the panel considers appropriate.

(g) The review panel shall submit its report to the commission. The commission may take action under Section 36.3011.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1233 (S.B. 660), Sec. 17,

eff. September 1, 2011.

Sec. 36.1083. APPEAL OF DESIRED FUTURE CONDITIONS. (a) In this section, "development board" means the Texas Water Development Board.

(b) A person with a legally defined interest in the groundwater in the management area, a district in or adjacent to the management area, or a regional water planning group for a region in the management area may file a petition with the development board appealing the approval of the desired future conditions of the groundwater resources established under this section. The petition must provide evidence that the districts did not establish a reasonable desired future condition of the groundwater resources in the management area.

(c) The development board shall review the petition and any evidence relevant to the petition. The development board shall hold at least one hearing at a central location in the management area to take testimony on the petition. The development board may delegate responsibility for a hearing to the executive administrator or to a person designated by the executive administrator. If the development board finds that the conditions require revision, the development board shall submit a report to the districts that includes a list of findings and recommended revisions to the desired future conditions of the groundwater resources.

(d) The districts shall prepare a revised plan in accordance with development board recommendations and hold, after notice, at least one public hearing at a central location in the management area. After consideration of all public and development board comments, the districts shall revise the conditions and submit the conditions to the development board for review.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1233 (S.B. 660), Sec. 17, eff. September 1, 2011.

Sec. 36.1084. MODELED AVAILABLE GROUNDWATER. (a) The Texas Water Development Board shall require the districts in a management area to submit to the executive administrator not later than the 60th day after the date on which the districts adopted desired future

conditions under Section 36.108(d-3):

(1) the desired future conditions adopted under Section 36.108;

(2) proof that notice was posted for the joint planning meeting; and

(3) the desired future conditions explanatory report.

(b) The executive administrator shall provide each district and regional water planning group located wholly or partly in the management area with the modeled available groundwater in the management area based upon the desired future conditions adopted by the districts.

Sec. 36.1085. MANAGEMENT PLAN GOALS AND OBJECTIVES. Each district in the management area shall ensure that its management plan contains goals and objectives consistent with achieving the desired future conditions of the relevant aquifers as adopted during the joint planning process.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1233 (S.B. 660), Sec. 17, eff. September 1, 2011.

Sec. 36.1086. JOINT EFFORTS BY DISTRICTS IN A MANAGEMENT AREA. Districts located within the same management areas or in adjacent management areas may contract to jointly conduct studies or research, or to construct projects, under terms and conditions that the districts consider beneficial. These joint efforts may include studies of groundwater availability and quality, aquifer modeling, and the interaction of groundwater and surface water; educational programs; the purchase and sharing of equipment; and the implementation of projects to make groundwater available, including aquifer recharge, brush control, weather modification, desalination, regionalization, and treatment or conveyance facilities. The districts may contract under their existing authorizations including those of Chapter 791, Government Code, if their contracting authority is not limited by Sections 791.011(c)(2) and (d)(3) and Section 791.014, Government Code.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1233 (S.B. 660), Sec. 17, eff. September 1, 2011.

Sec. 36.109. COLLECTION OF INFORMATION. A district may collect any information the board deems necessary, including information regarding the use of groundwater, water conservation, and the practicability of recharging a groundwater reservoir. At the request of the executive administrator, the district shall provide any data collected by the district in a format acceptable to the executive administrator.

Sec. 36.110. PUBLICATION OF PLANS AND INFORMATION. A district may publish its plans and the information it develops, bring them to the attention of the users of groundwater in the district, and encourage the users to adopt and use them.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.

Sec. 36.111. RECORDS AND REPORTS. (a) The district may require that records be kept and reports be made of the drilling, equipping, and completing of water wells and of the production and use of groundwater.

(b) In implementing Subsection (a), a district may adopt rules that require an owner or operator of a water well that is required to be registered with or permitted by the district, except for the owner or operator of a well that is exempt from permit requirements under Section 36.117(b)(1), to report groundwater withdrawals using reasonable and appropriate reporting methods and frequency.

Sec. 36.112. DRILLERS' LOGS. A district shall require that accurate drillers' logs be kept of water wells and that copies of drillers' logs and electric logs be filed with the district.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.

Sec. 36.113. PERMITS FOR WELLS; PERMIT AMENDMENTS. (a) Except as provided by Section 36.117, a district shall require a permit for the drilling, equipping, operating, or completing of wells or for substantially altering the size of wells or well pumps. A district may require that a change in the withdrawal or use of groundwater during the term of a permit issued by the district may not be made unless the district has first approved a permit amendment authorizing the change.

(a-1) A district may not require a permit or a permit amendment for maintenance or repair of a well if the maintenance or repair does not increase the production capabilities of the well to more than its authorized or permitted production rate.

(b) A district shall require that an application for a permit or a permit amendment be in writing and sworn to.

(c) A district may require that the following be included in the permit or permit amendment application:

(1) the name and mailing address of the applicant and the owner of the land on which the well will be located;

(2) if the applicant is other than the owner of the property, documentation establishing the applicable authority to construct and operate a well for the proposed use;

(3) a statement of the nature and purpose of the proposed use and the amount of water to be used for each purpose;

(4) a water conservation plan or a declaration that the applicant will comply with the district's management plan;

(5) the location of each well and the estimated rate at which water will be withdrawn;

(6) a water well closure plan or a declaration that the applicant will comply with well plugging guidelines and report closure to the commission; and

(7) a drought contingency plan.

(d) Before granting or denying a permit or permit amendment, the district shall consider whether:

(1) the application conforms to the requirements prescribed by this chapter and is accompanied by the prescribed fees;

(2) the proposed use of water unreasonably affects existing groundwater and surface water resources or existing permit holders;

(3) the proposed use of water is dedicated to any beneficial use;

(4) the proposed use of water is consistent with the district's approved management plan;

(5) if the well will be located in the Hill Country Priority Groundwater Management Area, the proposed use of water from the well is wholly or partly to provide water to a pond, lake, or reservoir to enhance the appearance of the landscape;

(6) the applicant has agreed to avoid waste and achieve water conservation; and

(7) the applicant has agreed that reasonable diligence will be used to protect groundwater quality and that the applicant will follow well plugging guidelines at the time of well closure.

(e) The district may impose more restrictive permit conditions on new permit applications and permit amendment applications to increase use by historic users if the limitations:

(1) apply to all subsequent new permit applications and permit amendment applications to increase use by historic users, regardless of type or location of use;

(2) bear a reasonable relationship to the existing district management plan; and

(3) are reasonably necessary to protect existing use.

(f) Permits and permit amendments may be issued subject to the rules promulgated by the district and subject to terms and provisions with reference to the drilling, equipping, completion, alteration, or operation of, or production of groundwater from, wells or pumps that may be necessary to prevent waste and achieve water conservation, minimize as far as practicable the drawdown of the water table or the reduction of artesian pressure, lessen interference between wells, or control and prevent subsidence.

(h) In issuing a permit for an existing or historic use, a district may not discriminate between land that is irrigated for production and land or wells on land that was irrigated for production and enrolled or participating in a federal conservation

program.

(i) A permitting decision by a district is void if:

(1) the district makes its decision in violation of Subsection (h); and

(2) the district would have reached a different decision if the district had treated land or wells on land that was irrigated for production and enrolled or participating in a federal conservation program the same as land irrigated for production.

Sec. 36.1132. PERMITS BASED ON MODELED AVAILABLE GROUNDWATER.

(a) A district, to the extent possible, shall issue permits up to the point that the total volume of exempt and permitted groundwater production will achieve an applicable desired future condition under Section 36.108.

(b) In issuing permits, the district shall manage total groundwater production on a long-term basis to achieve an applicable desired future condition and consider:

(1) the modeled available groundwater determined by the executive administrator;

(2) the executive administrator's estimate of the current and projected amount of groundwater produced under exemptions granted by district rules and Section 36.117;

(3) the amount of groundwater authorized under permits previously issued by the district;

(4) a reasonable estimate of the amount of groundwater that is actually produced under permits issued by the district; and

(5) yearly precipitation and production patterns.

(c) In developing the estimate of exempt use under Subsection (b)(2), the executive administrator shall solicit information from each applicable district.

## Sec. 36.114. PERMIT; PERMIT AMENDMENT; APPLICATION AND HEARING.

(a) The district by rule shall determine each activity regulated by the district for which a permit or permit amendment is required.

(b) For each activity for which the district determines a permit or permit amendment is required under Subsection (a), the district by rule shall determine whether a hearing on the permit or permit amendment application is required.

(c) For all applications for which a hearing is not required under Subsection (b), the board shall act on the application at a meeting, as defined by Section 551.001, Government Code, unless the board by rule has delegated to the general manager the authority to act on the application.

(d) The district shall promptly consider and act on each administratively complete application for a permit or permit amendment as provided by Subsection (c) or Subchapter M.

(e) If, within 60 days after the date an administratively complete application is submitted, the application has not been acted on or set for a hearing on a specific date, the applicant may petition the district court of the county where the land is located for a writ of mandamus to compel the district to act on the application or set a date for a hearing on the application, as appropriate.

(f) For applications requiring a hearing, the initial hearing shall be held within 35 days after the setting of the date, and the district shall act on the application within 60 days after the date the final hearing on the application is concluded.

(g) The district may by rule set a time when an application will expire if the information requested in the application is not provided to the district.

(h) An administratively complete application requires information set forth in accordance with Sections 36.113 and 36.1131.

## Sec. 36.115. DRILLING OR ALTERING WELL WITHOUT PERMIT. (a) No

person, firm, or corporation may drill a well without first obtaining a permit from the district.

(b) No person, firm, or corporation may alter the size of a well or well pump such that it would bring that well under the jurisdiction of the district without first obtaining a permit from the district.

(c) No person, firm, or corporation may operate a well without first obtaining a permit from the district.

(d) A violation occurs on the first day the drilling, alteration, or operation begins and continues each day thereafter until the appropriate permits are approved.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.

Sec. 36.116. REGULATION OF SPACING AND PRODUCTION. (a) In order to minimize as far as practicable the drawdown of the water table or the reduction of artesian pressure, to control subsidence, to prevent interference between wells, to prevent degradation of water quality, or to prevent waste, a district by rule may regulate:

(1) the spacing of water wells by:

- (A) requiring all water wells to be spaced a certain distance from property lines or adjoining wells;
- (B) requiring wells with a certain production capacity, pump size, or other characteristic related to the construction or operation of and production from a well to be spaced a certain distance from property lines or adjoining wells; or
- (C) imposing spacing requirements adopted by the board;

and

(2) the production of groundwater by:

- (A) setting production limits on wells;
- (B) limiting the amount of water produced based on acreage or tract size;
- (C) limiting the amount of water that may be produced from a defined number of acres assigned to an authorized well site;
- (D) limiting the maximum amount of water that may be produced on the basis of acre-feet per acre or gallons per minute per well site per acre;
- (E) managed depletion; or
- (F) any combination of the methods listed above in

Paragraphs (A) through (E).

(b) In promulgating any rules limiting groundwater production, the district may preserve historic or existing use before the effective date of the rules to the maximum extent practicable consistent with the district's management plan under Section 36.1071 and as provided by Section 36.113.

(c) In regulating the production of groundwater based on tract size or acreage, a district may consider the service needs or service area of a retail water utility. For the purposes of this subsection, "retail water utility" shall have the meaning provided at Section 13.002.

(d) For better management of the groundwater resources located in a district or if a district determines that conditions in or use of an aquifer differ substantially from one geographic area of the district to another, the district may adopt different rules for:

(1) each aquifer, subdivision of an aquifer, or geologic strata located in whole or in part within the boundaries of the district; or

(2) each geographic area overlying an aquifer or subdivision of an aquifer located in whole or in part within the boundaries of the district.

(e) In regulating the production of groundwater under Subsection (a)(2), a district:

(1) shall select a method that is appropriate based on the hydrogeological conditions of the aquifer or aquifers in the district; and

(2) may limit the amount of water produced based on contiguous surface acreage.

Sec. 36.117. EXEMPTIONS; EXCEPTION; LIMITATIONS. (a) A district by rule may provide an exemption from the district's requirement to obtain a drilling permit, an operating permit, or any other permit required by this chapter or the district's rules.

(b) Except as provided by this section, a district shall provide an exemption from the district requirement to obtain a permit for:

(1) drilling or operating a well used solely for domestic use or for providing water for livestock or poultry if the well is:

(A) located or to be located on a tract of land larger than 10 acres; and

(B) drilled, completed, or equipped so that it is incapable of producing more than 25,000 gallons of groundwater a day;

(2) drilling a water well used solely to supply water for a rig that is actively engaged in drilling or exploration operations for an oil or gas well permitted by the Railroad Commission of Texas provided that the person holding the permit is responsible for drilling and operating the water well and the water well is located on the same lease or field associated with the drilling rig; or

(3) drilling a water well authorized under a permit issued by the Railroad Commission of Texas under Chapter 134, Natural Resources Code, or for production from the well to the extent the withdrawals are required for mining activities regardless of any subsequent use of the water.

(c) A district may not restrict the production of water from any well described by Subsection (b)(1).

(d) A district may cancel a previously granted exemption, and may require an operating permit for or restrict production from a well, if:

(1) the well is located in the Hill Country Priority Groundwater Management Area and the groundwater withdrawals that were exempted under Subsection (b)(1) are no longer used solely for domestic use or to provide water for livestock or poultry;

(2) the groundwater withdrawals that were exempted under Subsection (b)(2) are no longer used solely to supply water for a rig that is actively engaged in drilling or exploration operations for an oil or gas well permitted by the Railroad Commission of Texas; or

(3) the groundwater withdrawals that were exempted under Subsection (b)(3) are no longer necessary for mining activities or are greater than the amount necessary for mining activities specified

in the permit issued by the Railroad Commission of Texas under Chapter 134, Natural Resources Code.

(e) An entity holding a permit issued by the Railroad Commission of Texas under Chapter 134, Natural Resources Code, that authorizes the drilling of a water well shall report monthly to the district:

- (1) the total amount of water withdrawn during the month;
- (2) the quantity of water necessary for mining activities;

and

- (3) the quantity of water withdrawn for other purposes.

(f) A district may require compliance with the district's well spacing rules for the drilling of any well except a well exempted under Subsection (b)(3).

(g) A district may not deny an application for a permit to drill and produce water for hydrocarbon production activities if the application meets all applicable rules as promulgated by the district.

(h) A district shall require the owner of a water well to:

(1) register the well in accordance with rules promulgated by the district; and

(2) equip and maintain the well to conform to the district's rules requiring installation of casing, pipe, and fittings to prevent the escape of groundwater from a groundwater reservoir to any reservoir not containing groundwater and to prevent the pollution or harmful alteration of the character of the water in any groundwater reservoir.

(i) The driller of a well shall file with the district the well log required by Section 1901.251, Occupations Code, and, if available, the geophysical log.

(j) An exemption provided under Subsection (b) does not apply to a well if the groundwater withdrawn is used to supply water for a subdivision of land for which a plat approval is required by Chapter 232, Local Government Code.

(k) Groundwater withdrawn under an exemption provided in accordance with this section and subsequently transported outside the boundaries of the district is subject to any applicable production and export fees under Sections 36.122 and 36.205.

(1) This chapter applies to water wells, including water wells used to supply water for activities related to the exploration or production of hydrocarbons or minerals. This chapter does not apply

to production or injection wells drilled for oil, gas, sulphur, uranium, or brine, or for core tests, or for injection of gas, saltwater, or other fluids, under permits issued by the Railroad Commission of Texas.

Sec. 36.118. OPEN OR UNCOVERED WELLS. (a) A district may require the owner or lessee of land on which an open or uncovered well is located to keep the well permanently closed or capped with a covering capable of sustaining weight of at least 400 pounds, except when the well is in actual use.

(b) As used in this section, "open or uncovered well" means an artificial excavation dug or drilled for the purpose of exploring for or producing water from the groundwater reservoir and is not capped or covered as required by this chapter.

(c) If the owner or lessee fails or refuses to close or cap the well in compliance with this chapter in accordance with district rules, any person, firm, or corporation employed by the district may go on the land and close or cap the well safely and securely.

(d) Reasonable expenses incurred by the district in closing or capping a well constitute a lien on the land on which the well is located.

(e) The lien arises and attaches upon recordation in the deed records of the county where the well is located an affidavit, executed by any person conversant with the facts, stating the following:

- (1) the existence of the well;
- (2) the legal description of the property on which the well

is located;

(3) the approximate location of the well on the property;

(4) the failure or refusal of the owner or lessee, after notification, to close the well within 10 days after the notification;

(5) the closing of the well by the district, or by an authorized agent, representative, or employee of the district; and

(6) the expense incurred by the district in closing the well.

(f) Nothing in this section affects the enforcement of Subchapter A, Chapter 756, Health and Safety Code.

Added by Acts 1995, 74th Leg., ch. 933, Sec. 2, eff. Sept. 1, 1995.

Sec. 36.119. ILLEGAL DRILLING AND OPERATION OF WELL; CITIZEN SUIT. (a) Drilling or operating a well or wells without a required permit or producing groundwater in violation of a district rule adopted under Section 36.116(a)(2) is declared to be illegal, wasteful per se, and a nuisance.

(b) Except as provided by this section, a landowner or other person who has a right to produce groundwater from land that is adjacent to the land on which a well or wells are drilled or operated without a required permit or permits or from which groundwater is produced in violation of a district rule adopted under Section 36.116(a)(2), or who owns or otherwise has a right to produce groundwater from land that lies within one-half mile of the well or wells, may sue the owner of the well or wells in a court of competent jurisdiction to restrain or enjoin the illegal drilling, operation, or both. The suit may be brought with or without the joinder of the district.

(c) Except as provided by this section, the aggrieved party may also sue the owner of the well or wells for damages for injuries suffered by reason of the illegal operation or production and for other relief to which the party may be entitled. In a suit for damages against the owner of the well or wells, the existence of a well or wells drilled without a required permit or the operation of a well or wells in violation of a district rule adopted under Section 36.116(a)(2) is prima facie evidence of illegal drainage.

(d) The suit may be brought in the county where the illegal

well is located or in the county where all or part of the affected land is located.

(e) The remedies provided by this section are cumulative of other remedies available to the individual or the district.

(f) A suit brought under this section shall be advanced for trial and determined as expeditiously as possible. The court shall not grant a postponement or continuance, including a first motion, except for reasons considered imperative by the court.

(g) Before filing a suit under Subsection (b) or (c), an aggrieved party must file a written complaint with the district having jurisdiction over the well or wells drilled or operated without a required permit or in violation of a district rule. The district shall investigate the complaint and, after notice and hearing and not later than the 90th day after the date the written complaint was received by the district, the district shall determine, based on the evidence presented at the hearing, whether a district rule has been violated. The aggrieved party may only file a suit under this section on or after the 91st day after the date the written complaint was received by the district.

(h) Notwithstanding Subsection (g), an aggrieved party under Subsection (b) may sue a well owner or well driller in a court of competent jurisdiction to restrain or enjoin the drilling or completion of an illegal well after filing the written complaint with the district under Subsection (g) and without the need to wait for a hearing on the matter.

Sec. 36.120. INFORMATION. On request of the executive director or the executive administrator, the district shall make available information that it acquires concerning the groundwater resources within its jurisdiction. The district shall also provide information to the commission and Texas Water Development Board concerning its plans and activities in conserving and protecting groundwater resources. On request of a district, the executive director and the executive administrator shall provide information they acquire

concerning the groundwater resources within the district's jurisdiction.

Sec. 36.121. LIMITATION ON RULEMAKING POWER OF DISTRICTS OVER WELLS IN CERTAIN COUNTIES. Except as provided by Section 36.117, a district that is created under this chapter on or after September 1, 1991, shall exempt from regulation under this chapter a well and any water produced or to be produced by a well that is located in a county that has a population of 14,000 or less if the water is to be used solely to supply a municipality that has a population of 121,000 or less and the rights to the water produced from the well are owned by a political subdivision that is not a municipality, or by a municipality that has a population of 115,000 or less, and that purchased, owned, or held rights to the water before the date on which the district was created, regardless of the date the well is drilled or the water is produced. The district may not prohibit the political subdivision or municipality from transporting produced water inside or outside the district's boundaries.

Sec. 36.122. TRANSFER OF GROUNDWATER OUT OF DISTRICT. (a) If an application for a permit or an amendment to a permit under Section 36.113 proposes the transfer of groundwater outside of a district's boundaries, the district may also consider the provisions of this section in determining whether to grant or deny the permit or permit amendment.

(b) A district may promulgate rules requiring a person to

obtain a permit or an amendment to a permit under Section 36.113 from the district for the transfer of groundwater out of the district to:

(1) increase, on or after March 2, 1997, the amount of groundwater to be transferred under a continuing arrangement in effect before that date; or

(2) transfer groundwater out of the district on or after March 2, 1997, under a new arrangement.

(c) Except as provided in Section 36.113(e), the district may not impose more restrictive permit conditions on transporters than the district imposes on existing in-district users.

(d) The district may impose a reasonable fee for processing an application under this section. The fee may not exceed fees that the district imposes for processing other applications under Section 36.113. An application filed to comply with this section shall be considered and processed under the same procedures as other applications for permits under Section 36.113 and shall be combined with applications filed to obtain a permit for in-district water use under Section 36.113 from the same applicant.

(e) The district may impose a reasonable fee or surcharge for an export fee using one of the following methods:

(1) a fee negotiated between the district and the transporter;

(2) a rate not to exceed the equivalent of the district's tax rate per hundred dollars of valuation for each thousand gallons of water transferred out of the district or 2.5 cents per thousand gallons of water, if the district assesses a tax rate of less than 2.5 cents per hundred dollars of valuation; or

(3) for a fee-based district, a 50 percent export surcharge, in addition to the district's production fee, for water transferred out of the district.

(f) In reviewing a proposed transfer of groundwater out of the district, the district shall consider:

(1) the availability of water in the district and in the proposed receiving area during the period for which the water supply is requested;

(2) the projected effect of the proposed transfer on aquifer conditions, depletion, subsidence, or effects on existing permit holders or other groundwater users within the district; and

(3) the approved regional water plan and approved district management plan.

(g) The district may not deny a permit based on the fact that the applicant seeks to transfer groundwater outside of the district but may limit a permit issued under this section if conditions in Subsection (f) warrant the limitation, subject to Subsection (c).

(h) In addition to conditions provided by Section 36.1131, the permit shall specify:

(1) the amount of water that may be transferred out of the district; and

(2) the period for which the water may be transferred.

(i) The period specified by Subsection (h)(2) shall be:

(1) at least three years if construction of a conveyance system has not been initiated prior to the issuance of the permit; or

(2) at least 30 years if construction of a conveyance system has been initiated prior to the issuance of the permit.

(j) A term under Subsection (i)(1) shall automatically be extended to the terms agreed to under Subsection (i)(2) if construction of a conveyance system is begun before the expiration of the initial term.

(k) Notwithstanding the period specified in Subsections (i) and (j) during which water may be transferred under a permit, a district may periodically review the amount of water that may be transferred under the permit and may limit the amount if additional factors considered in Subsection (f) warrant the limitation, subject to Subsection (c). The review described by this subsection may take place not more frequently than the period provided for the review or renewal of regular permits issued by the district. In its determination of whether to renew a permit issued under this section, the district shall consider relevant and current data for the conservation of groundwater resources and shall consider the permit in the same manner it would consider any other permit in the district.

(l) A district is prohibited from using revenues obtained under Subsection (e) to prohibit the transfer of groundwater outside of a district. A district is not prohibited from using revenues obtained under Subsection (e) for paying expenses related to enforcement of this chapter or district rules.

(m) A district may not prohibit the export of groundwater if the purchase was in effect on or before June 1, 1997.

(n) This section applies only to a transfer of water that is

permitted after September 1, 1997.

(o) A district shall adopt rules as necessary to implement this section but may not adopt rules expressly prohibiting the export of groundwater.

(p) Subsection (e) does not apply to a district that is collecting an export fee or surcharge on March 1, 2001.

(q) In applying this section, a district must be fair, impartial, and nondiscriminatory.

Sec. 36.123. RIGHT TO ENTER LAND. (a) The directors, engineers, attorneys, agents, operators, and employees of a district or water supply corporation may go on any land to inspect, make surveys, or perform tests to determine the condition, value, and usability of the property, with reference to the proposed location of works, improvements, plants, facilities, equipment, or appliances. The cost of restoration shall be borne by the district or the water supply corporation.

(b) District employees and agents are entitled to enter any public or private property within the boundaries of the district or adjacent to any reservoir or other property owned by the district at any reasonable time for the purpose of inspecting and investigating conditions relating to the quality of water in the state or the compliance with any rule, regulation, permit, or other order of the district. District employees or agents acting under this authority who enter private property shall observe the establishment's rules and regulations concerning safety, internal security, and fire protection and shall notify any occupant or management of their presence and shall exhibit proper credentials.

Sec. 36.124. DISTRICT ACT OR PROCEEDING PRESUMED VALID. (a) A

governmental act or proceeding of a district is conclusively presumed, as of the date it occurred, valid and to have occurred in accordance with all applicable statutes and rules if:

(1) the third anniversary of the effective date of the act or proceeding has expired; and

(2) a lawsuit to annul or invalidate the act or proceeding has not been filed on or before that third anniversary.

(b) This section does not apply to:

(1) an act or proceeding that was void at the time it occurred;

(2) an act or proceeding that, under a statute of this state or the United States, was a misdemeanor or felony at the time the act or proceeding occurred;

(3) a rule that, at the time it was passed, was preempted by a statute of this state or the United States, including Section 1.06 or 109.57, Alcoholic Beverage Code; or

(4) a matter that on the effective date of this section:

(A) is involved in litigation if the litigation ultimately results in the matter being held invalid by a final judgment of a court; or

(B) has been held invalid by a final judgment of a court.

(b) The annual audit and other district records must be open to inspection during regular business hours at the principal office of the district.

(c) The district is exempt from the requirement under Subsection (a) if it had:

(1) not more than \$500 in receipts from operations, tax assessments, loans, contributions, or any other sources during the calendar year;

(2) not more than \$500 in disbursements of funds during the calendar year;

(3) no bonds or other liabilities with terms of more than one year outstanding during the calendar year; and

(4) no cash or investments amounting to more than \$5,000 at any time during the calendar year.

(d) The "Closed Basin" means that part of the Rio Grande Basin in Colorado where the streams drain into the San Luis Lakes and

adjacent territory, and do not normally contribute to the flow of the Rio Grande.

(e) The term "tributary" means any stream which naturally contributes to the flow of the Rio Grande.

(f) "Transmountain Diversion" is water imported into the drainage basin of the Rio Grande from any stream system outside of the Rio Grande Basin, exclusive of the Closed Basin.

(g) "Annual Debits" are the amounts by which actual deliveries in any calendar year fall below scheduled deliveries.

(h) "Annual Credits" are the amounts by which actual deliveries in any calendar year exceed scheduled deliveries.

(i) "Accrued Debits" are the amounts by which the sum of all annual debits exceeds the sum of all annual credits over any common period of time.

(j) "Accrued Credits" are the amounts by which the sum of all annual credits exceeds the sum of all annual debits over any common period of time.

(k) "Project Storage" is the combined capacity of Elephant Butte Reservoir and all other reservoirs actually available for the storage of usable water below Elephant Butte and above the first diversion to lands of the Rio Grande Project, but not more than a total of two million, six hundred and thirty-eight thousand, eight hundred and sixty (2,638,860) acre-feet.

(l) "Usable Water" is all water, exclusive of credit water, which is in project storage and which is available for release in accordance with irrigation demands, including deliveries to Mexico.

(m) "Credit Water" is that amount of water in project storage which is equal to the accrued credit of Colorado or New Mexico or both.

(n) "Unfilled Capacity" is the difference between the total physical capacity of project storage and the amount of usable water then in storage.

(o) "Actual Release" is the amount of usable water released in any calendar year from the lowest reservoir comprising project storage.

(p) "Actual Spill" is all water which is actually spilled from Elephant Butte Reservoir, or is released therefrom for flood control, in excess of the current demand on project storage and which does not become usable water by storage in another reservoir; provided, that actual spill of usable water cannot occur until all credit water

shall have been spilled.

(q) "Hypothetical Spill" is the time in any year at which usable water would have spilled from project storage if seven hundred and ninety thousand (790,000) acre-feet had been released therefrom at rates proportional to the actual release in every year from the starting date to the end of the year in which hypothetical spill occurs; in computing hypothetical spill the initial condition shall be the amount of usable water in project storage at the beginning of the calendar year following the effective date of this Compact, and thereafter the initial condition shall be the amount of usable water in project storage at the beginning of the calendar year following each actual spill.

The Commission shall cause to be maintained and operated a stream gaging station equipped with an automatic water stage recorder at each of the following points, to wit:

#### Article II

- (a) On the Rio Grande near Del Norte above the principal points of diversion to the San Luis Valley;
- (b) On the Conejos River near Mogote;
- (c) On the Los Pinos River near Ortiz;
- (d) On the San Antonio River at Ortiz;

- (l) On the Rio Grande below Caballo Reservoir.

Similar gaging stations shall be maintained and operated below any other reservoir constructed after 1929, and at such other points as may be necessary for the securing of records required for the carrying out of the Compact; and automatic water stage recorders shall be maintained and operated on each of the reservoirs mentioned, and on all others constructed after 1929.

Such gaging stations shall be equipped, maintained, and operated by the Commission directly or in cooperation with an appropriate Federal or State agency, and the equipment, method and frequency of measurement at such stations shall be such as to produce reliable records at all times.

Article III

The obligation of Colorado to deliver water in the Rio Grande at the Colorado-New Mexico State Line, measured at or near Lobatos, in each calendar year, shall be ten thousand (10,000) acre-feet less than the sum of those quantities set forth in the two (2) following tabulations of relationship, which correspond to the quantities at the upper index stations:

(4) Rio Grande at Lobatos less Conejos at mouths is the total flow of the Rio Grande at the U.S.G.S. gaging station near Lobatos, less the discharge of Conejos River at its mouths, during the calendar year.

The application of these schedules shall be subject to the provisions hereinafter set forth and appropriate adjustments shall be made for (a) any change in location of gaging station; (b) any new or increased depletion of the runoff above inflow index gaging stations; and (c) any transmountain diversions into the drainage basin of the Rio Grande above Lobatos.

In any event any works are constructed after 1937 for the purpose of delivering water into the Rio Grande from the Closed Basin, Colorado shall not be credited with the amount of such water

delivered, unless the proportion of sodium ions shall be less than forty-five (45) percent of the total positive ions in that water when the total dissolved solids in such water exceeds three hundred and fifty (350) parts per million.

#### Article IV

The obligation of New Mexico to deliver water in the Rio Grande at San Marcial, during each calendar year, exclusive of the months of July, August, and September, shall be that quantity set forth in the following tabulation of relationship, which corresponds to the quantity at the upper index station:

Intermediate quantities shall be computed by proportional parts.

(5) The Otowi Index Supply is the recorded flow of the Rio Grande at the U.S.G.S. gaging station at Otowi Bridge near San Ildefonso (formerly station near Buckman) during the calendar year, exclusive of the flow during the months of July, August, and September, corrected for the operation of reservoirs constructed after 1929 in the drainage basin of the Rio Grande between Lobatos and Otowi Bridge.

(6) San Marcial Index Supply is the recorded flow of the Rio Grande at the gaging station at San Marcial during the calendar year exclusive of the flow during the months of July, August, and September.

The application of this schedule shall be subject to the provisions hereinafter set forth and appropriate adjustments shall be made for (a) any change in location of gaging stations; (b) depletion after 1929 in New Mexico at any time of the year of the natural runoff at Otowi Bridge; (c) depletion of the runoff during July, August, and September of tributaries between Otowi Bridge and San Marcial, by works constructed after 1937; and (d) any transmountain diversions into the Rio Grande between Lobatos and San Marcial.

Concurrent records shall be kept of the flow of the Rio Grande at San Marcial, near San Acacia, and of the release from Elephant Butte Reservoir, to the end that the records at these three (3) stations may be correlated.

#### Article V

If at any time it should be the unanimous finding and determination of the Commission that because of changed physical conditions, or for any other reason, reliable records are not obtainable, or cannot be obtained, at any of the stream gaging stations herein referred to, such stations may, with the unanimous approval of the Commission, be abandoned, and with such approval another station, or other stations, shall be established and new measurements shall be substituted which, in the unanimous opinion of the Commission, will result in substantially the same results, so far as the rights and obligations to deliver water are concerned, as would have existed if such substitution of stations and measurements had not been so made.

#### Article VI

Commencing with the year following the effective date of this Compact, all credits and debits of Colorado and New Mexico shall be

computed for each calendar year; provided, that in a year of actual spill no annual credits nor annual debits shall be computed for that year.

In the case of Colorado, no annual debit nor accrued debit shall exceed one hundred thousand (100,000) acre-feet, except as either or both may be caused by holdover storage water in reservoirs constructed after 1937 in the drainage basin of the Rio Grande above Lobatos. Within the physical limitations of storage capacity in such reservoirs, Colorado shall retain water in storage at all times to the extent of its accrued debit.

In the case of New Mexico, the accrued debit shall not exceed two hundred thousand (200,000) acre-feet at any time, except as such debit may be caused by holdover storage of water in reservoirs constructed after 1929 in the drainage basin of the Rio Grande between Lobatos and San Marcial. Within the physical limitations of storage capacity in such reservoirs, New Mexico shall retain water in storage at all times to the extent of its accrued debit. In computing the magnitude of accrued credits or debits, New Mexico shall not be charged with any greater debit in any one year than the sum of one hundred and fifty thousand (150,000) acre-feet and all gains in the quantity of water in storage in such year.

The Commission by unanimous action may authorize the release from storage of any amount of water which is then being held in storage by reason of accrued debits of Colorado or New Mexico; provided, that such water shall be replaced at the first opportunity thereafter.

In computing the amount of accrued credits and accrued debits of Colorado or New Mexico, any annual credits in excess of one hundred and fifty thousand (150,000) acre-feet shall be taken as equal to that amount.

In any year in which actual spill occurs, the accrued credits of Colorado or New Mexico, or both, at the beginning of the year shall be reduced in proportion to their respective credits by the amount of such actual spill; provided, that the amount of actual spill shall be deemed to be increased by the aggregate gain in the amount of water in storage, prior to the time of spill, in reservoirs above San Marcial constructed after 1929; provided, further, that if the Commissioners for the States having accrued credits authorize the release of part, or all, of such credits in advance of spill, the amount so released shall be deemed to constitute actual spill.

In any year in which there is actual spill of usable water, or at the time of hypothetical spill thereof, all accrued debits of Colorado or New Mexico, or both, at the beginning of the year shall be cancelled.

In any year in which the aggregate of accrued debits of Colorado and New Mexico exceeds the minimum unfilled capacity of project storage, such debits shall be reduced proportionally to an aggregate amount equal to such minimum unfilled capacity.

To the extent that accrued credits are impounded in reservoirs between San Marcial and Courchesne, and to the extent that accrued debits are impounded in reservoirs above San Marcial, such credits and debits shall be reduced annually to compensate for evaporation losses in the proportion that such credits or debits bore to the total amount of water in such reservoirs during the year.

#### Article VII

Neither Colorado nor New Mexico shall increase the amount of water in storage in reservoirs constructed after 1929 whenever there is less than four hundred thousand (400,000) acre-feet of usable water in project storage; provided, that if the actual releases of usable water from the beginning of the calendar year following the effective date of this Compact, or from the beginning of the calendar year following actual spill, have aggregated more than an average of seven hundred and ninety thousand (790,000) acre-feet per annum, the time at which such minimum stage is reached shall be adjusted to compensate for the difference between the total actual release and releases at such average rate; provided, further, that Colorado or New Mexico, or both, may relinquish accrued credits at any time, and Texas may accept such relinquished water, and in such event the State or States so relinquishing shall be entitled to store water in the amount of the water so relinquished.

#### Article VIII

During the month of January of any year the Commissioner for Texas may demand of Colorado and New Mexico, and the Commissioner for New Mexico may demand of Colorado, the release of water from storage reservoirs constructed after 1929 to the amount of the accrued debits of Colorado and New Mexico, respectively, and such releases shall be made by each at the greatest rate practicable under the conditions then prevailing, and in proportion to the total debit of each, and in amounts, limited by their accrued debits, sufficient to bring the quantity of usable water in project storage to six hundred thousand

(600,000) acre-feet by March 1st and to maintain this quantity in storage until April 30th, to the end that a normal release of seven hundred and ninety thousand (790,000) acre-feet may be made from project storage in that year.

#### Article IX

Colorado agrees with New Mexico that in event the United States or the State of New Mexico decides to construct the necessary works for diverting the waters of the San Juan River, or any of its tributaries, into the Rio Grande, Colorado hereby consents to the construction of said works and the diversion of waters from the San Juan River, or the tributaries thereof, into the Rio Grande in New Mexico, provided the present and prospective uses of water in Colorado by other diversions from the San Juan River, or its tributaries, are protected.

#### Article X

In the event water from another drainage basin shall be imported into the Rio Grand Basin by the United States or Colorado or New Mexico, or any of them jointly, the State having the right to the use of such water shall be given proper credit therefor in the application of the schedules.

#### Article XI

New Mexico and Texas agree that upon the effective date of this Compact all controversies between said States relative to the quantity or quality of the water of the Rio Grande are composed and settled; however, nothing herein shall be interpreted to prevent recourse by a signatory State to the Supreme Court of the United States for redress should the character or quality of the water, at the point of delivery, be changed hereafter by one signatory State to the injury of another. Nothing herein shall be construed as an admission by any signatory State that the use of water for irrigation causes increase of salinity for which the user is responsible in law.

#### Article XII

To administer the provisions of this Compact there shall be constituted a Commission composed of one representative from each State, to be known as the Rio Grande Compact Commission. The State Engineer of Colorado shall be ex-officio the Rio Grande Compact Commissioner for Colorado. The State Engineer of New Mexico shall be ex-officio the Rio Grande Compact Commissioner for New Mexico. The Rio Grande Compact Commissioner for Texas shall be appointed by the Governor of Texas. The President of the United States shall be

requested to designate a representative of the United States to sit with such Commission, and such Representative of the United States, if so designated by the President, shall act as Chairman of the Commission without vote.

The salaries and personal expenses of the Rio Grande Compact Commissioners for the three (3) States shall be paid by their respective States, and all other expenses incident to the administration of this Compact, not borne by the United States, shall be borne equally by the three (3) States.

In addition to the powers and duties hereinbefore specifically conferred upon such Commission and the Members thereof, the jurisdiction of such Commission shall extend only to the collection, correlation, and presentation of factual data and the maintenance of records having a bearing upon the administration of this Compact, and, by unanimous action, to the making of recommendations to the respective States upon matters connected with the administration of this Compact. In connection therewith, the Commission may employ such engineering and clerical aid as may be reasonably necessary within the limit of funds provided for that purpose by the respective States. Annual reports compiled for each calendar year shall be made by the Commission and transmitted to the Governors of the signatory States on or before March 1st following the year covered by the report. The Commission may, by unanimous action, adopt rules and regulations consistent with the provisions of this Compact to govern their proceedings.

The findings of the Commission shall not be conclusive in any Court or tribunal which may be called upon to interpret or enforce this Compact.

#### Article XIII

At the expiration of every five-year period after the effective date of this Compact, the Commission may, by unanimous consent, review any provisions hereof which are not substantive in character and which do not affect the basic principles upon which the Compact is founded, and shall meet for the consideration of such questions on the request of any member of the Commission; provided, however, that the provisions hereof shall remain in full force and effect until changed and amended within the intent of the Compact by unanimous action of the Commissioners, and until any changes in this Compact are ratified by the Legislatures of the respective States and consented to by the Congress, in the same manner as this Compact is

required to be ratified to become effective.

Article XIV

The schedules herein contained and the quantities of water herein allocated shall never be increased nor diminished by reason of any increase or diminution in the delivery or loss of water to Mexico.

Article XV

The physical and other conditions characteristic of the Rio Grande and peculiar to the territory drained and served thereby, and to the development thereof, have actuated this Compact and none of the signatory States admits that any provisions herein contained establishes any general principle or precedent applicable to other interstate streams.

Article XVI

Nothing in this Compact shall be construed as affecting the obligations of the United States of America to Mexico under existing treaties, or to the Indian Tribes, or as impairing the Rights of the Indian Tribes.

Article XVII

This Compact shall become effective when ratified by the Legislatures of each of the signatory States and consented to by the Congress of the United States. Notice of ratification shall be given by the Governor of each State to the Governors of the other States and to the President of the United States, and the President of the United States is requested to give notice to the Governors of each of the signatory States of the consent of the Congress of the United States.

IN WITNESS WHEREOF, The Commissioners have signed this Compact in quadruplicate original, one of which shall be deposited in the archives of the Department of State of the United States of America and shall be deemed the authoritative original, and of which a duly certified copy shall be forwarded to the Governor of each of the signatory States.

Done at the City of Sante Fe, in the State of New Mexico, on the 18th day of March, in the year of our Lord, One Thousand Nine Hundred and Thirty-eight.

Sec. 42.010. TEXT OF COMPACT. The Pecos River Compact reads as follows:

PECOS RIVER COMPACT  
Entered Into by the States of  
NEW MEXICO  
and  
TEXAS

Santa Fe, New Mexico  
December 3, 1948

PECOS RIVER COMPACT

The State of New Mexico and the State of Texas, acting through their Commissioners, John H. Bliss for the State of New Mexico and Charles H. Miller for the State of Texas, after negotiations participated in by Berkeley Johnson, appointed by the President as the representative of the United States of America, have agreed respecting the uses, apportionment and deliveries of the water of the Pecos River as follows:

Article I

The major purposes of this Compact are to provide for the equitable division and apportionment of the use of the waters of the Pecos River; to promote interstate comity; to remove causes of present and future controversies; to make secure and protect present development within the states; to facilitate the construction of

works for, (a) the salvage of water, (b) the more efficient use of water, and (c) the protection of life and property from floods.

## Article II

As used in this Compact:

(a) The term "Pecos River" means the tributary of the Rio Grande which rises in north-central New Mexico and flows in a southerly direction through New Mexico and Texas and joins the Rio Grande near the town of Langtry, Texas, and includes all tributaries of said Pecos River.

(b) The term "Pecos River Basin" means all of the contributing drainage area of the Pecos River and its tributaries above its mouth near Langtry, Texas.

(c) "New Mexico" and "Texas" mean the State of New Mexico and the State of Texas, respectively; "United States" means the United States of America.

(d) The term "Commission" means the agency created by this Compact for the administration thereof.

(e) The term "deplete by man's activities" means to diminish the stream flow of the Pecos River at any given point as the result of beneficial consumptive uses of water within the Pecos River Basin above such point. For the purposes of this Compact it does not include the diminution of such flow by encroachment of salt cedars or other like growth, or by deterioration of the channel of the stream.

(f) The term "Report of the Engineering Advisory Committee" means that certain report of the Engineering Advisory Committee dated January, 1948, and all appendices thereto; including, basic data, processes, and analyses utilized in preparing that report, all of which were reviewed, approved, and adopted by the Commissioners signing this Compact at a meeting held in Santa Fe, New Mexico, on December 3, 1948, and which are included in the Minutes of that meeting.

(g) The term "1947 condition" means that situation in the Pecos River Basin as described and defined in the Report of the Engineering Advisory Committee. In determining any question of fact hereafter arising as to such situation, reference shall be made to, and decisions shall be based on, such report.

(h) The term "water salvaged" means that quantity of water which may be recovered and made available for beneficial use and which quantity of water under the 1947 condition was non-beneficially consumed by natural processes.

(i) The term "unappropriated flood waters" means water originating in the Pecos River Basin above Red Bluff Dam in Texas, the impoundment of which will not deplete the water usable by the storage and diversion facilities existing in either state under the 1947 condition and which if not impounded will flow past Girvin, Texas.

#### Article III

(a) Except as stated in paragraph (f) of this Article, New Mexico shall not deplete by man's activities the flow of the Pecos River at the New Mexico-Texas state line below an amount which will give to Texas a quantity of water equivalent to that available to Texas under the 1947 condition.

(b) Except as to the unappropriated flood waters thereof, the apportionment of which is included in and provided for by paragraph (f) of this Article, the beneficial consumptive use of the waters of the Delaware River is hereby apportioned to Texas, and the quantity of such beneficial consumptive use shall be included in determining waters received under the provisions of paragraph (a) of this Article.

(c) The beneficial consumptive use of water salvaged in New Mexico through the construction and operation of a project or projects by the United States or by joint undertakings of Texas and New Mexico, is hereby apportioned forty-three per cent (43%) to Texas and fifty-seven per cent (57%) to New Mexico.

(d) Except as to water salvaged, apportioned in paragraph (c) of this Article, the beneficial consumptive use of water which shall be non-beneficially consumed, and which is recovered, is hereby apportioned to New Mexico but not to have the effect of diminishing the quantity of water available to Texas under the 1947 condition.

(e) Any water salvaged in Texas is hereby apportioned to Texas.

(f) Beneficial consumptive use of unappropriated flood waters is hereby apportioned fifty per cent (50%) to Texas and fifty per cent (50%) to New Mexico.

#### Article IV

(a) New Mexico and Texas shall cooperate to support legislation for the authorization and construction of projects to eliminate nonbeneficial consumption of water.

(b) New Mexico and Texas shall cooperate with agencies of the United States to devise and effectuate means of alleviating the salinity conditions of the Pecos River.

(c) New Mexico and Texas each may:

(i) Construct additional reservoir capacity to replace reservoir capacity made unusable by any cause.

(ii) Construct additional reservoir capacity for the utilization of water salvaged and unappropriated flood waters apportioned by this Compact to such state.

(iii) Construct additional reservoir capacity for the purpose of making more efficient use of water apportioned by this Compact to such state.

(d) Neither New Mexico nor Texas will oppose the construction of any facilities permitted by this Compact, and New Mexico and Texas will cooperate to obtain the construction of facilities that will be of joint benefit to the two states.

(e) The Commission may determine the conditions under which Texas may store water in works constructed in and operated by New Mexico.

(f) No reservoir shall be constructed and operated in New Mexico above Avalon Dam for the sole benefit of Texas unless the Commission shall so determine.

(g) New Mexico and Texas each has the right to construct and operate works for the purpose of preventing flood damage.

(h) All facilities shall be operated in such manner as to carry out the terms of this Compact.

#### Article V

(a) There is hereby created an interstate administrative agency to be known as the "Pecos River Commission." The Commission shall be composed of one Commissioner representing each of the states of New Mexico and Texas, designated or appointed in accordance with the laws of each such state, and, if designated by the President, one Commissioner representing the United States. The President is hereby requested to designate such a Commissioner. If so designated, the Commissioner representing the United States shall be the presiding officer of the Commission, but shall not have the right to vote in any of the deliberations of the Commission. All members of the Commission must be present to constitute a quorum.

(b) The salaries and personal expenses of each Commissioner shall be paid by the government which he represents. All other expenses which are incurred by the Commission incident to the administration of this Compact and which are not paid by the United States shall be borne equally by the two states. On or before

November 1 of each even numbered year the Commission shall adopt and transmit to the Governors of the two states and to the President a budget covering an estimate of its expenses for the following two years. The payment of the expenses of the Commission and of its employees shall not be subject to the audit and accounting procedures of either of the two states. However, all receipts and disbursements of funds handled by the Commission shall be audited yearly by a qualified independent public accountant and the report of the audit shall be included in, and become a part of, the annual report of the Commission.

(c) The Commission may appoint a secretary who, while so acting, shall not be an employee of either state. He shall serve for such term, receive such salary, and perform such duties as the Commission may direct. The Commission may employ such engineering, legal, clerical, and other personnel as in its judgment may be necessary for the performance of its functions under this Compact. In the hiring of employees the Commission shall not be bound by the civil service laws of either state.

(d) The Commission, so far as consistent with this Compact, shall have power to:

1. Adopt rules and regulations;
2. Locate, establish, construct, operate, maintain, and abandon water gaging stations, independently or in cooperation with appropriate governmental agencies;
3. Engage in studies of water supplies of the Pecos River and its tributaries, independently or in cooperation with appropriate governmental agencies;
4. Collect, analyze, correlate, preserve and report on data as to the stream flows, storage, diversions, salvage, and use of the waters of the Pecos River and its tributaries, independently or in cooperation with appropriate governmental agencies;
5. Make findings as to any change in depletion by man's activities in New Mexico, and on the Delaware River in Texas;
6. Make findings as to the deliveries of water at the New Mexico-Texas state line;
7. Make findings as to the quantities of water salvaged and the amount thereof delivered at the New Mexico-Texas state line;
8. Make findings as to quantities of water non-beneficially consumed in New Mexico;
9. Make findings as to quantities of unappropriated flood

waters;

10. Make findings as to the quantities of reservoir losses from reservoirs constructed in New Mexico which may be used for the benefit of both states, and as to the share thereof charged under Article VI hereof to each of the states;

11. Acquire and hold such personal and real property as may be necessary for the performance of its duties hereunder and to dispose of the same when no longer required;

12. Perform all functions required of it by this Compact and do all things necessary, proper or convenient in the performance of its duties hereunder, independently or in cooperation with appropriate governmental agencies;

13. Make and transmit annually to the Governors of the signatory states and to the President of the United States on or before the last day of February of each year, a report covering the activities of the Commission for the preceding year.

(e) The Commission shall make available to the Governor of each of the signatory states any information within its possession at any time, and shall always provide free access to its records by the Governors of each of the States, or their representatives, or authorized representatives of the United States.

(f) Findings of fact made by the Commission shall not be conclusive in any court, or before any agency or tribunal, but shall constitute prima facie evidence of the facts found.

(g) The organization meeting of the Commission shall be held within four months from the effective date of this Compact.

#### Article VI

The following principles shall govern in regard to the apportionment made by Article III of this Compact:

(a) The Report of the Engineering Advisory Committee, supplemented by additional data hereafter accumulated, shall be used by the Commission in making administrative determinations.

(b) Unless otherwise determined by the Commission, depletions by man's activities, state-line flows, quantities of water salvaged, and quantities of unappropriated flood waters shall be determined on the basis of three-year periods reckoned in continuing progressive series beginning with the first day of January next succeeding the ratification of this Compact.

(c) Unless and until a more feasible method is devised and adopted by the Commission the inflow-outflow method, as described in

the Report of the Engineering Advisory Committee, shall be used to:

(i) Determine the effect on the state-line flow of any change in depletions by man's activities or otherwise, of the waters of the Pecos River in New Mexico.

(ii) Measure at or near the Avalon Dam in New Mexico the quantities of water salvaged.

(iii) Measure at or near the state line any water released from storage for the benefit of Texas as provided for in subparagraph (d) of this Article.

(iv) Measure the quantities of unappropriated flood waters apportioned to Texas which have not been stored and regulated by reservoirs in New Mexico.

(v) Measure any other quantities of water required to be measured under the terms of this Compact which are susceptible of being measured by the inflow-outflow method.

(d) If unappropriated flood waters apportioned to Texas are stored in facilities constructed in New Mexico, the following principles shall apply:

(i) In case of spill from a reservoir constructed in and operated by New Mexico, the water stored to the credit of Texas will be considered as the first water to spill.

(ii) In case of spill from a reservoir jointly constructed and operated, the water stored to the credit of either state shall not be affected.

(iii) Reservoir losses shall be charged to each state in proportion to the quantity of water belonging to that state in storage at the time the losses occur.

(iv) The water impounded to the credit of Texas shall be released by New Mexico on the demand of Texas.

(e) Water salvaged shall be measured at or near the Avalon Dam in New Mexico and to the quantity thereof shall be added a quantity equal to the quantity of salvaged water depleted by man's activities above Avalon Dam. The quantity of water salvaged that is apportioned to Texas shall be delivered by New Mexico at the New Mexico-Texas state line. The quantity of unappropriated flood waters impounded under paragraph (d) of this Article, when released shall be delivered by New Mexico at the New Mexico-Texas state line in the quantity released less channel losses. The unappropriated flood waters apportioned to Texas by this Compact that are not impounded in reservoirs in New Mexico shall be measured and delivered at the New

Mexico-Texas state line.

(f) Beneficial use shall be the basis, the measure, and the limit of the right to use water.

#### Article VII

In the event of importation of water by man's activities to the Pecos River Basin from any other river basin the state making the importation shall have the exclusive use of such imported water.

#### Article VIII

The provisions of this Compact shall not apply to, or interfere with, the right or power of either signatory state to regulate within its boundaries the appropriation, use and control of water, not inconsistent with its obligations under this Compact.

#### Article IX

In maintaining the flows at the New Mexico-Texas state line required by this Compact, New Mexico shall in all instances apply the principle of prior appropriation within New Mexico.

#### Article X

The failure of either state to use the water, or any part thereof, the use of which is apportioned to it under the terms of this Compact, shall not constitute a relinquishment of the right to such use, nor shall it constitute a forfeiture or abandonment of the right to such use.

#### Article XI

Nothing in this Compact shall be construed as:

(a) Affecting the obligations of the United States under the Treaty with the United Mexican States (Treaty Series 994);

(b) Affecting any rights or powers of the United States, its agencies or instrumentalities, in or to the waters of the Pecos River, or its capacity to acquire rights in and to the use of said waters;

(c) Subjecting any property of the United States, its agencies or instrumentalities, to taxation by any state or subdivision thereof, or creating any obligation on the part of the United States, its agencies or instrumentalities, by reason of the acquisition, construction or operation of any property or works of whatever kind, to make any payment to any state or political subdivision thereof, state agency, municipality or entity whatsoever, in reimbursement for the loss of taxes;

(d) Subjecting any property of the United States, its agencies or instrumentalities, to the laws of any state to an extent other

than the extent to which such laws would apply without regard to this Compact.

#### Article XII

The consumptive use of water by the United States or any of its agencies, instrumentalities or wards shall be charged as a use by the state in which the use is made; provided, that such consumptive use incident to the diversion, impounding, or conveyance of water in one state for use in the other state shall be charged to such latter state.

#### Article XIII

This Compact shall not be construed as establishing any general principle or precedent applicable to other interstate streams.

#### Article XIV

This Compact may be terminated at any time by appropriate action of the legislatures of both of the signatory states. In the event of such termination, all rights established under it shall continue unimpaired.

#### Article XV

This Compact shall become binding and obligatory when it shall have been ratified by the legislature of each State and approved by the Congress of the United States. Notice of ratification by the legislature of each State shall be given by the Governor of that State to the Governor of the other State and to the President of the United States, and the President is hereby requested to give notice to the Governor of each State of approval by the Congress of the United States.

In Witness Whereof, the Commissioners have executed three counterparts hereof each of which shall be and constitute an original, one of which shall be deposited in the archives of the Department of State of the United States, and one of which shall be forwarded to the Governor of each State.

#### CANADIAN RIVER COMPACT

The State of New Mexico, the State of Texas, and the State of Oklahoma, acting through their Commissioners, John H. Bliss for the State of New Mexico, E.V. Spence for the State of Texas, and Clarence Burch for the State of Oklahoma, after negotiations participated in by Berkeley Johnson, appointed by the President as the representative of the United States of America, have agreed respecting Canadian River as follows:

#### Article I

The major purposes of this Compact are to promote interstate comity; to remove causes of present and future controversy; to make secure and protect present developments within the States; and to provide for the construction of additional works for the conservation of the waters of Canadian River.

#### Article II

River which rises in northeastern New Mexico and flows in an easterly direction through New Mexico, Texas and Oklahoma and includes North Canadian River and all other tributaries of said Canadian River.

(b) The term "North Canadian River" means that major tributary of Canadian River officially known as North Canadian River from its source to its junction with Canadian River and includes all tributaries of North Canadian River.

(c) The term "Commission" means the agency created by this Compact for the administration thereof.

(d) The term "conservation storage" means that portion of the capacity of reservoirs available for the storage of water for subsequent release for domestic, municipal, irrigation and industrial uses, or any of them, and it excludes any portion of the capacity of reservoirs allocated solely to flood control, power production and sediment control, or any of them.

#### Article III

All rights to any of the waters of Canadian River which have been perfected by beneficial use are hereby recognized and affirmed.

#### Article IV

(a) New Mexico shall have free and unrestricted use of all waters originating in the drainage basin of Canadian River above Conchas Dam.

(b) New Mexico shall have free and unrestricted use of all waters originating in the drainage basin of Canadian River in New Mexico below Conchas Dam, provided that the amount of conservation storage in New Mexico available for impounding these waters which originate in the drainage basin of Canadian River below Conchas Dam shall be limited to an aggregate of two hundred thousand (200,000) acre-feet.

(c) The right of New Mexico to provide conservation storage in the drainage basin of North Canadian River shall be limited to the storage of such water as at the time may be unappropriated under the laws of New Mexico and of Oklahoma.

#### Article V

Texas shall have free and unrestricted use of all waters of Canadian River in Texas, subject to the limitations upon storage of water set forth below:

(a) The right of Texas to impound any of the waters of North Canadian River shall be limited to storage on tributaries of said River in Texas for municipal uses, for household and domestic uses,

livestock watering, and the irrigation of lands which are cultivated solely for the purpose of providing food and feed for the householders and domestic livestock actually living or kept on the property.

(b) Until more than three hundred thousand (300,000) acre-feet of conservation storage shall be provided in Oklahoma, exclusive of reservoirs in the drainage basin of North Canadian River and exclusive of reservoirs in the drainage basin of Canadian River east of the 97th meridian, the right of Texas to retain water in conservation storage, exclusive of waters of North Canadian River, shall be limited to five hundred thousand (500,000) acre-feet; thereafter the right of Texas to impound and retain such waters in storage shall be limited to an aggregate quantity equal to two hundred thousand (200,000) acre-feet plus whatever amount of water shall be at the same time in conservation storage in reservoirs in the drainage basin of Canadian River in Oklahoma, exclusive of reservoirs in the drainage basin of North Canadian River and exclusive of reservoirs east of the 97th meridian; and for the purpose of determining the amount of water in conservation storage, the maximum quantity of water in storage following each flood or series of floods shall be used; provided, that the right of Texas to retain and use any quantity of water previously impounded shall not be reduced by any subsequent application of the provisions of this paragraph (b).

(c) Should Texas for any reason impound any amount of water greater than the aggregate quantity specified in paragraph (b) of this Article, such excess shall be retained in storage until under the provisions of said paragraph Texas shall become entitled to its use; provided, that, in event of spill from conservation storage, any such excess shall be reduced by the amount of such spill from the most easterly reservoir on Canadian River in Texas; provided further, that all such excess quantities in storage shall be reduced monthly to compensate for reservoir losses in proportion to the total amount of water in the reservoir or reservoirs in which such excess water is being held; and provided further that on demand by the Commissioner for Oklahoma the remainder of any such excess quantity of water in storage shall be released into the channel of Canadian River at the greatest rate practicable.

(b) Subjecting any property of the United States, its agencies or instrumentalities, to taxation by any State or subdivision thereof, or creating any obligation on the part of the United States, its agencies or instrumentalities, by reason of the acquisition, construction or operation of any property or works of whatever kind,

to make any payment to any State or political subdivision thereof, state agency, municipality or entity whatsoever, in reimbursement for the loss of taxes;

(c) Subjecting any property of the United States, its agencies or instrumentalities, to the laws of any State to an extent other than the extent to which such laws would apply without regard to this Compact;

(e) Establishing any general principle or precedent applicable to other interstate streams.

For Texas:

Henry L. Woodworth,  
Interstate Compact  
Commissioner for Texas;  
and John W. Simmons,  
President of the Sabine  
River Authority of Texas;

For Louisiana:

Roy T. Sessums, Director of  
the Department of Public  
Works of the State of

and consent to negotiate and enter into the said Compact having been granted by Act of the Congress of the United States approved November 1, 1951 (Public Law No. 252; 82nd Congress, First Session), and pursuant thereto the President having designated Louis W. Prentiss as the representative of the United States, the said representatives for Texas and Louisiana, after negotiations participated in by the representative of the United States, have for such Compact agreed upon Articles as hereinafter set forth. The major purposes of this Compact are to provide for an equitable apportionment between the States of Louisiana and Texas of the waters of the Sabine River and its tributaries, thereby removing the causes of present and future controversy between the States over the conservation and utilization of said waters; to encourage the development, conservation and utilization of the water resources of the Sabine River and its tributaries; and to establish a basis for cooperative planning and action by the States for the construction, operation and maintenance of projects for water conservation and utilization purposes on that reach of the Sabine River touching both States, and for apportionment of the benefits therefrom.

## ARTICLE I

As used in this Compact:

(a) The word "Stateline" means the point on the Sabine River where its waters in downstream flow first touch the States of both Louisiana and Texas.

(b) The term "waters of the Sabine River" means the waters either originating in the natural drainage basin of the Sabine River, or appearing as streamflow in said River and its tributaries, from its headwater source down to the mouth of the River where it enters into Sabine Lake.

(c) The term "Stateline flow" means the flow of waters of the Sabine River as determined by the Logansport gauge located on the U.S. Highway 84, approximately four (4) river miles downstream from the Stateline. This flow, or the flow as determined by such substitute gauging station as may be established by the Administration, as hereinafter defined, pursuant to the provisions of Article VII of this Compact, shall be deemed the actual Stateline flow.

(d) The term "Stateline reach" means that portion of the Sabine River lying between the Stateline and Sabine Lake.

(e) The term "the Administration" means the Sabine River

Compact Administration established under Article VII.

(f) The term "Domestic use" means the use of water by an individual, or by a family unit or household for drinking, cooking, laundering, sanitation and other personal comforts and necessities; and for the irrigation of an area not to exceed one acre, obtained directly from the Sabine River or its tributaries by an individual or family unit, not supplied by a water company, water district or municipality.

(g) The term "stock water use" means the use of water for any and all livestock and poultry.

(h) The term "consumptive use" means use of water resulting in its permanent removal from the stream.

(i) The terms "domestic" and "stock water" reservoir mean any reservoir for either or both of such uses having a storage capacity of fifty (50) acre feet or less.

(j) "Stored water" means water stored in reservoirs (exclusive of domestic or stock water reservoirs) or water withdrawn or released from reservoirs for specific uses and the identifiable return flow from such uses.

(k) The term "free water" means all waters other than "stored waters" in the Stateline reach including, but not limited to, that appearing as natural stream flow and not withdrawn or released from a reservoir for specific uses. Waters released from reservoirs for the purpose of maintaining stream flows as provided in Article V, shall be "free water". All reservoir spills or releases of stored waters made in anticipation of spills, shall be free water.

(l) Where the name of the State or the term "State" is used in this Compact, it shall be construed to include any person or entity of any nature whatsoever of the States of Louisiana or Texas using, claiming, or in any manner asserting any right to the use of the waters of the Sabine River under the authority of that State.

(m) Wherever any State or Federal official or agency is referred to in this Compact, such reference shall apply equally to the comparable official or agency succeeding to their duties and functions.

## ARTICLE II

Subject to the provisions of Article X, nothing in this Compact shall be construed as applying to, or interfering with, the right or power of either signatory State to regulate within its boundaries the appropriation, use and control of water, not inconsistent with its

obligation under this Compact.

#### ARTICLE III

Subject to the provisions of Article X, all rights to any of the waters of the Sabine River which have been obtained in accordance with the laws of the States are hereby recognized and affirmed; provided, however, that withdrawals, from time to time, for the satisfaction of such rights, shall be subject to the availability of supply in accordance with the apportionment of water provided under the terms of this Compact.

#### ARTICLE IV

Texas shall have free and unrestricted use of all waters of the Sabine River and its tributaries above the Stateline subject, however, to the provisions of Articles V and X.

#### ARTICLE V

Texas and Louisiana hereby agree upon the following apportionment of the waters of the Sabine River:

(a) All free water in the Stateline reach shall be divided equally between the two States, this division to be made without reference to the origin.

(b) The necessity of maintaining a minimum flow at the Stateline for the benefit of water users below the Stateline in both States is recognized, and to this end it is hereby agreed that:

(1) Reservoirs and permits above the Stateline existing as of January 1, 1953 shall not be liable for maintenance of the flow at the Stateline.

(2) After January 1, 1953, neither State shall permit or authorize any additional uses which would have the effect of reducing the flow at the Stateline to less than 36 cubic feet per second.

(3) Reservoirs on which construction is commenced after January 1, 1953, above the Stateline shall be liable for their share of water necessary to provide a minimum flow at the Stateline of 36 cubic feet per second; provided, that no reservoir shall be liable for a greater percentage of this minimum flow than the percentage of the drainage area above the Stateline contributing to that reservoir, exclusive of the watershed of any reservoir on which construction was started prior to January 1, 1953. Water released from Texas' reservoirs to establish the minimum flow of 36 cubic feet per second, shall be classed as free water at the Stateline and divided equally between the two States.

(c) The right of each State to construct impoundment reservoirs

and other works of improvement on the Sabine River or its tributaries located wholly within its boundaries is hereby recognized.

(d) In the event that either State constructs reservoir storage on the tributaries below Stateline after January 1, 1953, there shall be deducted from that State's share of the flow in the Sabine River all reductions in flow resulting from the operation of the tributary storage and conversely such State shall be entitled to the increased flow resulting from the regulation provided by such storage.

(e) Each State shall have the right to use the main channel of the Sabine River to convey water stored on the Sabine River or its tributaries located wholly within its boundaries, downstream to a desired point of removal without loss of ownership of such stored waters. In the event that such water is released by a State through the natural channel of a tributary and the channel of the Sabine River to a downstream point of removal, a reduction shall be made in the amount of water which can be withdrawn at the point of removal equal to the transmission losses.

(f) Each State shall have the right to withdraw its share of the water from the channel of the Sabine River in the Stateline reach in accordance with Article VII. Neither State shall withdraw at any point more than its share of the flow at that point except, that pursuant to findings and determination of the Administration as provided under Article VII of this Compact, either State may withdraw more or less of its share of the water at any point providing that its aggregate withdrawal shall not exceed its total share. Withdrawals made pursuant to this paragraph shall not prejudice or impair the existing rights of users of Sabine River waters.

(g) Waters stored in reservoirs constructed by the States in the Stateline reach shall be shared by each State in proportion to its contribution to the cost of storage. Neither State shall have the right to construct a dam on the Stateline reach without the consent of the other State.

(h) Each State may vary the rate and manner of withdrawal of its share of such jointly stored waters on the Stateline reach, subject to meeting the obligations for amortization of the cost of the joint storage. In any event, neither State shall withdraw more than its prorata share in any one year (a year meaning a water year, October 1st to September 30th) except by authority of the Administration. All jointly stored water remaining at the end of a water year shall be reapportioned between the States in the same

proportion as their contribution to the cost of the storage.

(i) Except for jointly stored water, as provided in (h) above, each State must use its apportionment of the natural stream flows as they occur and there shall be no allowance of accumulation of credits or debits for or against either State. The failure of either State to use the stream flow or any part thereof, the use of which is apportioned to it under the terms of this Compact, shall not constitute a relinquishment of the right to such use in the future; conversely, the failure of either State to use the water at the time it is available does not give it the right to the flow in excess of its share of the flow at any other time.

(j) From the apportionment of waters of the Sabine River as defined in this Article, there shall be excluded from such apportionment all waters consumed in either State for domestic and stock water uses. Domestic and stock water reservoirs shall be so excluded.

(k) Each State may use its share of the water apportioned to it in any manner that may be deemed beneficial by that State.

#### ARTICLE VI

(a) The States through their respective appropriate agencies or subdivisions may construct jointly, or cooperate with any agency or instrumentality of the United States in the construction of works on the Stateline reach for the development, conservation and utilization for all beneficial purposes of the waters of the Sabine River.

(b) All monetary revenues growing out of any joint State ownership, title and interest in works constructed under Section (a) above, and accruing to the States in respect thereof, shall be divided between the States in proportion to their respective contributions to the cost of construction; provided however, that each State shall retain undivided all its revenues from recreational facilities within its boundaries incidental to the use of the waters of the Sabine River, and from its severally State-owned recreational facilities constructed appurtenant thereto.

(c) All operation and maintenance costs chargeable against any State ownership, title and interest in works constructed under Section (a) above, shall be assessed in proportion to the contribution of each State to the original cost of construction.

#### ARTICLE VII

(a) There is hereby created an interstate administrative agency to be designated as the "Sabine River Compact Administration" herein

referred to as "the Administration".

(b) The Administration shall consist of two members from each State and of one member as representative of the United States, chosen by the President of the United States, who is hereby requested to appoint such a representative. The United States member shall be ex-officio chairman of the Administration without vote and shall not be a domiciliary of or reside in either State. The appointed members for Texas and Louisiana shall be designated within thirty days after the effective date of this Compact.

(c) The Texas members shall be appointed by the Governor for a term of six years; provided, however, that one of the original Texas members shall be appointed for a term to establish a half-term interval between the expiration dates of the terms of such members, and thereafter one such member shall be appointed each three (3) years for the regular term. The Louisiana members shall be residents of the Sabine Watershed and shall be appointed by the Governor for a term of four years, which shall run concurrent with the term of the Governor. Each state member shall hold office subject to the laws of his state or until his successor has been duly appointed and qualified.

(d) Interim vacancy, for whatever cause, in the office of any member of the Administration shall be filled for the unexpired term in the same manner as hereinabove provided for regular appointment.

(e) Within sixty days after the effective date of this Compact, the Administration shall meet and organize. A quorum for any meeting shall consist of three voting members of the Administration. Each State member shall have one vote, and every decision, authorization, determination, order or other action shall require the concurring votes of at least three members.

(f) The Administration shall have power to:

(1) Adopt, amend and revoke by-laws, rules and regulations, and prescribe procedures for administration of and consistent with the provisions of this Compact;

(2) Fix and determine from time to time the location of the Administration's principal office;

(3) Employ such engineering, legal, clerical and other personnel, without regard to the civil service laws of either State, as the Administration may determine necessary or proper to supplement State-furnished assistance as hereinafter provided, for the performance of its functions under this Compact; provided, that such

employees shall be paid by and be responsible to the Administration and shall not be considered to be employees of either State;

(4) Procure such equipment, supplies and technical assistance as the Administration may determine to be necessary or proper to supplement State-furnished assistance as hereinafter provided, for the performance of its functions under this Compact;

(5) Adopt a seal which shall be judicially recognized.

(g) In cooperation with the chief official administering water rights in each State and with appropriate Federal agencies, the Administration shall have and perform powers and duties as follows:

(1) To collect, analyze, correlate, compile and report on data as to water supplies, stream flows, storage, diversions, salvage and use of the waters of the Sabine River and its tributaries, and as to all factual data necessary or proper for the administration of this Compact;

(2) To designate as official stations for the administration of this Compact such existing water gauging stations (and to operate, maintain, repair and abandon the same), and to locate, establish, construct, operate, maintain, repair and abandon additional such stations, as the Administration may from time to time find and determine necessary or appropriate;

(3) To make findings as to the deliveries of water at Stateline as hereinabove provided, from the stream-flow records of the Stateline gauge which shall be operated and maintained by the Administration or in cooperation with the appropriate Federal agency, for determination of the actual Stateline flow unless the Administration shall find and determine that, because of changed physical conditions or for any other reason, reliable records are not obtainable thereat; in which case such existing Stateline station may with the approval of the Administration be abandoned and, with such approval, a substitute Stateline station established in lieu thereof;

(4) To make findings as to the quantities of reservoir storage (including joint storage) and releases therefrom, diversions, transmission losses and as to incident stream-flow changes, and as to the share of such quantities chargeable against or allocable to the respective States;

(5) To record and approve all points of diversion at which water is to be removed from the Sabine River or its tributaries below the Stateline; provided that, in any case, the State agency charged

with the administration of the water laws for the State in which such point of diversion is located shall first have approved such point for removal or diversion; provided further, that any such point of removal or diversion once jointly approved by the appropriate State agency and the Administration, shall not thereafter be changed without the joint amendatory approval of such State agency and the Administration;

(6) To require water users at their expense to install and maintain measuring devices of approved type in any ditch, pumping station or other water diversion works on the Sabine River or its tributaries below the Stateline, as the Administration may determine necessary or proper for the purposes of this Compact; provided that the chief official of each State charged with the administration of water rights therein shall supervise the execution and enforcement of the Administration's requirements for such measuring devices;

(7) To investigate any violation of this Compact and to report findings and recommendations thereon to the chief official of the affected State charged with the administration of water rights, or to the Governor of such State as the Administration may deem proper;

(8) To acquire, hold, occupy and utilize such personal and real property as may be necessary or proper for the performance of its duties and functions under this Compact;

(9) To perform all functions required of the Administration by this Compact, and to do all things necessary, proper or convenient in the performance of its duties hereunder.

(h) Each State shall provide such available facilities, supplies, equipment, technical information and other assistance as the Administration may require to carry out its duties and function, and the execution and enforcement of the Administration's orders shall be the responsibility of the agents and officials of the respective States charged with the administration of water rights therein. State officials shall furnish pertinent factual and technical data to the Administration upon its request.

(i) Findings of fact made by the Administration shall not be conclusive in any court or before any agency or tribunal but shall constitute prima facie evidence of such facts.

(j) In the case of a tie vote on any of the Administration's determinations, orders or other actions subject to arbitration, then arbitration shall be a condition precedent to any right of legal

action. Either side of a tie vote may, upon request, submit the question to arbitration. If there shall be arbitration, there shall be three arbitrators: one named in writing by each side, and the third chosen by the two arbitrators so elected. If the arbitrators fail to select a third within ten days, then he shall be chosen by the Representative of the United States.

(k) The salaries, if any, and the personal expenses of each member of the Administration, shall be paid by the Government which he represents. All other expenses incident to the administration of this Compact and which are not paid by the United States shall be borne equally by the States. Ninety days prior to the Regular Session of the Legislature of either State, the Administration shall adopt and transmit to the Governor of such State for his approval, its budget covering anticipated expenses for the forthcoming biennium and the amount thereof payable by such State. Upon approval by its Governor, each State shall appropriate and pay the amount due by it to the Administration. The Administration shall keep accurate accounts of all receipts and disbursements and shall include a statement thereof, together with a certificate of audit by a certified public accountant, in its annual report. Each State shall have the right to make an examination and audit of the accounts of the Administration at any time.

(l) The Administration shall, whenever requested, provide access to its records by the Governor of either State or by the chief official of either State charged therein with the administration of water rights. The Administration shall annually on or before January 15th of each year make and transmit to the Governors of the signatory States, and to the President of the United States, a report of the Administration's activities and deliberations for the preceding year.

#### ARTICLE VIII

(a) This Compact shall become effective when ratified by the Legislature and approved by the Governors of both States and when approved by the Congress of the United States.

(b) The provisions of this Compact shall remain in full force and effect until modified, altered or amended, or in the same manner as hereinabove required for ratification thereof. The right so to modify, alter or amend this Compact is expressly reserved. This Compact may be terminated at any time by mutual consent of the signatory States. In the event this Compact is terminated as herein provided, all rights then vested hereunder shall continue unimpaired.

(c) Should a court of competent jurisdiction hold any part of this Compact to be contrary to the constitution of any signatory State or of the United States of America, all other severable provisions of this Compact shall continue in full force and effect.

## ARTICLE IX

This Compact is made and entered into for the sole purpose of effecting an equitable apportionment and providing beneficial uses of the waters of the Sabine River, its tributaries and its watershed, without regard to the boundary between Louisiana and Texas, and nothing herein contained shall be construed as an admission on the part of either State or any agency, commission, department or subdivision thereof, respecting the location of said boundary; and neither this Compact nor any data compiled for the preparation or administration thereof shall be offered, admitted or considered in evidence, in any dispute, controversy, or litigation bearing upon the matter of the location of said boundary.

The term "Stateline" as defined in this Compact shall not be construed to define the actual boundary between the State of Texas and the State of Louisiana.

## ARTICLE X

Nothing in this Compact shall be construed as affecting, in any manner, any present or future rights or powers of the United States, its agencies, or instrumentalities in, to and over the waters of the Sabine River Basin.

IN WITNESS WHEREOF, the Representatives have executed this Compact in three counterparts hereof, each of which shall be and constitute an original, one of which shall be forwarded to the Administrator, General Services Administration of the United States of America and one of which shall be forwarded to the Governor of each State.

DONE in the City of Logansport, in the State of Louisiana, this 26th day of January, 1953.

"PREAMBLE

"The States of Arkansas, Louisiana, Oklahoma, and Texas,

pursuant to the acts of their respective Governors or legislatures, or both, being moved by considerations of interstate comity, have resolved to compact with respect to the water of the Red River and its tributaries. By Act of Congress, Public Law No. 346 (84th Congress, First Session), the consent of the United States has been granted for said states to negotiate and enter into a compact providing for an equitable apportionment of such water; and pursuant to that Act the President has designated the representative of the United States.

"Further, the consent of Congress has been given for two or more states to negotiate and enter into agreements relating to water pollution control by the provisions of the Federal Water Pollution Control Act (P.L. 92-500, 33 U.S.C. Subsection 1251 et seq.).

"The Signatory States acting through their duly authorized Compact Commissioners, after several years of negotiations, have agreed to an equitable apportionment of the water of the Red River and its tributaries and do hereby submit and recommend that this compact be adopted by the respective legislatures and approved by Congress as hereinafter set forth:

#### "ARTICLE I

#### "PURPOSES

"Sec. 1.01. The principal purposes of this Compact are:

"(a) To promote interstate comity and remove causes of controversy between each of the affected states by governing the use, control and distribution of the interstate water of the Red River and its tributaries;

"(b) To provide an equitable apportionment among the Signatory States of the water of the Red River and its tributaries;

"(c) To promote an active program for the control and alleviation of natural deterioration and pollution of the water of the Red River Basin and to provide for enforcement of the laws related thereto;

"(d) To provide the means for an active program for the conservation of water, protection of lives and property from floods, improvement of water quality, development of navigation and regulation of flows in the Red River Basin; and

"(e) To provide a basis for state or joint state planning and action by ascertaining and identifying each state's share in the interstate water of the Red River Basin and the apportionment thereof.

"ARTICLE II  
"GENERAL PROVISIONS

"Sec. 2.01. Each Signatory State may use the water allocated to it by this Compact in any manner deemed beneficial by that state. Each state may freely administer water rights and uses in accordance with the laws of that state, but such uses shall be subject to the availability of water in accordance with the apportionments made by this Compact.

"Sec. 2.02. The use of water by the United States in connection with any individual Federal project shall be in accordance with the Act of Congress authorizing the project and the water shall be charged to the state or states receiving the benefit therefrom.

"Sec. 2.03. Any Signatory State using the channel of Red River or its tributaries to convey stored water shall be subject to an appropriate reduction in the amount which may be withdrawn at the point of removal to account for transmission losses.

"Sec. 2.04. The failure of any state to use any portion of the water allocated to it shall not constitute relinquishment or forfeiture of the right to such use.

"Sec. 2.05. Each Signatory State shall have the right to:

"(a) Construct conservation storage capacity for the impoundment of water allocated by this Compact;

"(b) Replace within the same area any storage capacity recognized or authorized by this Compact made unusable by any cause, including losses due to sediment storage;

"(c) Construct reservoir storage capacity for the purposes of flood and sediment control as well as storage of water which is either imported or is to be exported if such storage does not adversely affect the delivery of water apportioned to any other Signatory State; and

"(d) Use the bed and banks of the Red River and its tributaries to convey stored water, imported or exported water, and water apportioned according to this Compact.

"Sec. 2.06. Signatory States may cooperate to obtain construction of facilities of joint benefits to such states.

"Sec. 2.07. Nothing in this Compact shall be deemed to impair or affect the powers, rights, or obligations of the United States, or those claiming under its authority, in, over and to water of the Red River Basin.

"Sec. 2.08. Nothing in this Compact shall be construed to

include within the water apportioned by this Compact any water consumed in each state by livestock or for domestic purposes; provided, however, the storage of such water is in accordance with the laws of the respective states but any such impoundment shall not exceed 200 acre-feet, or such smaller quantity as may be provided for by the laws of each state.

"Sec. 2.09. In the event any state shall import water into the Red River Basin from any other river basin, the Signatory State making the importation shall have the use of such imported water.

"Sec. 2.10. Nothing in this Compact shall be deemed to:

"(a) Interfere with or impair the right or power of any Signatory State to regulate within its boundaries the appropriation, use, and control of water, or quality of water, not inconsistent with its obligations under this Compact;

"(b) Repeal or prevent the enactment of any legislation or the enforcement of any requirement by any Signatory State imposing any additional conditions or restrictions to further lessen or prevent the pollution or natural deterioration of water within its jurisdiction; provided nothing contained in this paragraph shall alter any provision of this Compact dealing with the apportionment of water or the rights thereto; or

"(c) Waive any state's immunity under the Eleventh Amendment of the Constitution of the United States, or as constituting the consent of any state to be sued by its own citizens.

"Sec. 2.11. Accounting for apportionment purposes on interstate streams shall not be mandatory under the terms of the Compact until one or more affected states deem the accounting necessary.

"Sec. 2.12. For the purposes of apportionment of the water among the Signatory States, the Red River is hereby divided into the following major subdivisions:

"(a) Reach I--the Red River and tributaries from the New Mexico-Texas state boundary to Denison Dam;

"(b) Reach II--the Red River from Denison Dam to the point where it crosses the Arkansas-Louisiana state boundary and all tributaries which contribute to the flow of the River within this reach;

"(c) Reach III--the tributaries west of the Red River which cross the Texas-Louisiana state boundary, the Arkansas-Louisiana state boundary, and those which cross both the Texas-Arkansas state boundary and the Arkansas-Louisiana state boundary.

"(d) Reach IV--the tributaries east of the Red River in Arkansas

which cross the Arkansas-Louisiana state boundary; and

"(e) Reach V--that portion of the Red River and tributaries in Louisiana not included in Reach III or in Reach IV.

"Sec. 2.13. If any part or application of this Compact shall be declared invalid by a court of competent jurisdiction, all other severable provisions and applications of this Compact shall remain in full force and effect.

"(3) Whenever the flow of the Red River at the Arkansas-Louisiana state boundary falls below 1,000 cubic feet per second, the States of Arkansas, Oklahoma, and Texas shall allow a quantity of water equal to all the weekly runoff originating in subbasin 5 and all undesignated water flowing into subbasin 5 within their respective states to flow into the Red River as required to maintain a 1,000 cubic foot per second flow at the Arkansas-Louisiana state boundary.

"(c) Whenever the flow at Index, Arkansas, is less than 526 c.f.s., the states of Oklahoma and Texas shall each allow a quantity

of water equal to 40 percent of the total weekly runoff originating in subbasin 5 within their respective states to flow into the Red River; provided however, this provision shall be invoked only at the request of Arkansas, only after Arkansas has ceased all diversions from the Red River itself in Arkansas above Index, and only if the provisions of Sub-sections 5.05(b)(2) and (3) have not caused a limitation of diversions in subbasin 5.

"(b) Texas is apportioned sixty (60) percent of the runoff of this subbasin and shall have unrestricted use thereof; Arkansas is entitled to forty (40) percent of the runoff of this subbasin.

"Sec. 6.02. Subbasin 2--Interstate streams--Arkansas and Louisiana.

"(a) This subbasin includes the Arkansas portion of those streams flowing from Subbasin 1 into Arkansas, as well as other streams in Arkansas which cross the Arkansas-Louisiana state boundary one or more times and flow into Cypress Creek-Twelve Mile Bayou watershed in Louisiana.

"(b) Arkansas is apportioned sixty (60) percent of the runoff of this subbasin and shall have unrestricted use thereof; Louisiana is entitled to forty (40) percent of the runoff of this subbasin.

"(1) Texas shall have the unrestricted right to all water above Marshall, Lake O' the Pines, and Black Cypress damsites; however, Texas shall not cause runoff to be depleted to a quantity less than that which would have occurred with the full operation of Franklin County, Titus County, Ellison Creek, Johnson Creek, Lake O' the Pines, Marshall, and Black Cypress Reservoirs constructed, and those other impoundments and diversions existing on the effective date of this Compact. Any depletions of runoff in excess of the depletions described above shall be charged against Texas' apportionment of the water in Caddo Reservoir.

"(2) Texas and Louisiana shall each have the unrestricted right to use fifty (50) percent of the conservation storage capacity in the present Caddo Lake for the impoundment of water for state use, subject to the provision that supplies for existing uses of water from Caddo Lake, on date of Compact, are not reduced.

"(3) Texas and Louisiana shall each have the unrestricted right to fifty (50) percent of the conservation storage capacity of any future enlargement of Caddo Lake, provided, the two states may negotiate for the release of each state's share of the storage space on terms mutually agreed upon by the two states after the effective date of this Compact.

"(4) Inflow to Caddo Lake from its drainage area downstream from

Marshall, Lake O' the Pines, and Black Cypress damsites and downstream from other last downstream dams in existence on the date of the signing of the Compact document by the Compact Commissioners, will be allowed to continue flowing into Caddo Lake except that any manmade depletions to this inflow by Texas will be subtracted from the Texas share of the water in Caddo Lake.

"(c) In regard to the water of interstate streams which do not contribute to the inflow to Cross Lake or Caddo Lake, Texas shall have the unrestricted right to divert and use this water on the basis of a division of runoff above the state boundary of sixty (60) percent to Texas and forty (40) percent to Louisiana.

"(d) Texas and Louisiana will not construct improvements on the Cross Lake watershed in either state that will affect the yield of Cross Lake; provided, however, this subsection shall be subject to the provisions of Section 2.08.

The Commission shall be composed of two representatives from each Signatory State who shall be designated or appointed in accordance with the laws of each state, and one Commissioner representing the United States, who shall be appointed by the President. The Federal Commissioner shall be the Chairman of the Commission but shall not have the right to vote. The failure of the President to appoint a Federal Commissioner will not prevent the operation or effect of this Compact, and the eight representatives from the Signatory States will elect a Chairman for the Commission.

"Sec. 9.02. The Commission shall meet and organize within 60 days after the effective date of this Compact. Thereafter, meetings shall be held at such times and places as the Commission shall decide.

"Sec. 9.03. Each of the two Commissioners from each state shall have one vote; provided, however, that if only one representative from a state attends he is authorized to vote on behalf of the absent Commissioner from that state. Representatives from three states shall constitute a quorum. Any action concerned with administration of this Compact or any action requiring compliance with specific terms of this Compact shall require six concurring votes. If a proposed action of the Commission affects existing water rights in a state, and that action is not expressly provided for in this Compact, eight concurring votes shall be required.

"(c) All other expenses incurred by the Commission shall be borne equally by the Signatory States and shall be paid by the Commission out of the 'Red River Compact Commission Fund.' Such Fund shall be initiated and maintained by equal payments of each state into the fund. Disbursement shall be made from the fund in such manner as may be authorized by the Commission. Such fund shall not be subject to audit and accounting procedures of the state; however, all receipts and disbursements of the fund by the Commission shall be audited by a qualified independent public accountant at regular intervals, and the report of such audits shall be included in and become a part of the annual report of the Commission. Each state shall have the right to make its own audit of the accounts of the Commission at any reasonable time.

It is authorized to make and file official certified copies of any of its findings, recommendations or reports with such officers or agencies of any Signatory State, or the United States, as may have any interest in or jurisdiction over the subject matter. The making of findings, recommendations, or reports by the Commission shall not be a condition precedent to the instituting or maintaining of any action or proceeding of any kind by a Signatory State in any court or tribunal, or before any agency or officer, for the protection of any right under this Compact or for the enforcement of any of its provisions; and

"(h) Print or otherwise reproduce and distribute its proceedings and reports.

"Sec. 10.02. The Commission shall:

"(a) Cause to be established, maintained, and operated such stream, reservoir and other gaging stations as are necessary for the proper administration of the Compact;

"ARTICLE XI

"POLLUTION

"Sec. 11.01. The Signatory States recognize that the increase in population and the growth of industrial, agricultural, mining and other activities combined with natural pollution sources may lead to a diminution of the quality of water in the Red River Basin which may render the water harmful or injurious to the health and welfare of the people and impair the usefulness or public enjoyment of the water for beneficial purposes, thereby resulting in adverse social, economic, and environmental impacts.

"Sec. 11.02. Although affirming the primary duty and responsibility of each Signatory State to take appropriate action under its own laws to prevent, diminish, and regulate all pollution sources within its boundaries which adversely affect the water of the Red River Basin, the states recognize that the control and abatement of the naturally-occurring salinity sources as well as, under certain circumstances, the maintenance and enhancement of the quality of water in the Red River Basin may require the cooperative action of all states.

"Sec. 11.03. The Signatory States agree to cooperate with agencies of the United States to devise and effectuate means of alleviating the natural deterioration of the water of the Red River Basin.

"Sec. 11.04. The Commission shall have the power to cooperate with the United States, the Signatory States and other entities in programs for abating and controlling pollution and natural deterioration of the water of the Red River Basin, and to recommend reasonable water quality objectives to the states.

"Sec. 11.05. Each Signatory State agrees to maintain current records of waste discharges into the Red River Basin and the type and quality of such discharges, which records shall be furnished to the Commission upon request.

"Sec. 11.06. Upon receipt of a complaint from the governor of a Signatory State that the interstate water of the Red River Basin in

which it has an interest are being materially and adversely affected by pollution and that the state in which the pollution originates has failed after reasonable notice to take appropriate abatement measures, the Commission shall make such findings as are appropriate and thereafter provide such findings to the governor of the state in which such pollution originates and request appropriate corrective action. The Commission, however, shall not take any action with respect to pollution which adversely affects only the state in which such pollution originates.

"Sec. 11.07. In addition to its other powers set forth under this Article, the Commission shall have the authority, upon receipt of six concurring votes, to utilize applicable Federal statutes to institute legal action in its own name against the person or entity responsible for interstate pollution problems; provided, however, sixty (60) days before initiating legal action the Commission shall notify the Governor of the state in which the pollution source is located to allow that state an opportunity to initiate action in its own name.

"Sec. 11.08. Without prejudice to any other remedy available to the Commission, or any Signatory State, any state which is materially and adversely affected by the pollution of the water of the Red River Basin by pollution originating in another Signatory State may institute a suit against any individual, corporation, partnership, or association, or against any Signatory State or political or governmental subdivision thereof, or against any officer, agency, department, bureau, district or instrumentality of or in any Signatory State contributing to such pollution in accordance with applicable Federal statutes. Nothing herein shall be construed as depriving any persons of any rights of action relating to pollution which such person would have if this Compact had not been made.

## "ARTICLE XII

### "TERMINATION AND AMENDMENT OF COMPACT

"Sec. 12.01. This Compact may be terminated at any time by appropriate action of the legislatures of all of the four Signatory States. In the event of such termination, all rights established under it shall continue unimpaired.

"Sec. 12.02. This Compact may be amended at any time by appropriate action of the legislatures of all Signatory States that are affected by such amendment. The consent of the United States Congress must be obtained before any such amendment is effective.

## "ARTICLE XIII

## "RATIFICATION AND EFFECTIVE DATE OF COMPACT

"Sec. 13.01. The President is hereby requested to give notice to the governors of each of the Signatory States of the consent to this Compact by the Congress of the United States.

"Sec. 13.02. This Compact shall become effective, binding and obligatory when, and only when:

The rules must require an applicant to publish the notice issued by the commission under Subsection (a) once a week for two consecutive weeks in a newspaper regularly published or circulated in the county where the district is proposed to be located not later than the 30th day before the date on which the commission may act on the application.

(c) The commission may act on an application without holding a public hearing if a public hearing is not requested by the commission, the executive director, or an affected person in the manner prescribed by commission rule during the 30 days following the final publication of notice under Subsection (b).

(d) If the commission determines that a public hearing is necessary, the commission shall advise all parties of the time and place of the hearing. The commission is not required to provide public notice of a hearing under this section.

Added by Acts 1997, 75th Leg., ch. 1070, Sec. 2, eff. Sept. 1, 1997.

**SUBCHAPTER C. ADMINISTRATIVE PROVISIONS**

(a) A person is disqualified from serving as a member of a board of a district that includes less than all the territory in at least one county and which, if located within the corporate area of a city or cities, includes within its boundaries less than 75 percent of the incorporated area of the city or cities, if that person:

(1) is related within the third degree of affinity or consanguinity to a developer of property in the district, any other member of the board, or the manager, engineer, attorney, or other person providing professional services to the district;

(2) is an employee of any developer of property in the district or any director, manager, engineer, attorney, or other person providing professional services to the district or a developer of property in the district in connection with the district or property located in the district;

(3) is a developer of property in the district;

(4) is serving as an attorney, consultant, engineer, manager, architect, or in some other professional capacity for the district or a developer of property in the district in connection with the district or property located in the district;

(5)(A) is a party to a contract with or along with the district except for the purchase of public services furnished by the district to the public generally; or

(B) is a party to a contract with or along with a developer of property in the district relating to the district or to property within the district, other than a contract limited solely to the purpose of purchasing or conveying real property in the district for the purpose of either establishing a permanent residence, establishing a commercial business within the district, or qualifying as a director; or

(6) during the term of office, fails to maintain the qualifications required by law to serve as a director.

(b) Within 60 days after the board determines a relationship or employment exists which constitutes a disqualification under Subsection (a), it shall replace the person serving as a member of the board with a person who would not be disqualified.

(c) Any person who wilfully occupies an office as a member of a board and exercises the powers and duties of that office when

disqualified under the provisions of Subsection (a) is guilty of a misdemeanor and, on conviction, shall be fined not less than \$100 nor more than \$1,000.

(d) As used in this section, "developer of property in the district" means any person who owns land located within a district covered under this section and who has divided or proposes to divide the land into two or more parts for the purpose of laying out any subdivision or any tract of land or any addition to any town or city, or for laying out suburban lots or building lots, or any lots, streets, alleys, or parks or other portions intended for public use, or the use of purchasers or owners of lots fronting thereon or adjacent thereto.

(e) Any rights obtained by any third party through official action of a board covered by this section are not impaired or affected by the disqualification under this section of any member of the board to serve, provided that the third party had no knowledge at the time the rights were obtained of the fact that the member of the board was disqualified to serve.

(f) This section shall not apply to special water authorities, districts described in Section 49.181(h)(1)(D), or a district where the principal function of the district is to provide irrigation water to agricultural lands or to provide nonpotable water for any purpose.

(g) A board by unanimous vote of its remaining members may remove a board member only if that board member has missed one-half or more of the regular meetings scheduled during the prior 12 months. Any board member so removed may file a written appeal with the commission within 30 days after receiving written notice of the board action. The commission may reinstate a removed director if the commission finds that the removal was unwarranted under the circumstances, including the reasons for absences, the time and place of the meetings missed, the business conducted at the meetings missed, and any other facts or circumstances the commission may deem relevant.

(h) This subsection applies only to a district that is located wholly within the boundaries of a municipality with a population of more than 1.5 million, that is governed by Chapter 375, Local Government Code, and that is governed by an appointed board consisting of nine or more members. Notwithstanding Subsection (f) or (g), a person is considered to have resigned from serving as a member of the board if the person fails to attend three consecutive

meetings of the board. The remaining board members by majority vote may waive the resignation under this subsection if fairness requires that the absences be excused on the basis of illness or other good cause.

(i) Notwithstanding any other law, a director is eligible to serve on the board of a district governed by Chapter 375, Local Government Code, regardless of the municipality in which the director resides, if:

(1) the district is located within the boundaries of a municipality with a population of more than 1.8 million; and

(2) all or a part of the district is located more than five miles from the downtown city hall of that municipality.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.055. SWORN STATEMENT, BOND, AND OATH OF OFFICE. (a) As soon as practicable after a director is elected or appointed, that director shall make the sworn statement prescribed by the constitution for public office.

(b) As soon as practicable after a director has made the sworn statement, and before beginning to perform the duties of office, that director shall take the oath of office prescribed by the constitution for public officers.

(c) Before beginning to perform the duties of office, each director shall execute a bond for \$10,000 payable to the district and conditioned on the faithful performance of that director's duties. All bonds of the directors shall be approved by the board and paid for by the district.

(d) The sworn statement shall be filed as prescribed by the constitution. The bond and oath shall be filed with the district and retained in its records. A duplicate original of the oath shall also be filed with the secretary of state within 10 days after its execution and need not be filed before the new director begins to perform the duties of office.

(e) This section does not apply to special water authorities.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Amended by Acts 1999, 76th Leg., ch. 249, Sec. 2, eff. Aug. 30, 1999.

Sec. 49.056. GENERAL MANAGER. (a) The board may employ or contract with a person to perform such services as general manager for the district as the board may from time to time specify. The board may delegate to the general manager full authority to manage and operate the affairs of the district subject only to orders of the board.

(b) The board may delegate to the general manager the authority to employ all persons necessary for the proper handling of the business and operation of the district and to determine the compensation to be paid all employees other than the general manager.

(c) Except as provided by Section 49.052, a director may be employed as general manager of the district, but the compensation of a general manager who also serves as a director shall be established by the other directors.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.057. MANAGEMENT OF DISTRICT. (a) The board shall be responsible for the management of all the affairs of the district. The district shall employ or contract with all persons, firms, partnerships, corporations, or other entities, public or private, deemed necessary by the board for the conduct of the affairs of the district, including, but not limited to, engineers, attorneys, financial advisors, operators, bookkeepers, tax assessors and collectors, auditors, and administrative staff.

(b) The board shall adopt an annual budget. All district employees are employed at the will of the district unless the district and employee execute a written employment contract.

The board may require a consultant who does not routinely collect, pay, or handle funds of the district to furnish a bond. The bond shall be conditioned on the faithful performance of that person's duties and on accounting for all funds and property of the district. Such bond shall be signed or endorsed by a surety company authorized to do business in the state.

(f) The board may pay the premium on surety bonds required of officials, employees, or consultants of the district out of any available funds of the district, including proceeds from the sale of bonds.

(g) The board may adopt bylaws to govern the affairs of the district to perform its purposes. The board may by resolution authorize its general manager or other employee to execute documents on behalf of the district.

(h) The board shall also have the right to purchase all materials, supplies, equipment, vehicles, and machinery needed by the district to perform its purposes.

(i) The board may obtain or require an officer, employee, or consultant of the district to obtain insurance or coverage under an interlocal agreement that covers theft of district funds by officers, employees, or consultants of the district in lieu of requiring a bond under Subsection (e) if the board determines that the insurance or coverage under an interlocal agreement would adequately protect the interests of the district.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.059. TAX ASSESSOR AND COLLECTOR. (a) A district may employ or contract with any person to serve as its tax assessor and collector who is:

(1) an individual certified as a registered Texas assessor-collector; or

(2) a firm, organization, association, partnership, corporation, or other legal entity if an individual certified as a registered Texas assessor-collector owns an interest in or is employed by the firm, organization, association, partnership, corporation, or other legal entity.

(b) A tax assessor and collector employed or contracted for under this section is not required to be a natural person.

(c) A firm, organization, association, partnership, corporation, or other legal entity serving as district tax assessor and collector shall give a bond as required by Section 49.057 for a natural person.

(d) No person may serve as tax assessor and collector of a district providing potable water or sewer utility services to household users if that person:

(1) is a natural person related within the third degree of affinity or consanguinity to any developer of property in the district, a member of the board, or the manager, engineer, or attorney for the district;

Amended by:

Acts 2013, 83rd Leg., R.S., Ch. 105 (S.B. 902), Sec. 4, eff. September 1, 2013.

Sec. 49.060. FEES OF OFFICE; REIMBURSEMENT. (a) A director is entitled to receive fees of office of not more than \$150 a day for each day the director actually spends performing the duties of a director. In this subsection, "performing the duties of a director" means substantive performance of the management or business of the district, including participation in board and committee meetings and other activities involving the substantive deliberation of district business and in pertinent educational programs. The phrase does not include routine or ministerial activities such as the execution of documents, self-preparation for meetings, or other activities requiring a minimal amount of time.

(a-1) A district, by resolution of the board, shall set a limit on the fees of office that a director may receive in a year. Except for a district that is a special water authority engaged in the

distribution and sale of electric energy to the public, a district may not set the annual limit at an amount greater than \$7,200.

(b) Each director is also entitled to receive reimbursement of actual expenses reasonably and necessarily incurred while engaging in activities on behalf of the district.

(c) In order to receive fees of office and to receive reimbursement for expenses, each director shall file with the district a verified statement showing the number of days actually spent in the service of the district and a general description of the duties performed for each day of service.

(d) Repealed by Acts 2003, 78th Leg., ch. 736, Sec. 2.

(e) Section 49.002 notwithstanding, in all areas of conflict the provisions of this section shall take precedence over all prior statutory enactments. If the enactment of this section results in an increase in the fees of office for any district, that district's fees of office shall not increase unless the board adopts a resolution authorizing payment of the higher fees.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.062. OFFICES AND MEETING PLACES. (a) The board shall designate from time to time and maintain one or more regular offices for conducting the business of the district and maintaining the records of the district. Such offices may be located either inside or outside the district's boundaries as determined in the discretion of the board.

(b) The board shall designate one or more places inside or outside the district for conducting the meetings of the board. The meeting place may be a private residence or office, provided that the board, in its order establishing the meeting place, declares the same to be a public place and invites the public to attend any meeting of

the board. If the board establishes a meeting place or places outside the district, it shall give notice of the location or locations by filing a true copy of the resolution establishing the location or locations of the meeting place or places with the commission and also by publishing notice of the location or locations in a newspaper of general circulation in the district. If the location of any of the meeting places outside the district is changed, notice of the change shall be given in the same manner.

(c) After at least 25 qualified electors are residing in a district, on written request of at least five of those electors, the board shall designate a meeting place and hold meetings within the district if it determines that the meeting place used by the district deprives the residents of a reasonable opportunity to attend district meetings. On the failure to designate the location of the meeting place within the district, five electors may petition the commission to designate a location. If it determines that the meeting place used by the district deprives the residents of a reasonable opportunity to attend district meetings, the commission may designate a meeting place inside or outside the district which is reasonably available to the public and require that the meetings be held at such place. After the next election, the board may designate different meeting places, including one located outside the boundaries of the district.

(d) Two or more districts may designate and share offices and meeting places. This section does not apply to special water authorities.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.063. NOTICE OF MEETINGS. (a) Notice of meetings of the board shall be given as set forth in the open meetings law, Chapter 551, Government Code, except that if a district does not have a meeting place within the district, the district shall post notice of its meeting at a public place within the district specified by the board in a written resolution, rather than at its administrative office. The board shall specify such public place to be a bulletin board or other place within the district which is reasonably available to the public.

(b) The validity of an action taken at a board meeting is not

affected by:

- (1) failure to provide notice of the meeting if the meeting is a regular meeting;
- (2) an insubstantial defect in notice of the meeting; or
- (3) failure of a county clerk to timely or properly post or maintain public access to a notice of the meeting if notice of the meeting is furnished to the county clerk in sufficient time for posting under Section 551.043(a) or 551.045, Government Code.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Amended by:

Acts 2013, 83rd Leg., R.S., Ch. 105 (S.B. 902), Sec. 5, eff. September 1, 2013.

Sec. 49.064. MEETINGS. The board shall hold such regular and special meetings as may be necessary for the proper conduct of the district's business. All meetings shall be conducted in accordance with the open meetings law, Chapter 551, Government Code. A meeting of a committee of the board, or a committee composed of representatives of more than one board, where less than a quorum of any one board is present is not subject to the provisions of the open meetings law, Chapter 551, Government Code.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

(d) Immediately after the confirmation and director election, the presiding judge shall take returns of the results to the temporary board. The temporary board shall canvass the returns and declare the results at the earliest practicable time.

(e) If a majority of the votes cast in the election favor the creation of the district, then the temporary board shall declare that the district is created and enter the result in its minutes. If a majority of the votes cast in the election are against the creation of the district, the temporary board shall declare that the district was defeated and enter the result in its minutes. A copy of the order shall be filed with the commission.

(f) The order canvassing the results of the confirmation election shall contain a description of the district's boundaries and shall be filed with the executive director and in the deed records of the county or counties in which the district is located.

Sec. 49.104. ALTERNATIVE ELECTION PROCEDURES. (a)

Notwithstanding the provisions and requirements of the Election Code and general laws, any two or more districts situated in the same county and in which substantially all of the land is being or has been developed as part of a single community development plan and which are served by common water supply and waste disposal systems may by mutual agreement designate a common election office and common early and regular polling places within one or more of the districts, but outside the boundaries of one or more of the districts, for the conduct of director election proceedings and early and regular balloting in director elections. This alternative election procedure may only be used if the common election office and polling places so designated:

- (1) are within buildings open to the public;
- (2) are within the boundaries of at least one of the

districts;

- (3) meet the requirements of the Election Code and general

laws as polling places; and

(4) are located not more than five miles from any portion of the boundaries of any of the participating districts.

(b) Such districts may also agree on and designate a common election officer and common early and regular voting officials for some or all of the director elections to be simultaneously conducted at a common location, any of whom may be nonelective employees of one or more of the districts, so long as the early and regular voting officials are qualified voters within at least one of the districts.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.1045. CERTIFICATION OF ELECTION RESULTS IN LESS POPULOUS DISTRICTS. (a) This section applies only to a district that:

(1) has 10 or fewer registered voters; and

(2) holds an election jointly with a county in which the district is wholly or partly located.

(b) A district may provide for an inquiry into and certification of the voting results of an election under this section if:

(1) the election results indicate that the number of votes cast in the election was greater than the number of registered voters in the district;

(2) the board determines that the election results are likely to be disputed in court; and

(3) the board can determine from the official list of registered voters prepared by the county voter registrar or county elections administrator for the district election which voters were qualified to vote in the district election and can determine from the signature roster from the joint election who voted in the joint election.

(c) To certify the district votes, the board by rule shall adopt a procedure to determine for each person who signed the signature roster as a voter in the joint election:

(1) whether the person's address on the day of the election was in the district; and

(2) how the person voted in the district election.

(d) The certified votes are the official election results.

(e) Certification of the results under this section does not preclude the filing of an election contest.

Added by Acts 2013, 83rd Leg., R.S., Ch. 105 (S.B. 902), Sec. 8, eff. September 1, 2013.

Sec. 49.105. VACANCIES. (a) Except as otherwise provided in this code, a vacancy on the board and in other offices shall be filled for the unexpired term by appointment of the board not later than the 60th day after the date the vacancy occurs.

(b) If the board has not filled a vacancy by appointment before the 61st day after the date the vacancy occurs, a petition, signed by more than 10 percent of the registered voters of the district, requesting the board to fill the vacancy by appointment may be presented to the board.

(c) If the number of directors is reduced to fewer than a majority or if a vacancy continues beyond the 90th day after the date the vacancy occurs, the vacancy or vacancies may be filled by appointment by the commission if the district is required by Section 49.181 to obtain commission approval of its bonds or by the county commissioners court if the district was created by the county commissioners court, regardless of whether a petition has been presented to the board under Subsection (b). An appointed director shall serve for the unexpired term of the director he or she is replacing.

(d) In the event of a failure to elect one or more members of the board of a district resulting from the absence of, or failure to vote by, the qualified voters in an election held by the district, the current members of the board or temporary board holding the positions not filled at such election shall be deemed to have been elected and shall serve an additional term of office, or, in the case of a temporary board member deemed elected under this subsection, the initial term of office.

or

(2) a contract with the voters.

(b) Notice of a bond election shall contain the proposition or propositions to be voted on, which includes the estimate of the probable cost of design, construction, purchase, and acquisition of improvements and additions thereto, and incidental expenses connected with such improvements and the issuance of bonds.

(c) A bond election may be held on the same day as any other district election. The bond election may be called by a separate election order or as a part of any other election order. The board may submit multiple purposes in a single proposition at an election.

(d) A bond election may be called as a result of an agreement to annex additional territory into the district.

(e) A district's authorization to issue bonds resulting from an election held under this section, or any other law that allows for the qualified voters of a district to authorize the issuance of bonds by a district, remains in effect after the election unless the district is dissolved or is annexed by another district.

facilities, improvements, appliances, and equipment of the district and for paying costs of proper services, engineering and legal fees, and organization and administrative expenses.

(b) An operation and maintenance tax may not be levied by a district until it is approved by a majority of the electors voting at an election held for that purpose. After such a tax has been authorized by the district's voters, the board shall be authorized to levy the tax and have it assessed and collected as other district taxes.

(c) An operation and maintenance tax election may be held at the same time and in conjunction with any other district election. The election may be called by a separate election order or as part of any other election order.

(d) The proposition in an operation and maintenance tax election may be for a specific maximum rate or for an unlimited rate.

(e) If a district has any surplus operation and maintenance tax funds that are not needed for the purposes for which they were collected, the funds may be used for any lawful purpose.

(f) Before a district reimburses a developer of property in the district, as that term is defined in Section 49.052(d), or its assigns, from operation and maintenance tax funds, for planning, constructing, or acquiring facilities, the district shall obtain approval by the executive director.

(g) Sections 26.04, 26.05, and 26.07, Tax Code, do not apply to a tax levied and collected under this section or an ad valorem tax levied and collected for the payment of the interest on and principal of bonds issued by a district.

(h) To the extent authorized by Section 59, Article XVI, Texas Constitution, an operation and maintenance tax to be used for recreational facilities, as defined by Section 49.462, levied by a district located in a county with a population of more than 3.3 million or in a county adjacent to that county may not exceed 10 cents per \$100 of assessed valuation of taxable property in the district.

Sec. 49.108. CONTRACT ELECTIONS. (a) A contract may provide that the district will make payment under the contract from proceeds from the sale of notes or bonds, from taxes, or from any other income of the district or any combination of these.

(b) A district may make payments under a contract from taxes other than operation and maintenance taxes after the provisions of the contract have been approved by a majority of the qualified voters voting at an election held for that purpose. A contract approved by the qualified voters of a district may contain a provision stating that the contract may be modified or amended by the board without voter approval.

(c) A contract election may be held at the same time and in conjunction with any other district election. The election may be called by a separate election order or as part of any other election order.

(d) A contract approved by the voters will constitute an obligation against the taxing power of the district to the extent provided in the contract.

(e) A district that is required under Section 49.181 to obtain approval by the commission of the district's issuance of bonds must obtain approval by the executive director before the district enters into an obligation under this section to collect tax for debt that exceeds three years. This subsection does not apply to contract taxes that are levied to pay for a district's share of bonds that have been issued by another district and approved by the commission or bonds issued by a municipality.

(f) Sections 26.04, 26.05, and 26.07, Tax Code, do not apply to a tax levied and collected for payments made under a contract approved in accordance with this section.

(g) On or before the first day for early voting by personal appearance at an election held to authorize a contract, a substantially final form of the contract must be filed in the office of the district and must be open to inspection by the public. The contract is not required to be attached as an exhibit to the order calling the election to authorize the contract.

(h) A single contract may contain multiple purposes or provisions for multiple facilities authorized by one or more constitutional provisions. The contract may generally describe the facilities to be acquired or financed by the district without reference to specific constitutional provisions. A contract

described by this subsection may be submitted for approval in a single proposition at an election.

(i) A contract between districts to provide facilities or services is not required to specify the maximum amount of bonds or expenditures authorized under the contract if:

(1) the contract provides that the service area cannot be enlarged without the consent of at least two-thirds of the boards of directors of the districts that are:

(A) included in the service area as proposed to be enlarged; or

(B) served by the facilities or services provided in the contract;

(2) the contract provides that bonds or expenditures, payable wholly or partly from contract taxes, are issued or made:

(A) on an emergency basis; or

(B) to purchase, construct, acquire, own, operate, repair, improve, or extend services or facilities necessary to comply with changes in applicable regulatory requirements; or

(d-1) Actual costs under Subsections (d)(1) and (d)(2), as determined by the board in its reasonable discretion, may include nonconstruction expenses attributable to the design, permitting, financing, and construction of those facilities, and reasonable interest on those costs calculated at a rate not to exceed the net effective interest rate on any district bonds issued to finance the facilities.

(d-2) A district may pledge the revenues of the district's utility system to pay the principal of or interest on bonds issued to construct the capital improvements for which a charge or fee is imposed under Subsection (d), and money received from the fees shall be considered revenues of the district's utility system for purposes

This subsection does not authorize a district to provide services within an area for which a retail public utility holds a certificate of convenience and necessity or within the boundaries of another district without that district's consent, unless the district has a valid certificate of convenience and necessity to provide services to that area.

(e) A district is authorized to establish, maintain, revise, charge, and collect the rates, fees, rentals, tolls, or other charges for the use, services, and facilities that provide service to areas outside the district that are considered necessary and may be higher than those charged for comparable service to users within the district.

(f) The rates, fees, rentals, tolls, or other charges shall be at least sufficient to meet the expense of operating and maintaining the services and facilities for a water and sanitary sewer system serving areas outside the district and to pay the principal of and interest and redemption price on bonds issued to purchase, construct, acquire, own, operate, repair, improve, or extend the services or facilities.

(e) Any peace officer who is directly employed by a district, before beginning to perform any duties and at the time of appointment, must take an oath and execute a bond conditioned on faithful performance of such officer's duties in the amount of \$1,000 payable to the district. The oath and the bond shall be filed in the district office.

(e) A district or water supply corporation may not, under Subsection (d), require an applicant to provide an easement for a service line for the sole benefit of another applicant.

(f) As a condition of service to a new subdivision, a district or water supply corporation may require a developer to provide permanent recorded easements to and throughout the subdivision sufficient to construct, install, maintain, replace, upgrade, inspect, or test any facility necessary to serve the subdivision's anticipated service demands when the subdivision is fully occupied.

Sec. 49.219. ACQUISITION OF EXISTING FACILITIES. Any district may acquire by agreement all or any part of existing water, sanitary sewer, or drainage systems of any water supply corporation, including works, improvements, facilities, plants, equipment, appliances, contract rights, and other assets and rights that are completed, partially completed, or under construction, and in connection therewith a district may assume all or any part of the contracts, indebtedness, or obligations of the corporation related to said systems, including any contracts, indebtedness, or obligations related to or payable from the revenues of said systems, and may perform all or any part of the obligations of said corporation in the same manner and to the same extent that any other purchaser or assignee could be bound on any such contracts, indebtedness, or obligations. Before assuming any indebtedness or obligations of such corporation related to any such system, a district other than a special water authority shall obtain the approval of the commission of such assumption.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.220. RIGHT TO USE EXISTING RIGHTS-OF-WAY. All districts or water supply corporations are given rights-of-way within, along, under, and across all public, state, county, city, town, or village roads, highways, and rights-of-way and other public rights-of-way without the requirement for surety bond or security; provided, however, that the entity having jurisdiction over such roads, highways, and rights-of-way may require indemnification. A district or water supply corporation shall not proceed with any action to change, alter, or damage a portion of the state highway system without having first obtained the written consent of the Texas Department of Transportation, and the placement of any facility of a district or water supply corporation within state highway right-of-way shall be subject to department regulation.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.221. RIGHT TO ENTER LAND. (a) The directors, engineers, attorneys, agents, operators, and employees of a district or water supply corporation may go on any land to inspect, make

surveys, or perform tests to determine the condition, value, and usability of the property, with reference to the proposed location of works, improvements, plants, facilities, equipment, or appliances. The cost of restoration shall be borne by the district or the water supply corporation.

(b) District employees and agents are entitled to enter any public or private property within the boundaries of the district or adjacent to any reservoir or other property owned by the district at any reasonable time for the purpose of inspecting and investigating conditions relating to the quality of water in the state or the compliance with any rule, regulation, permit, or other order of the district. District employees or agents acting under this authority who enter private property shall observe the establishment's rules and regulations concerning safety, internal security, and fire protection and shall notify any occupant or management of their presence and shall exhibit proper credentials.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.222. EMINENT DOMAIN. (a) A district or water supply corporation may acquire by condemnation any land, easements, or other property inside or outside the district boundaries, or the boundaries of the certificated service area for a water supply corporation, necessary for water, sanitary sewer, storm drainage, or flood drainage or control purposes or for any other of its projects or purposes, and may elect to condemn either the fee simple title or a lesser property interest.

(b) The right of eminent domain shall be exercised in the manner provided in Chapter 21, Property Code, except that a district or a water supply corporation shall not be required to give bond for appeal or bond for costs in any condemnation suit or other suit to which it is a party and shall not be required to deposit more than the amount of any award in any suit.

(c) The power of eminent domain may not be used for the condemnation of land for the purpose of acquiring rights to underground water or of water or water rights.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.223. COSTS OF RELOCATION OF PROPERTY. (a) In the event that the district or the water supply corporation, in the exercise of the power of eminent domain or power of relocation or any other power, makes necessary the relocation, raising, lowering, rerouting, or change in grade of or alteration in construction of any road, bridge, highway, railroad, electric transmission line, telegraph, or telephone properties, facilities, or pipelines, all necessary relocations, raising, lowering, rerouting, or change in grade or alteration of construction shall be done at the sole expense of the district or the water supply corporation unless otherwise agreed to in writing. Such relocation shall be accomplished in a timely manner so that the project of the district or the water supply corporation is not delayed.

(b) "Sole expense" means the actual cost of the relocation, raising, lowering, rerouting, or change in grade or alteration of construction and providing comparable replacement without enhancing the facilities after deducting from it the net salvage value derived from the old facility.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.224. POWER TO CONDEMN CEMETERIES. (a) The use of land for the construction of district dams and creation of lakes and reservoirs for the purpose of conservation and development of the natural resources of this state is hereby declared to be superior to all other uses, and for these purposes only a district has the power of eminent domain to acquire land, improvements, and other property owned and held for cemeteries or burial places necessary for the construction of a dam or that lies inside the area to be covered by the lake or reservoir or within 300 feet of the high water line of the lake or reservoir.

(b) Except as otherwise provided by this subchapter, the procedure in condemnation proceedings is governed by Chapter 21, Property Code.

(c) Notice shall be served on the title owner of the land on which the cemetery is situated as provided in Chapter 21, Property Code. General notice to persons having relatives interred in the cemetery shall be given by publication for two consecutive weeks in a newspaper circulated in the county in which the cemetery is situated.

(d) The measure of damages in these eminent domain proceedings shall be assessed as in other condemnation cases. An additional amount of damages shall be assessed to cover the cost of removing and reintering the bodies interred in the cemetery or burial place and the cost of removing and resetting the monuments or markers erected at the graves.

(e) The additional assessment shall be deposited in the registry of the county court and disbursed only for the purpose of removing and reintering the bodies in other cemeteries in Texas agreed on between the district and the relatives of the deceased persons.

(f) If in any case the district and the relatives of a deceased person cannot agree within 30 days on a cemetery for reinterment, or no relatives appear within that time, then the county judge shall designate the cemetery for reinterment.

(g) Instead of depositing the additional assessment in the registry of the court, the district may execute a bond sufficient to cover costs of removing and reintering the bodies. The bond shall be payable to and approved by the county judge and conditioned that the bodies will be removed and reinterred as provided by this section.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.225. LEASES. A district may lease any of its property, real or personal, to any person. The lease may contain the terms and provisions that the board determines to be advantageous to the district.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.226. SALE OR EXCHANGE OF REAL OR PERSONAL PROPERTY.

(a) Any personal property valued at more than \$300 or any land or interest in land owned by the district which is found by the board to be surplus and is not needed by the district may be sold under order of the board either by public or private sale, or the land, interest in land, or personal property may be exchanged for other land, interest in land, or personal property needed by the district. Except as provided in Subsection (b), land, interest in land, or

personal property must be exchanged for like fair market value, which value may be determined by the district. In connection with the sale of surplus land, the board, at its discretion, may impose restrictions on the development and use of the land.

(b) Any property dedicated to or acquired by the district without expending district funds may be abandoned or released to the original grantor, the grantor's heirs, assigns, executors, or successors upon terms and conditions deemed necessary or advantageous to the district and without receiving compensation for such abandonment or release. District property may also be abandoned, released, exchanged, or transferred to another district, municipality, county, countywide agency, or authority upon terms and conditions deemed necessary or advantageous to the district. Narrow strips of property resulting from boundary or surveying conflicts or similar causes, or from insubstantial encroachments by abutting property owners, or property of larger configuration that has been subject to encroachments by abutting property owners for more than 25 years may be abandoned, released, exchanged, or transferred to such abutting owners upon terms and conditions deemed necessary or advantageous to the district. Chapter 272, Local Government Code, does not apply to this section.

(c) Before a public sale of real property, the district shall give notice of the intent to sell by publishing notice once a week for two consecutive weeks in one or more newspapers with general circulation in the district.

(d) If the district has outstanding bonds secured by a pledge of tax revenues, the proceeds of the sale of property originally acquired with bond proceeds shall be:

(1) applied to retire outstanding bonds of the district;

or

(2) held and treated as surplus bond proceeds and spent only as provided by the rules of the commission relating to surplus bond proceeds.

(e) If the district does not have any outstanding bonds, the proceeds derived from the sale of real or personal property may be used for any lawful purpose.

Acts 2003, 78th Leg., ch. 248, Sec. 16, eff. June 18, 2003.

Sec. 49.2261. PURCHASE, SALE, OR OTHER EXCHANGE OF WATER OR WATER RIGHTS. Notwithstanding any other law, the district may:

(1) purchase, acquire, sell, transfer, lease, or otherwise exchange water or water rights under an agreement between the district and a person or entity that contains terms that are considered advantageous to the district; and

(2) employ agents, consultants, brokers, professionals, or other persons that the board determines are necessary or appropriate to conduct a transaction described by Subdivision (1).

Added by Acts 1997, 75th Leg., ch. 1070, Sec. 15, eff. Sept. 1, 1997.

Sec. 49.227. AUTHORITY TO ACT JOINTLY. A district or water supply corporation may act jointly with any other person or entity, private or public, whether within the State of Texas or the United States, in the performance of any of the powers and duties permitted by this code or any other laws.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.228. DAMAGE TO PROPERTY. A person who wilfully destroys, defaces, damages, or interferes with district or water supply corporation property is guilty of a Class B misdemeanor.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.229. GRANTS AND GIFTS. A district may accept grants, gratuities, advances, and loans in any form from any source approved by the board, including any governmental entity, any private or public corporation, and any other person and may make and enter into contracts, agreements, and covenants the board considers appropriate in connection with acceptance of grants, gratuities, advances, and loans.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.230. AREA-WIDE WASTEWATER TREATMENT. The powers and duties conferred on the district are granted subject to the policy of the state to encourage the development and use of integrated area-wide wastewater collection, treatment, and disposal systems to serve the wastewater disposal needs of the citizens of the state whenever economically feasible and competitive to do so, it being an objective of the policy to avoid the economic burden to the people and the impact on the quality of the water in the state that result from the construction and operation of numerous small wastewater collection, treatment, and disposal facilities to serve an area when an integrated area-wide wastewater collection, treatment, and disposal system for the area can be reasonably provided.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.231. STANDBY FEES. (a) In this section:

(1) "Standby fee" means a charge, other than a tax, imposed on undeveloped property for the availability of potable water, sanitary sewer, or drainage facilities and services.

(2) "Undeveloped property" means a tract, lot, or reserve in the district to which no potable water, sanitary sewer, or drainage connections have been made for which:

(A) water, sanitary sewer, or drainage facilities and services are available;

(B) water supply, wastewater treatment plant capacity, or drainage capacity sufficient to serve the property is available; or

(C) major water supply lines, wastewater collection lines, or drainage facilities with capacity sufficient to serve the property are available.

(b) A district that proposes to provide or actually provides retail potable water or sewer utility services, or drainage services as the principal function of the district, may, with the approval of the commission, adopt and impose on the owners of undeveloped property in the district a standby fee in addition to taxes levied by the district. A district may not impose a standby fee for debt service purposes on undeveloped property unless the facilities and

services available to the property have been financed by the district; however, a district may impose a standby fee for operating and maintaining facilities that it has not financed. The district may impose standby fees in different amounts to fairly reflect the level and type of services and facilities available to serve different property. The intent of the standby fee is to distribute a fair portion of the cost burden for operating and maintaining the facilities and for financing capital costs of the facilities to owners of property who have not constructed improvements but have potable water, sewer, or drainage capacity available. Any revenues collected from the standby fees shall be used to pay operation and maintenance expenses, to pay debt service on the bonds, or both.

(c) If a district described in Subsection (b) desires to adopt and impose a standby fee, the district shall submit to the commission an application for authority to adopt and impose the standby fee. The application must describe the tracts of undeveloped property in the district and state the amount of the proposed fee.

(d) The executive director shall examine an application submitted under Subsection (c) and shall investigate the financial condition of the district, including the district's assets, liabilities, sources of revenue, level of utility service rates, and level of debt service and maintenance tax rates. On the request of the executive director, the district shall submit any information the executive director considers relevant to the examination and investigation. The executive director shall prepare a written report on the application and the district's financial condition, retain a copy of the report, and send a copy of the report to the commission and the district.

(e) Notice of an application submitted under Subsection (c) shall be published by the district in a form provided by the commission. The district shall publish notice in a newspaper of general circulation in the county or counties in which the district is located once a week for two consecutive weeks. The district shall also send notice of the application by certified mail, return receipt requested, to each owner of undeveloped property in the district. On the date the application is filed, the district's tax assessor and collector shall certify to the district the names of the persons owning undeveloped land in the district as reflected by the most recent certified tax roll of the district. Notice of the application must be sent by certified mail, return receipt requested, to each

mortgagee of record that has submitted a written request to be informed of any application for standby fees. The written request for notice must include the name and address of the mortgagee, the name of the property owner in the district, and a brief property description. The commission may act on an application without conducting a hearing if a public hearing is not requested by the commission, the executive director, or an affected person in the manner prescribed by commission rule during the 30 days following publication of the notice or receipt of mail containing the notice under this subsection.

(f) The commission shall consider the application, the report of the executive director, and any other evidence allowed by commission rule. The commission may approve the application only if the commission finds that the fee is necessary to maintain the financial integrity and stability of the district and fairly allocates the costs of district facilities and services among property owners of the district.

(g) The commission shall issue an order approving or disapproving the application. The commission shall retain a copy of the order and send a copy of the order to the district.

(h) The commission may approve the adoption and imposition of the standby fee for a period of not more than three years. The imposition of a standby fee may be renewed for additional periods of not more than three years each in the same manner provided in this section for initial approval of the standby fee.

(i) If approved by the commission, the board by resolution or order may impose an annual standby fee on undeveloped land in the district.

(j) The board may:

(1) charge interest, at the rate of one percent a month, on a standby fee not paid in a timely manner in accordance with the resolution or order imposing the standby fee;

(2) impose a penalty in connection with a standby fee that is not paid in a timely manner in accordance with the resolution or order imposing the standby fee; and

(3) refuse to provide potable water, sanitary sewer, or drainage service to the property for which the fee was assessed until all delinquent standby fees on the property, interest on those fees, and all penalties imposed in connection with the delinquent standby fees are fully paid.

(k) A standby fee imposed under this section is a personal obligation of the person owning the undeveloped property on January 1 of the year for which the fee is assessed. A person is not relieved of the obligation on transfer of title to the property. On January 1 of each year, a lien attaches to undeveloped property to secure payment of any standby fee, interest on the fee, and any penalty imposed under this section. The lien has the same priority as a lien for taxes of the district.

(l) If a standby fee imposed under this section is not paid in a timely manner, a district may file suit to foreclose the lien securing payment of the fee, interest on the fee, and any penalty imposed in connection with the fee or to enforce the personal obligation for the fee, interest on the fee, and any penalty imposed in connection with the fee. In addition to the fee, interest on the fee, and any penalty imposed, the district may recover reasonable costs, including attorney's fees, incurred by the district in enforcing the lien or obligation not to exceed 20 percent of the delinquent fee, interest on the fee, and any penalty. A suit authorized by this subsection must be filed not later than the fourth anniversary of the date the fee became due. A fee delinquent for more than four years, interest on the fee, and any penalty imposed are considered paid unless a suit is filed before the expiration of the four-year period.

(m) Chapter 395, Local Government Code, does not apply to a standby fee imposed under this section.

(n) For purposes of title insurance policies issued under the authority of Title 11, Insurance Code, standby fees are considered taxes.

(o) The amount of the penalty authorized by Subsection (j) is six percent of the amount of the standby fee for the first calendar month the standby fee is delinquent, plus an additional one percent of the amount of the fee for each of the subsequent four months, or portion of each of those months, the fee is unpaid, except that if the fee remains unpaid on the first day of the sixth month after the month in which the fee became due, the amount of the penalty is 12 percent of the amount of the standby fee.

(p) This subsection applies only to the board of a district that has entered into a contract with an attorney for the collection of unpaid standby fees. In addition to the penalty authorized by Subsection (j) and in accordance with the resolution or order

imposing a standby fee, the board may provide that a standby fee that is not paid in a timely manner is subject to a penalty to defray costs of collection of the unpaid standby fee. The amount of the additional penalty under this subsection may not exceed 15 percent of the amount of the standby fee, interest on the fee, and any penalty imposed in connection with the fee. A penalty under this subsection is incurred on the date set by the board. The penalty may be imposed only if the district or the attorney with whom the district has contracted notifies the property owner of the penalty and the amount of the penalty at least 30 but not more than 60 days before the date the penalty is incurred. A district that imposes the additional penalty under this subsection may not collect both the additional penalty and the attorney's fees provided by Subsection (1).

- (1) develop, generate, transmit, or distribute water power and electric energy inside the district's boundaries for its own use;
- (2) purchase electric energy from any available source for use at a facility the district owns, operates, and maintains inside

Sec. 49.234. PROHIBITION OF CERTAIN PRIVATE ON-SITE FACILITIES.

(a) A district or water supply corporation that operates a wastewater collection system to serve land within its boundaries by rule may prohibit the installation of private on-site wastewater holding or treatment facilities on land within the district that is not served by the district's or corporation's wastewater collection system. A district or corporation that has not received funding under Subchapter K, Chapter 17, may not require a property owner who has installed an on-site wastewater holding or treatment facility before the adoption of the rule to connect to the district's or corporation's wastewater collection system.

(b) A district or water supply corporation that prohibits an installation described by Subsection (a) shall agree to pay the owner of a particular tract the costs of connecting the tract to the district's or corporation's wastewater collection system if the distance along a public right-of-way or utility easement from the nearest point of the district's or corporation's wastewater collection system to the boundary line of the tract requiring wastewater collection services is 300 feet or more, subject to commission rules regarding reimbursement of those costs.

(1) the third anniversary of the effective date of the act or proceeding has expired; and

(2) a lawsuit to annul or invalidate the act or proceeding has not been filed on or before that third anniversary.

(E) the amount of tax that would be imposed by the district in the current year on a residence homestead appraised at the average appraised value of a residence homestead in that year, disregarding any homestead exemption available only to disabled persons or persons 65 years of age or older, if the proposed tax rate is adopted; and

(F) the difference between the amounts of tax calculated under Paragraphs (D) and (E), expressed in dollars and cents and described as the annual percentage increase or decrease, as applicable, in the tax to be imposed by the district on the average residence homestead in the district in the current year if the proposed tax rate is adopted; and

(3) contain a statement in substantially the following form:

"NOTICE OF TAXPAYERS' RIGHT TO ROLLBACK ELECTION

"If taxes on the average residence homestead increase by more than eight percent, the qualified voters of the district by petition may require that an election be held to determine whether to reduce the operation and maintenance tax rate to the rollback tax rate under Section 49.236(d), Water Code."

(b) Notice of the hearing shall be:

(1) published at least once in a newspaper having general circulation in the district at least seven days before the date of the hearing; or

(2) mailed to each owner of taxable property in the district, at the address for notice shown on the most recently certified tax roll of the district, at least 10 days before the date of the hearing.

(c) The notice provided under this section may not be smaller than one-quarter page of a standard-size or tabloid-size newspaper of general circulation, and the headline on the notice must be in 18-point or larger type.

(d) If the governing body of a district adopts a combined debt service, operation and maintenance, and contract tax rate that would impose more than 1.08 times the amount of tax imposed by the district in the preceding year on a residence homestead appraised at the average appraised value of a residence homestead in the district in that year, disregarding any homestead exemption available only to disabled persons or persons 65 years of age or older, the qualified voters of the district by petition may require that an election be held to determine whether or not to reduce the tax rate adopted for the current year to the rollback tax rate in accordance with the procedures provided by Sections 26.07(b)-(g) and 26.081, Tax Code. For purposes of Sections 26.07(b)-(g) and this subsection, the rollback tax rate is the current year's debt service and contract tax rates plus the operation and maintenance tax rate that would impose 1.08 times the amount of the operation and maintenance tax imposed by the district in the preceding year on a residence homestead appraised at the average appraised value of a residence homestead in the district in that year, disregarding any homestead exemption available only to disabled persons or persons 65 years of age or older.

- (1) provides potable water or sewer service;
- (2) contracts for or employs peace officers;
- (3) maintains a fire department;
- (4) has within its boundaries:

(A) a private airport with a runway exceeding 5,900 feet in length; and

(B) a hotel; and

- (5) is located in two counties.

(b) The area within a district described by Subsection (a) may not be included without the consent of the district in the boundaries of a municipality that provides law enforcement or fire protection services.

Added by Acts 2005, 79th Leg., Ch. 1356 (S.B. 1498), Sec. 1, eff. June 18, 2005.

Sec. 49.238. IRRIGATION SYSTEMS. (a) A district may adopt and enforce rules that require an installer of an irrigation system:

(1) to hold a license issued under Section 1903.251, Occupations Code; and

(2) to obtain a permit before installing a system within the boundaries of the district.

(b) If a district adopts rules under Subsection (a), the rules shall include minimum standards and specifications for designing, installing, and operating irrigation systems in accordance with Section 1903.053, Occupations Code, and any rules adopted by the Texas Commission on Environmental Quality under that section.

(c) A district may employ or contract with a licensed plumbing inspector, a licensed irrigation inspector, the district's operator, or another governmental entity to enforce the rules.

(d) A district may charge an installer of an irrigation system a fee for obtaining or renewing a permit under Subsection (a)(2). The district shall set the fee in an amount sufficient to enable the district to recover the cost of administering this section.

(e) This section does not apply to:

(1) an on-site sewage disposal system, as defined by Section 366.002, Health and Safety Code; or

(2) an irrigation system:

(A) used on or by an agricultural operation as defined by Section 251.002, Agriculture Code; or

#### **SUBCHAPTER I. CONSTRUCTION, EQUIPMENT, MATERIALS, AND MACHINERY CONTRACTS**

Sec. 49.271. CONTRACTS FOR CONSTRUCTION WORK. (a) Any contract made by the board for construction work shall conform to the provisions of this chapter.

(b) The contract shall contain, incorporate by reference, or have attached to it the specifications, plans, and details for work included in the contract. All work shall be done in accordance with these plans and specifications and any authorized change orders under

the supervision of the board or its designee.

(c) The district may adopt minimum criteria for the qualifications of bidders on its construction contracts and for sureties issuing payment and performance bonds. For construction contracts over \$50,000, the district shall require a person who bids to submit a certified or cashier's check on a responsible bank in the state equal to at least two percent of the total amount of the bid, or a bid bond of at least two percent of the total amount of the bid issued by a surety legally authorized to do business in this state, as a good faith deposit to ensure execution of the contract. Notwithstanding any criteria adopted under this subsection, for a contract for more than \$250,000, the district must accept a bid bond in the amount required by the district as a bid deposit if the bid bond meets the other requirements of this subsection. If the successful bidder fails or refuses to enter into a proper contract with the district, or fails or refuses to furnish the payment and performance bonds required by law, the bidder forfeits the deposit. The payment, performance, and bid bonding requirements of this subsection do not apply to a contract for the purchase of equipment, materials, or machinery not otherwise incorporated into a construction project.

(d) The district may also require attendance by a principal of each prospective bidder at mandatory pre-bid conferences and may make any reasonable additional requirements regarding the taking of bids the district may deem appropriate in order to obtain competitive bids from responsible contractors and to minimize contract disputes.

(e) A district contract for construction work may include economic incentives for early completion of the work or economic disincentives for late completion of the work.

Acts 2009, 81st Leg., R.S., Ch. 87 (S.B. 1969), Sec. 24.006, eff. September 1, 2009.

Sec. 49.272. REPORTS FURNISHED TO PROSPECTIVE BIDDERS. The board shall furnish to any person who desires to bid on construction work, and who makes a request in writing, a copy of the engineer's report or plans and specifications showing the details of the work to be done. The board may charge for each copy of the engineer's report or plans and specifications an amount sufficient to cover the cost of making the copy.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.273. CONTRACT AWARD. (a) The board shall contract for construction and repair and renovation of district facilities and for the purchase of equipment, materials, machinery, and all things that constitute or will constitute the plant, works, facilities, or improvements of the district in accordance with this section. The bidding documents, plans, specifications, and other data needed to bid on the project must be available at the time of the first advertisement and the advertisement shall state the location at which these documents may be reviewed.

(b) A contract may cover all the work to be provided for the district or the various elements of the work may be segregated for the purpose of receiving bids and awarding contracts. A contract may provide that the work will be completed in stages over a period of years.

(c) A contract may provide for the payment of a total sum that is the completed cost of the work or may be based on bids to cover cost of units of the various elements entering into the work as estimated and approximately specified by the district's engineers, or a contract may be let and awarded in any other form or composite of forms and to any responsible person or persons that, in the board's judgment, will be most advantageous to the district and result in the best and most economical completion of the district's proposed plants, improvements, facilities, works, equipment, and appliances.

(d) For contracts over \$75,000, the board shall advertise the letting of the contract, including the general conditions, time, and place of opening of sealed bids. The notice must be published in one or more newspapers circulated in each county in which the district is

located. If there are more than four counties in the district, notice may be published in any newspaper with general circulation in the district. The notice must be published once a week for two consecutive weeks before the date that the bids are opened, and the first publication must be not later than the 14th day before the date of the opening of the sealed bids.

(e) For contracts over \$25,000 but not more than \$75,000, the board shall solicit written competitive bids on uniform written specifications from at least three bidders.

(f) For contracts of not more than \$25,000, the board is not required to advertise or seek competitive bids.

(g) The board may not subdivide work to avoid the advertising requirements specified in this section.

(h) The board may not accept bids that include substituted items unless the substituted items were included in the original bid proposal and all bidders had the opportunity to bid on the substituted items or unless notice is given to all bidders at a mandatory pre-bid conference.

(i) If changes in plans or specifications are necessary after the performance of the contract is begun, or if it is necessary to decrease or increase the quantity of the work to be performed or of the materials, equipment, or supplies to be furnished, the board may approve change orders making the changes. The board may grant authority to an official or employee responsible for purchasing or for administering a contract to approve a change order that involves an increase or decrease of \$50,000 or less. The aggregate of the change orders may not increase the original contract price by more than 25 percent. Additional change orders may be issued only as a result of unanticipated conditions encountered during construction, repair, or renovation or changes in regulatory criteria or to facilitate project coordination with other political entities.

(j) The board is not required to advertise or seek competitive bids for the repair of district facilities if the scope or extent of the repair work cannot be readily ascertained or if the nature of the repair work does not readily lend itself to competitive bidding.

(k) The board may use the reverse auction procedure, as defined by Section 2155.062(d), Government Code, for purchasing.

(l) The board is not required to advertise or seek competitive bids for security or surveillance systems or components of or additions to district facilities relating to security or

surveillance, including systems used for the prevention of terrorist or criminal acts and incidents or acts of war, if the board finds that doing so would compromise the safety and security of district facilities or residents.

(m) In accordance with this section, the board of a district created by special law may elect to contract for the construction and repair and renovation of district facilities and for the purchase of equipment, materials, machinery, and all things that constitute or will constitute the plant, works, facilities, or improvements of the district, notwithstanding a conflicting provision in the district's special law. For such a district, an election under this subsection must be by resolution of the board and applies only to a contract entered into on or after the effective date of the resolution.

Sec. 49.2731. PROCEDURES FOR ELECTRONIC BIDS. (a) A district may receive bids under Section 49.273 through electronic transmission if the board of the district adopts rules to ensure the identification, security, and confidentiality of electronic bids and to ensure that the electronic bids remain effectively unopened until the proper time.

(b) Notwithstanding any other provision of this chapter, an electronic bid or proposal is required to be sealed. A provision of

this chapter that applies to a sealed bid applies to a bid received through electronic transmission in accordance with the rules adopted under Subsection (a).

Added by Acts 2013, 83rd Leg., R.S., Ch. 694 (H.B. 2704), Sec. 2, eff. June 14, 2013.

Sec. 49.274. EMERGENCY APPROVAL OF DISTRICT PROJECTS. If a district experiences an emergency condition that may create a serious health hazard or unreasonable economic loss to the district that requires immediate corrective action, the district may negotiate limited duration contracts to make the necessary repairs. The district shall submit to the executive director details describing the specific serious health hazard or unreasonable economic loss as soon as practicable following the issuance of the contracts. Whenever possible, the district should obtain prior approval of the executive director before authorizing the contract, but failure to obtain prior approval shall not void the contract. This section does not apply to special water authorities.

added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.275. CONTRACTOR'S BOND. Any person, firm, partnership, or corporation to whom a contract is let must give good and sufficient performance and payment bonds in accordance with Chapter 2253, Government Code, and any minimum criteria for sureties issuing such bonds adopted by a district in accordance with Section 49.271.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.276. PAYMENT FOR CONSTRUCTION WORK. (a) The district shall pay the contract price of construction contracts only as provided in this section.

(b) The district will make progress payments under construction contracts monthly as the work proceeds, or at more frequent intervals as determined by the board or its designee, on estimates approved by the board or its designee.

(c) If requested by the district or district engineer, the

contractor shall furnish a breakdown of the total contract price showing the amount included for each principal category of the work, in such detail as requested, to provide a basis for determining progress payments. In the preparation of estimates, the district engineer may authorize material delivered on the site and preparatory work done to be considered if the consideration is specifically authorized by the contract and if the contractor furnishes satisfactory evidence that he has acquired title to the material and that it will be utilized on the work covered by the contract.

(d) In making progress payments, 10 percent of the estimated amount shall be retained until final completion and acceptance of the contract work. However, if the board at any time after 50 percent of the work has been completed finds that satisfactory progress is being made, it may authorize any of the remaining progress payments to be made in full. Also, if the work is substantially complete, the board, if it finds the amount retained to be in excess of the amount adequate for the protection of the district, at its discretion may release to the contractor all or a portion of the excess amount. The district is not obligated to pay interest on amounts retained except as provided herein. The district shall not be obligated to pay any interest on the 10 percent retainage held on the first 50 percent of work completed. If the district holds any retainage on the remaining 50 percent of the work completed, the district shall pay interest on such retainage from the date the retainage is withheld to the date of payment to the contractor. The interest rate to be paid on such retainage shall be the rate of interest paid by the district's depository bank on interest bearing accounts of similar amounts during the period of time interest accrues as provided herein.

(e) On completion and acceptance of each separate project, public work, or other division of the contract, on which the price is stated separately in the contract, payment may be made without retention of a percentage.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.277. INSPECTION OF AND REPORTS ON CONSTRUCTION WORK.

(a) The board shall have control of construction work being done for the district under contract to determine whether or not the contract is being fulfilled and shall have the construction work inspected by

the district engineer or other designated person.

(b) During the progress of the construction work, the district engineer or other designated person shall submit to the board detailed written reports showing whether or not the contractor is complying with the contract, and when the work is completed the district engineer shall submit to the board a final detailed report including as-built plans of the facilities showing whether or not the contractor has fully complied with the contract.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.278. NONAPPLICABILITY. (a) This subchapter does not apply to:

- (1) equipment, materials, or machinery purchased by the district at an auction that is open to the public;
- (2) contracts for personal or professional services or for a utility service operator;
- (3) contracts made by a district engaged in the distribution and sale of electric energy to the public;
- (4) contracts for services or property for which there is only one source or for which it is otherwise impracticable to obtain competition;
- (5) high technology procurements;
- (6) contracts for the purchase of electricity for use by the district; or
- (7) contracts for services related to compliance with a state or federal construction storm water requirement, including acquisition of permits, construction, repair, and removal of temporary erosion control devices, cleaning of silt and debris from streets and storm sewers, monitoring of construction sites, and preparation and filing of all required reports.

(b) Sections 252.021(a) and 252.042, Local Government Code, apply to high technology procurements.

(1) a district located wholly or partially within one or more municipalities or within the extraterritorial jurisdiction of one or more municipalities may determine its prevailing wage rate for public works by adopting the prevailing wage rate of:

(A) one of the municipalities; or

(B) the county in which the district is located or, if the county in which the district is located has not adopted a wage rate, the prevailing wage rate of a county adjacent to the county in which the district is located; and

(2) a district not located wholly or partially within the extraterritorial jurisdiction of a municipality may determine the district's prevailing wage rate by adopting the prevailing wage rate of the county in which the district is located or, if the county in which the district is located has not adopted a wage rate, the wage rate of a county adjacent to the county in which the district is located.

#### **SUBCHAPTER J. ANNEXATION OR EXCLUSION OF LAND**

Sec. 49.301. ADDING LAND BY PETITION OF LANDOWNER. (a) In addition to any other provision provided by law, the owner or owners of land whether or not contiguous to the district or otherwise may file with the board a petition requesting that there be included in the district the land described in the petition by metes and bounds or by lot and block number if there is a recorded plat of the area to be included in the district. The petition may request the district to condition the annexation on certain conditions, including the voter authorization of bonds to serve the area to be annexed.

(b) If the district has bonds, notes, or other obligations outstanding or bonds payable in whole or in part from taxes that have been voted but are unissued, the board shall require the petitioner or petitioners to assume their share of the outstanding bonds, notes, or other obligations and the voted but unissued tax bonds of the

district and authorize the board to levy a tax on their property in each year while any of the bonds, notes, or other obligations payable in whole or in part from taxation are outstanding to pay their share of the indebtedness.

(c) The petition of the landowner to add land to the district shall be signed and executed in the manner provided by law for the conveyance of real estate.

(d) The board shall hear and consider the petition and may add to the district the land described in the petition if it is feasible, practicable, and to the advantage of the district and if the district's system and other improvements of the district are sufficient or will be sufficient to supply the added land without injuring land already in the district.

(e) If the district has bonds payable in whole or in part from taxation that are voted but unissued at the time of an annexation and the petitioners assume the bonds and authorize the district to levy a tax on their property to pay the bonds, then the board may issue the voted but unissued bonds even though the boundaries of the district have been altered since the authorization of the bonds.

(f) Granted petitions shall be filed for record and shall be recorded in the office of the county clerk of the county or counties in which the added land is located.

(g) An order issued by the board under this section is not required to include all of the land described in the petition if the board determines that a change in the description is necessary or desirable.

Amended by Acts 1997, 75th Leg., ch. 1070, Sec. 21, eff. Sept. 1, 1997.

Sec. 49.302. ADDING LAND BY PETITION OF LESS THAN ALL THE LANDOWNERS. (a) In addition to the method of adding land to a district described in Section 49.301, defined areas of land, whether or not they are contiguous to the district, may be annexed to the district in the manner set forth in this section.

(b) A petition requesting the annexation of a defined area signed by a majority in value of the owners of land in the defined area, as shown by the tax rolls of the central appraisal district of

the county or counties in which such area is located, or signed by 50 landowners if the number of landowners is more than 50, shall describe the land by metes and bounds or by lot and block number if there is a recorded plat of the area and shall be filed with the secretary of the board.

(c) It shall be the duty of the board to pass an order fixing a time and place at which the petition for annexation shall be heard that shall not be less than 30 days from the day of the order calling the hearing.

(d) The secretary of the board shall issue a notice setting forth the time and place of the hearing and describing the area proposed to be annexed. Notice of the hearing shall be given by posting copies of the notice in three public places in the district and in one public place in the area proposed to be annexed for at least 14 days before the day of the hearing and by publishing a copy of the notice in a newspaper of general circulation in the county or counties in which the area proposed to be annexed is located one time at least 14 days before the day of the hearing.

(e) If upon the hearing of the petition it is found by the board that the proposed annexation of the area to the district is feasible, practicable, and to the advantage of the district and if the district's system and other improvements of the district are sufficient or will be sufficient to supply the added land without injuring land already in the district, then the board, by order entered in its minutes, may receive the proposed area as an addition to and to become a part of the district. The order adding the proposed territory to the district need not include all of the land described in the petition if at the hearing a modification or change is found necessary or desirable by the board.

(f) A copy of the order annexing land to the district, attested by the secretary of the board, shall be filed and recorded in the deed records of the county or counties in which the district is located if the land is finally annexed to the district.

(g) After the order is recorded the area shall be a component part of the district.

(h) The annexed area shall bear its pro rata share of all bonds, notes, or other obligations or taxes that may be owed, contracted, or authorized by the district to which it has been added.

(i) Before the added area shall be subject to all or any part of the bonds, notes, obligations, or taxes created before the

annexation of the area to the district, the board shall order an election to be held in the district, as enlarged by reason of the annexation of the area, on the question of the assumption of the bonds, notes, obligations, and taxes by the annexed area.

(j) At the same election, the board may also submit a proposition on the question of whether the annexed area should assume its part of the bonds of the district payable in whole or in part from taxes that have been voted previously but not yet issued or sold and the levy of an ad valorem tax on all taxable property within the area annexed along with a tax on the rest of the district for the payment of the bonds.

(k) If the election results favorably, the district shall be authorized to issue its voted but unissued tax bonds even though the boundaries of the district have been changed since the original election approving the bonds.

(l) At the election called for the purpose of determining whether the annexed area shall assume the bonds, notes, or other obligations or taxes of the district, the board in a separate proposition may also submit the question of whether the board should be authorized to issue bonds payable in whole or in part from taxes to provide service to the area annexed.

(m) In the event that the district has bonds, notes, or obligations or taxes that may be owed, contracted, or authorized at the time an area is annexed or if the district has voted but unissued bonds payable in whole or in part from taxes at the time of an annexation, the board may provide in its order annexing an area to the district that the annexation will not be complete or final unless the indebtedness, tax or bond, note, or other obligation assumption election results favorably to the assumption of the district's outstanding bonds, notes, or other obligations and voted but unissued bonds.

(n) If the board elects to submit the question of whether the board should be authorized to issue bonds to provide service to the area annexed, the board may also provide in its order annexing an area to the district that the annexation will not be complete unless the election results favorably to the issuance of bonds to serve the annexed area.

(o) Whenever an election is ordered to be held in the district for the purpose of the assumption of bonds, notes, or other obligations or taxes or the assumption of voted but unissued bonds by

reason of the annexation of any area, then the election shall be held and notice given as provided for bond elections held by the district.

(p) The district has the same right and duty to furnish service to the annexed land that it previously had to furnish service to other land in the district, and the board shall endeavor to serve all land in the district without discrimination.

Amended by Acts 1997, 75th Leg., ch. 1070, Sec. 22, eff. Sept. 1, 1997; Acts 2001, 77th Leg., ch. 1423, Sec. 20, eff. June 17, 2001.

Sec. 49.303. EXCLUDING LAND OR OTHER PROPERTY FROM DISTRICT.

(a) A district may exclude land or other property from the district under this subchapter if the district has no outstanding bonds payable in whole or in part from taxes.

(b) If a district has no outstanding bonds payable in whole or in part from taxes, the board may, on its own motion, call a hearing on the question of the exclusion of land or other property from the district under the provisions of this subchapter, if the exclusions are practicable, just, or desirable.

(c) If a district has no outstanding bonds payable in whole or in part from taxes, the board may hold a hearing on the exclusion of land or other property from the district if a landowner or property owner submits a signed petition to the secretary of the board evidencing the consent of the owners of a majority of the acreage proposed to be excluded and a majority of the taxable property in the district, as reflected by the most recent certified tax roll of the district.

(d) A district that has previously held an election at which approval was given for the issuance of bonds payable in whole or in part from taxes may not rely on that election for the issuance of the bonds if after the bond election, but before the bonds are issued, land or other property is excluded from the district as provided by this subchapter. The board must call and hold another bond election and receive voter approval before issuing those bonds.

(e) A district may not exclude land or other property from the district under this section if the district has issued bonds payable in whole or in part from taxes and those bonds are outstanding.

Amended by Acts 2003, 78th Leg., ch. 248, Sec. 22, eff. June 18, 2003.

Sec. 49.304. HEARING TO ANNOUNCE PROPOSED EXCLUSIONS AND TO RECEIVE PETITIONS. (a) If the board determines that an exclusion hearing should be held as provided by Section 49.303, the board shall give notice of the time and place of a hearing to announce its own conclusions relating to land or other property to be excluded and to receive petitions for exclusion of land or other property.

(b) The board shall publish notice of the hearing once a week for two consecutive weeks in one or more newspapers with general circulation in the district. The first publication shall appear at least 14 days before the day of the hearing.

(c) The notice shall advise all interested property owners of their right to present petitions for exclusions of land or other property and to offer evidence in support of the petitions and their right to contest any proposed exclusion based on either a petition or the board's own conclusions and to offer evidence in support of the contest.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.  
Amended by Acts 2001, 77th Leg., ch. 1423, Sec. 21, eff. June 17, 2001; Acts 2003, 78th Leg., ch. 248, Sec. 23, eff. June 18, 2003.

Sec. 49.305. PETITION. (a) A petition for exclusion of land must accurately describe by metes and bounds or lot and block number the land to be excluded. A petition for exclusion of other property must describe the property to be excluded.

(b) A petition for exclusion shall be filed with the district at least seven days before the hearing and shall state clearly the particular grounds on which the exclusion is sought. Only the stated grounds shall be considered.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.306. GROUNDS FOR EXCLUSION. Exclusions from the district may be made on the grounds that:

(1) to retain certain land or other property within the

district's taxing power would be arbitrary and unnecessary to conserve the public welfare, would impair or destroy the value of the property desired to be excluded, and would constitute the arbitrary imposition of a confiscatory burden;

(2) to retain any given land or other property in the district and to extend to it, either presently or in the future, the benefits, service, or protection of the district's facilities would create an undue and uneconomical burden on the remainder of the district; or

(3) the land desired to be excluded cannot be bettered as to conditions of living and health, provided with water or sewer service, protected from flood, drained, freed from interruption of traffic caused by excess of water on the roads, highways, or other means of transportation serving the land, or otherwise benefited by the district's proposed improvements.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.307. HEARING AND ORDER EXCLUDING LAND. (a) The board may adjourn the hearing from one day to another and until all persons desiring to be heard are heard. The board immediately shall specifically describe all property it proposes to exclude on its own motion and shall hear first any protests and evidence against exclusions proposed on the board's own motion.

(b) After considering all engineering data and other evidence presented to it, the board shall determine whether the facts disclose the affirmative of the propositions stated in Subdivision (1) or (2) or, if appropriate, in Subdivision (3) of Section 49.306. If the affirmative exists, the board shall enter an order excluding all land or other property falling within the conditions defined by the respective subdivisions and shall redefine in the order the boundaries of the district to embrace all land not excluded. A copy of the order excluding land and redefining the boundaries of the district shall be filed in the deed records of the county or counties in which the district is situated.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.3075. EXCLUSION FOR FAILURE TO PROVIDE SUFFICIENT

SERVICES; NO OUTSTANDING BONDS. (a) The board shall call a hearing on the exclusion of land from a district on a written petition filed with the secretary of the board by a landowner whose land has been included in and taxable by the district for more than 20 years if any bonds issued by the district payable in whole or in part from taxes of the district are no longer outstanding and the petition:

(1) includes a signed petition evidencing the consent of the owners of a majority of the acreage proposed to be excluded, as reflected by the most recent certified tax roll of the district;

(2) includes a claim that the district has not met the landowner's proposals and requests for facilities and services sufficient to service the land at full development; and

(3) describes the property to be excluded.

(b) The board shall hold the hearing at the earliest practicable time after receipt of the petition.

(c) Unless the district presents evidence at the hearing that conclusively demonstrates that the requirements and grounds for exclusion described by Subsection (a) have not been met, the board shall enter an order excluding the land from the district and shall redefine in the order the boundaries of the district to embrace all land not excluded.

(d) A copy of an order excluding land and redefining the boundaries of the district shall be filed in the deed records of each county in which the district is located.

(e) This section does not apply to irrigation districts governed by Chapter 58.

Added by Acts 2003, 78th Leg., ch. 853, Sec. 1, eff. June 20, 2003.

Sec. 49.3076. EXCLUSION FOR FAILURE TO PROVIDE SUFFICIENT SERVICES; BONDS OUTSTANDING. (a) The board of a district that has a total area of more than 10,000 acres shall call a hearing on the exclusion of land from the district on or before the 60th day after receiving a written petition filed with the secretary of the board by one or more owners of land more than half the acreage of which has been for more than 20 years included in and taxable by the district if any bonds issued by the district payable in whole or in part from taxes of the district are outstanding and the petition:

(1) is signed by the owners of a majority of the acreage

proposed to be excluded, as reflected by the most recent certified tax roll of the district;

(2) includes a claim that the district does not provide the land with retail utility services;

(3) describes the property to be excluded; and

(4) provides facts necessary for the board to make the findings required by Subsection (b).

(a-1) Repealed by Acts 2013, 83rd Leg., R.S., Ch. 1392, Sec. 5, eff. September 1, 2013.

(b) The board of a district shall exclude land under this section if:

(1) the district does not provide retail utility service to the land described by the petition;

(2) the district has imposed a tax on more than half the acreage of the land for at least 20 years; and

(3) all taxes the district has levied and assessed against the land and all fees and assessments the district has imposed against the land or the owner that are due and payable on or before the date of the petition are fully paid.

(c) Subject to Subsection (c-1), unless the district presents evidence at the hearing that conclusively demonstrates that the requirements and grounds for exclusion described by Subsection (a) have not been met, the board shall enter an order excluding the land from the district and shall redefine in the order the boundaries of the district to embrace all land not excluded.

(c-1) If on or before the date of the exclusion hearing required by Subsection (a) the district and the owner or owners enter into an agreement for utility service to the land proposed to be excluded, the district is not required to enter an order excluding the land from the district. An owner of all or part of the land is not required to enter into a utility agreement that as of the date of the petition:

(1) is not comparable economically or in the level of service provided to the land to the owner's current source of utility service, as may be determined by the owner; or

(2) does not include all utility services required to serve the land.

(d) A copy of an order excluding land and redefining the boundaries of the district shall be filed in the deed records of each county in which the district is located and with the commission.

(e) The exclusion of land under this section does not impair the rights of holders of any outstanding bonds, warrants, or other certificates of indebtedness of the district.

(f) After any land is excluded under this section, the district may issue any unissued additional debt approved by the voters of the district before exclusion of the land under this section without holding a new election. Additional debt issued after land is excluded from the district may not be payable from taxes levied against and does not create a lien against the taxable value of the excluded land.

(g) This section does not apply to irrigation districts governed by Chapter 58.

(g-1) This section does not apply to a district:

(1) whose primary activity is the wholesale supply of raw water and that has fewer than 500 retail customers; or

(2) whose jurisdiction covers four counties and that was created under Section 59, Article XVI, Texas Constitution.

(h) For purposes of this section and Section 49.3077, "land" includes any improvements to the land, and when used in the context of property taxes, "land" has the meaning assigned to "real property" by Section 1.04, Tax Code.

Sec. 49.3077. TAX LIABILITY OF EXCLUDED LAND; BONDS  
OUTSTANDING. (a) In this section:

(1) "Adjusted gross value" means the gross assessed value of property, as of January 1, including land, improvements, and personal property, as determined by the appraisal district for the tax year in which the determination is made, reduced by any state-mandated exemptions but not reduced for any exemptions from taxation that are within the discretion of the governing body of the district.

(2) "Carry costs" means interest calculated at an annual rate equal to the weighted average interest rate of the district debt that accrues on the excluded land's share of the district debt, with reductions for prior payments, from the later of the exclusion date or the last interest payment date for district debt for which district taxes have been levied and collected to the earlier of:

(A) the date of the final interest payment on district debt before the next delinquency for the district's tax collection; or

(B) the earliest dates on which an aggregate amount of district obligations equal to the district debt may be paid at maturity or redeemed at the option of the district, provided the amount is paid in advance of any future district tax levy, using the redemption dates available for the district's outstanding obligations as of the exclusion date.

(3) "District debt" means the principal outstanding from time to time of the tax-supported debt of the district outstanding on the exclusion date, including debt used to refund district debt outstanding on the exclusion date.

(4) "Excluded land" means land that is excluded from a district under Section 49.3076.

(5) "Excluded land payment" means, with respect to excluded land, the sum of the excluded land's share of district debt plus the carry costs, less any taxes collected by the district under Subsection (b).

(6) "Excluded land's share of district debt" means the portion of the district debt that is calculated by multiplying the district debt by a fraction the numerator of which is the adjusted gross value of the excluded land on the exclusion date and the denominator of which is the adjusted gross value of all property in the district on the exclusion date.

(7) "Exclusion date" means the date that the owner files the petition requesting that the excluded land be excluded from the district with the district secretary.

(8) "Termination date" means the earlier of:

(A) the date on which the amount of taxes collected from the excluded land equals the excluded land payment; or

(B) the date on which the excluded land payment is made in full.

(b) Excluded land that has been pledged as security for any

outstanding debt of the district remains pledged for the excluded land's share of district debt until the excluded land payment is paid. A district is entitled to continue to levy and collect debt service taxes on the excluded land until the termination date at the same rate those taxes are levied on the land remaining in the district. From the exclusion date to the termination date, the excluded land remains in the district for the limited purpose of assessment and collection of such taxes. After the termination date, the excluded land is excluded from the district for all purposes, and the district may not levy any further tax on the excluded land.

(c) The district shall apply the taxes collected on the excluded land only to payment of the excluded land payment, which shall be reduced by the amount of taxes collected.

(d) A person is entitled to pay to the district the excluded land payment, in whole or in part, at any time on or after the exclusion date by delivering payment to the district tax assessor-collector. If partial payment is made, the payment is credited first against all carry costs due and owing, and any remainder is credited against the excluded land's share of district debt. After a partial payment, carry costs must be calculated and assessed and collected only on the remaining excluded land's share of district debt.

Sec. 49.3078. PETITION FOR EXCLUSION: ADDITIONAL DUTIES. A landowner who signs a petition for the exclusion of land that is filed with a district under Section 49.3076 must submit a copy of the petition to the commission. On receipt of a copy of a petition, the executive director shall review the most recent financial information for the applicable district, including current debt requirements, debt service cash flow, and proposed debt obligations, to confirm that an exclusion of land conducted in accordance with Sections 49.3076 and 49.3077 does not adversely affect the interests of district bondholders. The executive director shall notify the landowner and the district when the review is complete.

Added by Acts 2013, 83rd Leg., R.S., Ch. 1392 (H.B. [1324](#)), Sec. 3,

eff. September 1, 2013.

Sec. 49.308. SUIT TO REVIEW EXCLUSION. (a) Any person owning an interest in land affected by the order may file a petition within 20 days after the effective date of the order to review, set aside, modify, or suspend the order.

(b) The venue in any action shall be in any district court that has jurisdiction in the county in which the district is located. If the district includes land in more than one county, the venue shall be in the district court having jurisdiction in the county in which the major portion of the acreage of the land sought to be excluded from the district is located.

(c) A person may appeal from the judgment or order of a district court in a suit brought under the provisions of this section to the court of civil appeals and supreme court as in other civil cases in which the district court has original jurisdiction. The appeal is subject to the statutes and rules of practice and procedure in civil cases.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.309. EXCLUSION OF NONIRRIGATED PROPERTY. For the purposes of this section and Sections 49.310 through 49.314, the following definitions shall apply:

- (1)(A) "Nonirrigated property" means land that:
- (i) is not irrigable;
  - (ii) the owners of a majority of the acreage of which no longer intend to irrigate; or
  - (iii) has been subdivided into:
    - (aa) town lots, or town lots and blocks, or small parcels of the same general nature as town lots; or
    - (bb) town blocks and lots designed, intended, or suitable for residential, commercial, or other nonagricultural purposes, as distinguished from farm acreage whether subdivided into a subdivision or not; and
    - (cc) including streets, alleys, parkways, parks, and railroad property and rights-of-way located in the subdivided land.

(B) The property described in Paragraph (A) shall be considered nonirrigated property regardless of whether the land is within or near a municipality and regardless of whether a plat or map of the subdivision has been duly filed for record and recorded in the office of the county clerk of the county in which the land or any part of the land is situated.

(C) The term does not include land that within the year preceding the date of the hearing under Section 49.310 was used for farming or agricultural purposes.

(2) "District" means a water control and improvement, water improvement, or irrigation district the principal purpose of which is furnishing water for the irrigation of agricultural lands or that is principally engaged in furnishing water for the irrigation of agricultural lands.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.310. AUTHORITY TO EXCLUDE LAND. (a) A petition for exclusion may be filed by the owner or owners, or their authorized agent, of a majority in acreage of nonirrigated property included within the boundaries of a district.

(b) Upon receipt of a petition for exclusion, or upon its own motion, a district shall issue an order excluding the property if, after notice and hearing, the board finds that:

(1) the described property is nonirrigated property;

(2) the applicable requirements of Section 49.311 have been satisfied;

(3) the owner or owners do not object to the exclusion of their nonirrigated property; and

(4) it is in the best interest of the district and of the described property to exclude that property from the district.

(c) The district shall follow the notice and hearing provisions and other procedural requirements for excluding territory applicable to that district as set out in Sections 49.303 through 49.307.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.311. CONSENT FROM HOLDERS OF INDEBTEDNESS. If the district has outstanding bonded indebtedness, or indebtedness under a

loan from a governmental agency, a written consent from an authorized representative of the holder or holders of the indebtedness consenting to the exclusion shall be obtained and filed with the district before the hearing.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.312. RESULTS OF EXCLUSION. (a) Except as provided by Section 49.3077, on issuance of an order excluding property, that property is no longer a part of the district and is not entitled to water service from the district.

(b) Any taxes, assessments, or other charges owed to the district at the time of exclusion remain the obligation of the owner of the excluded property and continue to be secured by statutory liens on the property, if any.

(c) Except as provided by Section 49.3077, once land is excluded, the landowner has no further liability to the district for future taxes, assessments, or other charges of the district.

(d) A copy of the order excluding the property from the district certified and acknowledged by the secretary of the board shall be recorded by the district in the real property records of the county in which the excluded property is located as evidence of the exclusion.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Amended by:

Acts 2013, 83rd Leg., R.S., Ch. 1392 (H.B. [1324](#)), Sec. 4, eff. September 1, 2013.

Sec. 49.313. DISTRICT FACILITIES ON EXCLUDED PROPERTY. If any canals, ditches, pipelines, pumps, or other facilities of the district are located on lands excluded by the resolution of the board, the exclusion does not affect or interfere with any rights that the district has to maintain and continue operation of the facilities as located for the purpose of servicing lands remaining in the district.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.314. WATER ALLOCATIONS. (a) After the district adopts an order excluding nonirrigated property, a city or other water supply corporation that serves the excluded land with a potable water supply may petition the district to apply to the commission to convert the proportionate irrigation water allocation of the land excluded as nonirrigated property, as determined by the district, from irrigation use to municipal use allocation.

(b) The district shall make such application to the commission within 30 days of the filing of a petition by the city or water supply corporation that serves the land with a potable water supply, provided the city or other water supply corporation pays the district the amount the district estimates will be its reasonable expenses and attorney's fees incurred in the commission conversion proceedings and enters into an agreement with the district setting forth the basis on which the water allocation shall be delivered, or made available, to the city or water supply corporation covering such terms as the entities may agree to, and in the event the parties cannot agree, such dispute shall not be subject to the jurisdiction of the commission, or its successors, under this code but subject to resolution through alternative dispute resolution. In such commission proceeding, the city or water supply corporation shall provide evidence to the commission of the current or projected need within a five year period for the municipal-use water allocation after such conversion as a condition of such conversion of use of the district's water rights from irrigation use to municipal use.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.315. ADDING AND EXCLUDING LAND BEFORE CONFIRMATION.

(a) A district may add or exclude land in accordance with this subchapter:

(1) after a district is created by order of the commission or another governmental entity or by special Act of the legislature; and

(2) before a confirmation election is held as required by Section 49.102.

(b) If land is added or excluded as provided by this section, the election to confirm the district required by Section 49.102 shall be to confirm the district as modified.

#### **SUBCHAPTER L. FIRE DEPARTMENTS**

Sec. 49.351. FIRE DEPARTMENTS. (a) A district providing potable water or sewer service to household users may, separately or jointly with another district, municipality, or other political subdivision, establish, operate, and maintain, finance with ad valorem taxes, mandatory fees, or voluntary contributions, and issue bonds for a fire department to perform all fire-fighting services within the district as provided in this subchapter and may provide

for the construction and purchase of necessary buildings, facilities, land, and equipment and the provision of an adequate water supply.

(b) After complying with the requirements of this section, the district or districts shall provide an adequate system and water supply for fire-fighting purposes, may purchase necessary land, may construct and purchase necessary buildings, facilities, and equipment, and may employ or contract with a fire department to employ all necessary personnel including supervisory personnel to operate the fire department.

(c) For financing a plan approved in accordance with this section, bonds and ad valorem taxes must be authorized and may be issued or imposed as provided by law for the authorization and issuance of other bonds and the authorization and imposition of other ad valorem taxes of the district.

(d) Two or more districts may contract to operate a joint fire department for their districts and shall include in the contract a system for joint administration and operation of the fire department, the extent of services to be provided, a method for funding the department from funds of each district, and any other terms and conditions the parties consider necessary.

(e) A district may contract with any other person to perform fire-fighting services within the district.

(f) Before a district imposes an ad valorem tax or issues bonds payable wholly or partly from ad valorem taxes to finance the establishment of a fire department, contracts to operate a joint fire department, or contracts with another person to perform fire-fighting services within the district, the district must comply with Subsections (g), (h), and (i).

(g) A district or districts proposing to act jointly shall develop a detailed plan for the establishment, operation, and maintenance of the proposed department, including a detailed presentation of all financial requirements. If a district is entering into a contract under Subsection (e), the district shall develop a plan that describes the contract and includes a presentation of the financial requirements under the contract. A plan required by this subsection may be included in a plan or report otherwise required by this title for the creation of a district or may be submitted to the commission for approval at any time after the creation of the district.

(h) If a plan was not approved by the commission at the time of

the district's creation, after adoption of the plan and any contract by the board, the plan and financial presentation, together with any contract and a written report in a form prescribed by the executive director describing existing fire departments and fire-fighting services available within 25 miles of the boundaries of the district, shall be submitted to the executive director for consideration by the commission under rules adopted by the commission. Before the commission approves the application, it must find that it is economically feasible for the district to implement the plan and meet the provisions of any contract and shall take into consideration in giving its approval the general financial condition of the district and the economic feasibility of the district carrying out the plan or meeting the obligations of the contract. A plan approved by the commission as part of the creation of a district does not require further commission approval unless the district materially alters the plan.

(i) After approval of a plan by the commission, the district shall hold an election to approve the plan, approve bonds payable wholly or partly from ad valorem taxes, and impose ad valorem taxes for financing the plan. The election may be held in conjunction with an election required by Section 49.102.

(j) The operation of a fire department or provision of fire-fighting services is an essential public necessity, and a district may discontinue any and all services, including water and sewer service, to any person who fails to timely pay fire department service fees or any other assessment adopted by the district to support the fire department or the provision of fire-fighting services.

(k) In this section, "fire-fighting services" means all of the customary and usual services of a fire department, including fire suppression, fire prevention, training, safety education, maintenance, communications, medical emergency services, photography, and administration.

(l) A district providing potable water or sewer service to household users may, as part of its billing process, collect from its customers a voluntary contribution on behalf of organizations providing fire-fighting services to the district. A district that chooses to collect a voluntary contribution under this subsection must give reasonable notice to its customers that the contribution is voluntary. Water and sewer service may not be terminated as a result

of failure to pay the voluntary contribution.

Text of subsection as added by Acts 2013, 83rd Leg., R.S., Ch. 105  
(S.B. 902), Sec. 20

(m) If a customer makes a partial payment of a district bill for water or sewer service and includes with the payment a voluntary contribution for fire-fighting services under Subsection (l), the district shall apply the voluntary contribution first to the bill for water or sewer service, including any interest or penalties imposed. The district shall use any amount remaining for fire-fighting services.

Text of subsection as added by Acts 2013, 83rd Leg., R.S., Ch. 991  
(H.B. 2152), Sec. 2

(m) Notwithstanding any other provision of this section, a district may not charge a fee to a recreational vehicle park, as defined by Section 13.087, on the basis of connections the park provides for the park's transient customers. A fee charged to a recreational vehicle park must be based on the park's nonsubmetered master meter connection.

users, and which district includes less than all the territory in at least one county and which, if located within the corporate area of a city, includes less than 75 percent of the incorporated area of the city or which is located outside the corporate area of a city in whole or in substantial part, must first give to the purchaser the written notice provided in this section.

(2) The provisions of this section shall not be applicable to:

"The real property, described below, that you are about to purchase is located in the \_\_\_\_\_ District. which does not have a house, building, or other improvement located thereon and does not substantially utilize the utility capacity available to the property. The district may exercise the authority without holding an election on the matter. As of this date, the most recent amount of the standby fee is \$\_\_\_\_\_. An unpaid standby fee is a personal obligation of the person that owned the property at the time of imposition and is secured by a lien on the property. Any person may request a certificate from the district stating the amount, if any, of unpaid standby fees on a tract of property in the district.

"The district is located in whole or in part in the extraterritorial jurisdiction of the City of \_\_\_\_\_. (e) If the law relating to annexation or district dissolution is amended and causes inaccuracies in the content of the notices prescribed by this section, the district shall revise the content of the notices to accurately reflect current law.

(f) The notice required by this section shall be given to the prospective purchaser prior to execution of a binding contract of sale and purchase either separately or as an addendum or paragraph of a purchase contract. In the event a contract of purchase and sale is entered into without the seller providing the notice required by this subsection, the purchaser shall be entitled to terminate the contract. If, however, the seller furnishes the required notice at or prior to closing the purchase and sale contract and the purchaser elects to close even though such notice was not timely furnished prior to execution of the contract, it shall be conclusively presumed

that the purchaser has waived all rights to terminate the contract and recover damages or other remedies or rights under the provisions of this section. Notwithstanding any provision of this subchapter to the contrary, all sellers, title companies, real estate brokers, and examining attorneys, and any agent, representative, or person acting on their behalf, shall not be liable for damages under the provisions of either Subsection (o) or (p) or liable for any other damages to any person for:

(1) failing to provide the notice required by this section to a purchaser prior to execution of a binding contract of a purchase and sale or at or prior to the closing of the purchase and sale contract when the district has not filed the information form and map or plat as required under Section 49.455; or

(2) unintentionally providing a notice prescribed by this section that is not the correct notice under the circumstances prior to execution of a binding contract of purchase and sale or at or prior to the closing of the purchase and sale contract.

(g) The purchaser shall sign the notice or purchase contract including such notice to evidence the receipt of notice.

(h) At the closing of purchase and sale, a separate copy of such notice with current information shall be executed by the seller and purchaser, acknowledged, and thereafter recorded in the deed records of the county in which the property is located. For the purposes of this section, all sellers, title companies, real estate brokers, and examining attorneys, and any agent, representative, or person acting on their behalf, shall be entitled to rely on the accuracy of the information form and map or plat as last filed by each district under Section 49.455 or the information contained in or shown on the notice form issued by the district under Section 49.453 in completing the notice form to be executed by the seller and purchaser at the closing of purchase and sale. Any information taken from the information form or map or plat as last filed by each district and the information contained in or shown on the notice form issued by the district under Section 49.453 shall be, for purposes of this section, conclusively presumed as a matter of law to be correct. All subsequent sellers, purchasers, title insurance companies, real estate brokers, examining attorneys, and lienholders shall be entitled to rely upon the information form and map or plat filed by the district or the notice form issued by the district under Section 49.453.

(i) For the purposes of this section, an executory contract of purchase and sale having a performance period of more than six months shall be considered a sale under Subsection (a).

(j) For the purposes of the notice form to be given to the prospective purchaser prior to execution of a binding contract of sale and purchase, a seller and any agent, representative, or person acting in the seller's behalf may modify the notice by substitution of the words "January 1, \_\_\_\_" for the words "this date" and place the correct calendar year in the appropriate space. All sellers, and all persons completing the prescribed notice in the sellers' behalf, shall be entitled to rely on the information contained in or shown on the information form and map or plat filed of record by the district under Section 49.455 in completing the prescribed form to be given to the prospective purchaser prior to execution of a binding contract of sale and purchase. Except as otherwise provided in Subsection (h), any information taken from the information form or map or plat filed of record by the district in effect as of January 1 of each year shall be, for purposes of the notice to be given to the prospective purchaser prior to execution of a binding contract of sale and purchase, conclusively presumed as a matter of law to be correct for the period January 1 through December 31 of such calendar year. A seller and any persons completing the prescribed notice in the seller's behalf may provide more recent information, if available, than the information contained in or shown on the information form and map or plat filed of record by the district under Section 49.455 in effect as of January 1 of each year in completing the prescribed form to be given to the purchaser prior to execution of a binding contract of sale and purchase. Nothing contained in the preceding sentence shall be construed to create an affirmative duty on the part of a seller or any persons completing the prescribed notice in the seller's behalf to provide more recent information than the information taken from the information form and map or plat filed of record by the district as of January 1 of each year in completing the prescribed notice to be given to the purchaser prior to execution of a binding contract of sale and purchase. All subsequent sellers, purchasers, title insurance companies, real estate brokers, examining attorneys, and lienholders shall be entitled to rely upon the information form and map or plat filed by the district.

(k) If such notice is given at closing as provided in Subsection (h), a purchaser, or the purchaser's heirs, successors, or

assigns, shall not be entitled to maintain any action for damages or maintain any action against a seller, title insurance company, real estate brokers, or lienholder, or any agent, representative, or person acting in their behalf, by reason of use by the seller of the information filed for record by the district or reliance by the seller on the filed plat and filed legal description of the district in determining whether the property to be sold and purchased is within the district. No action may be maintained against any title company for failure to disclose the inclusion of the described real property within a district when the district has not filed for record the information form, map, or plat with the clerk of the county or counties in which the district is located.

(l) Any purchaser who purchases any real property in a district and who thereafter sells or conveys the same shall on closing of such subsequent sale be conclusively considered as having waived any prior right to damages under this section.

(m) It is the express intent of this section that all sellers, title insurance companies, examining attorneys, vendors of property and tax information, real estate brokers, and lienholders, and any agent, representative, or person acting on their behalf, shall be entitled to rely on the accuracy of the information form and map or plat as last filed by each district or the information contained in or shown on the notice form issued by the district under Section 49.453, or for the purposes of the notice to be given the purchaser prior to execution of a binding contract of sale and purchase the information contained in or shown on the information form and map or plat filed of record by the district in effect as of January 1 of each year for the period January 1 through December 31 of such calendar year.

(n) Except as otherwise provided in Subsection (f), if any sale or conveyance of real property within a district is not made in compliance with the provisions of this section, the purchaser may institute a suit for damages under the provisions of either Subsection (o) or (p).

(o) A purchaser of real property covered by the provisions of this section, if the sale or conveyance of the property is not made in compliance with this section, may institute a suit for damages in the amount of all costs relative to the purchase of the property plus interest and reasonable attorney's fees. The suit for damages may be instituted jointly or severally against the person, firm,

corporation, partnership, organization, business trust, estate, trust, association, or other legal entity that sold or conveyed the property to the purchaser. Following the recovery of damages under this subsection, the amount of the damages shall first be paid to satisfy all unpaid obligations on each outstanding lien or liens on the property and the remainder of the damage amount shall be paid to the purchaser. On payment of all damages respectively to the lienholders and purchaser, the purchaser shall reconvey the property to the seller.

(p) A purchaser of real property covered by the provisions of this section, if the sale or conveyance of the property is not made in compliance with this section, may institute a suit for damages in an amount not to exceed \$5,000, plus reasonable attorney's fees.

(q) A purchaser is not entitled to recover damages under both Subsections (o) and (p), and entry of a final decision awarding damages to the purchaser under either Subsection (o) or (p) shall preclude the purchaser from recovering damages under the other subsection. Notwithstanding any part or provision of the general or special laws or the common law of the state to the contrary, the relief provided under Subsections (o) and (p) shall be the exclusive remedies for a purchaser aggrieved by the seller's failure to comply with the provisions of this section. Any action for damages shall not, however, apply to, affect, alter, or impair the validity of any existing vendor's lien, mechanic's lien, or deed of trust lien on the property.

(r) A suit for damages under the provisions of this section must be brought within 90 days after the purchaser receives the first district tax notice or within four years after the property is sold or conveyed to the purchaser, whichever time occurs first, or the purchaser loses the right to seek damages under this section.

(s) Notwithstanding any provisions of this subchapter to the contrary, a purchaser may not recover damages of any kind under this section if that person:

(1) purchases an equity in real property and in conjunction with the purchase assumes any liens, whether purchase money or otherwise; and

(2) does not require proof of title by abstract, title policy, or any other proof of title.

Amended by Acts 1999, 76th Leg., ch. 715, Sec. 1, eff. Sept. 1, 1999.

Sec. 49.453. NOTICE FORM FROM DISTRICT. (a) A district covered by Section 49.452 shall also maintain in the district office the particular form of Notice to Purchasers required by Section 49.452 to be furnished by a seller to a purchaser of real property in that district and shall, upon written request of any person, issue the notice form completed by a district with all information required to be furnished by the district. A notice form issued by a district under the provisions of this section shall include a written statement that the notice form is being issued by the district, the date of its issuance, and the district's telephone number. A district shall not be required to orally provide the information.

(b) A district may charge a reasonable fee as determined by the district not to exceed \$10 for the issuance of a notice form pursuant to Subsection (a). The notice form shall be delivered by regular mail or made available at the district's office. If a district is requested to deliver the notice form to a person by an alternative method, the district may impose a charge not to exceed the actual cost of such delivery.

(c) A district may delegate the responsibility for issuance of the particular form of Notice to Purchasers to an employee or agent of the district. A district shall file with the commission the name, address, and telephone number of the employee or agent of the district responsible for issuance of the notice forms and shall notify the commission in writing within seven days after there is a change to the information required to be filed with the commission under the provisions of this subsection.

(d) Any notice issued by the district shall contain the information effective as of the date of its issuance.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.454. NOTICE OF UNPAID STANDBY FEES. (a) A district covered by Section 49.452 shall, on the written request of any person, issue a certificate stating the amount of any unpaid standby fees, including interest on the fees, that have been assessed against a tract of property in the district. The district may charge a fee

not to exceed \$10 for each certificate. A certificate issued through fraud or collusion is void.

(b) If the district issues a certificate containing an erroneous statement under Subsection (a) and the owner of the property transfers the property to a good faith purchaser for value, the lien on the property provided by Section 49.231(k) is extinguished to the extent of the error.

(c) This section does not affect the liability for any unpaid standby fees of the former owner of the undeveloped property under Section 49.231(k).

Added by Acts 1995, 74th Leg., ch. 715, Sec. 2, eff. Sept. 1, 1995.

Sec. 49.455. FILING INFORMATION. (a) The board covered by the provisions of Section 49.452 shall file with the county clerk in each of the counties in which all or part of the district is located a duly affirmed and acknowledged information form that includes the information required in Subsection (b), and a complete and accurate map or plat showing the boundaries of the district.

(b) The information form filed by a district under this section shall include:

- (1) the name of the district;
- (2) the complete and accurate legal description of the boundaries of the district;
- (3) the most recent rate of district taxes on property located in the district;
- (4) the total amount of bonds that have been approved by the voters and which may be issued by the district (excluding refunding bonds and any bonds or portion of bonds payable solely from revenues received or expected to be received pursuant to a contract with a governmental entity);
- (5) the aggregate initial principal amount of all bonds of the district payable in whole or part from taxes (excluding refunding bonds and any bonds or portion of bonds payable solely from revenues received or expected to be received pursuant to a contract with a governmental entity) that have been previously issued;
- (6) whether a standby fee is imposed by the district and, if so, the amount of the standby fee;
- (7) the date on which the election to confirm the creation

of the district was held if such was required;

(8) a statement of the functions performed or to be performed by the district; and

(9) the particular form of Notice to Purchasers required by Section 49.452 to be furnished by a seller to a purchaser of real property in that district completed by the district with all information required to be furnished by the district.

If a district has not yet levied taxes, a statement to such effect together with the district's most recent projected rate of debt service tax shall be substituted for Subdivisions (3) and (4).

(c) The information form and map or plat required by this section shall be signed by a majority of the members of the board and by each such officer affirmed and acknowledged before it is filed with the county clerk, and each amendment made to an information form or map shall also be signed by the members of the board and by each such officer affirmed and acknowledged before it is filed with the county clerk.

(d) The information form required by this section shall be filed with the county clerk within 48 hours after the district is officially created. For purposes of this section, the words "officially created" mean the date and hour in which the results of the election to confirm the creation of the district are declared.

(e) Within seven days after there is a change in any of the information contained in the district information form, map, or plat, the district shall file an amendment to the information form, map, or plat setting forth the changes made.

(f) Any person who affirms the corrections and accuracy of and acknowledges an information form, map, or plat, or any amendment to an information form, map, or plat that includes information that is inaccurate or incorrect shall be guilty of a misdemeanor and shall be fined not less than \$100 nor more than \$1,000 for each violation.

(g) If a district fails to file the information required by this section in the time required, the executive director may request the state attorney general or the district or county attorney of the county in which the district is located to seek a writ of mandamus to force the board to prepare and file the necessary information.

(h) Any member of a governing board who wilfully fails or refuses to join in filing an information form, map, or plat or an amendment to an information form, map, or plat under this section shall be guilty of a misdemeanor and shall be fined not less than

\$100 nor more than \$1,000 for each violation. A member of a governing board is presumed to have wilfully failed or refused to join in the filing of an information form, map, or plat or an amendment to an information form, map, or plat if that member was present at the meeting at which the information included in the information form, map, or plat or amendment to the information form, map, or plat was adopted.

(i) If a district covered by this section is dissolved, annexed to another local government, or consolidated with another district, the members of the board shall file a statement of this fact together with the effective date of the dissolution, annexation, or consolidation with the information form. After a district is dissolved and the statement is filed under this subsection, a person who sells or conveys property within the dissolved district is no longer required to give notice under Section 49.452.

(b) A district requesting the commission's authorization to proceed under Chapter 9 of the Federal Bankruptcy Code (11 U.S.C. Sections 901-946) or any other federal bankruptcy law shall file an application with the commission requesting authorization.

(c) The commission shall investigate the financial condition of a district submitting an application under Subsection (b), including its assets, liabilities, and sources of revenues and may require a

district to submit any information that the commission considers material to a determination of whether authorization to proceed in bankruptcy should be granted.

(d) The commission may not authorize a district to proceed in bankruptcy unless the commission determines that the district cannot, through the full exercise of its rights and powers under the laws of this state, reasonably expect to meet its debts and other obligations as they mature.

The term includes associated street and security lighting. A district may accomplish this purpose as provided in this subchapter.

(b) Except as provided by Subsection (a), a district may acquire recreational facilities and obtain funds to develop and maintain them in the same manner as authorized elsewhere in this code for the acquisition, development, and maintenance of other district facilities. A district may charge fees directly to the users of recreational facilities and to water and wastewater customers of the district to pay for all or part of the cost of their development and maintenance. To enforce payment of an unpaid fee charged under this subsection, the district may:

- (1) seek legal restitution of the unpaid fee; and
- (2) refuse use of a recreational facility to the person who

owes the unpaid fee.

(c) The district may not refuse use of facilities or services other than recreational facilities to enforce an unpaid fee.

(b) A district is not required to prorate the costs of a site described by Subsection (a) between the primary water, sewer, or drainage purpose and any secondary recreational facilities purpose if a licensed professional engineer certifies that the site is reasonably sized for the intended water, sewer, or drainage purpose.

(c) The engineer may consider the following factors in determining the reasonableness of the size of a water, sewer, or drainage site:

- (1) the rules, regulations, and design guidelines or criteria of a municipality, county, or other entity exercising jurisdiction;
- (2) sound engineering principles;
- (3) the impact on adjoining property;
- (4) the availability of sites that meet the requirements for the proposed use;
- (5) requirements for sanitary control;
- (6) the need for a buffer zone to mitigate noise or for aesthetic purposes;
- (7) benefits to storm water quality; and
- (8) anticipated expansions of facilities resulting from:
  - (A) future growth and demand for district facilities;
 or
  - (B) changes in regulatory requirements.

Sec. 49.4645. DISTRICT IN CERTAIN COUNTIES: BONDS FOR RECREATIONAL FACILITIES. (a) A district all or part of which is located in Bastrop County, Bexar County, Waller County, Travis County, Williamson County, Harris County, Galveston County, Brazoria County, Montgomery County, or Fort Bend County may issue bonds

supported by ad valorem taxes to pay for the development and maintenance of recreational facilities only if the bonds are authorized by a majority vote of the voters of the district voting in an election held for that purpose. The outstanding principal amount of bonds, notes, and other obligations issued to finance parks and recreational facilities supported by ad valorem taxes may not exceed an amount equal to one percent of the value of the taxable property in the district or, if supported by contract taxes under Section 49.108, may not exceed an amount equal to one percent of the value of the taxable property in the districts making payments under the contract as shown by the tax rolls of the central appraisal district at the time of the issuance of the bonds, notes, and other obligations or an amount greater than the estimated cost provided in the park plan under Subsection (b), whichever is smaller. To establish the value of the taxable property in a district under this section, the district may use an estimate of the value provided by the central appraisal district. The district may not issue bonds supported by ad valorem taxes to pay for the development and maintenance of:

- (1) indoor or outdoor swimming pools; or
- (2) golf courses.

(b) On or before the 10th day before the first day for early voting by personal appearance at an election held to authorize the issuance of bonds for the development and maintenance of recreational facilities, the board shall file in the district office for review by the public a park plan covering the land, improvements, facilities, and equipment to be purchased or constructed and their estimated cost, together with maps, plats, drawings, and data fully showing and explaining the park plan. The park plan is not part of the proposition to be voted on, does not create a contract with the voters, and may be amended at any time after the election held to authorize the issuance of bonds for the development and maintenance of recreational facilities provided under the plan. The estimated cost stated in the amended park plan may not exceed the amount of bonds authorized at that election.

(c) Notice of a bond election for the development and maintenance of recreational facilities must contain the proposition to be voted on, which must include the estimate of the probable cost of design, construction, purchase, acquisition, and maintenance of improvements and additions and incidental expenses connected with the

improvements and the issuance of bonds.

(d) A bond election for the development and maintenance of recreational facilities may be held on the same day as another district election. The board may call a bond election by a separate election order or as part of another election order. The board may submit multiple purposes in a single proposition at an election.

(e) The board may call a bond election for the development and maintenance of recreational facilities as a result of an agreement to annex additional territory into the district.

(f) This section does not apply to a district all or part of which:

(1) is located in Montgomery County; and

(2) includes land within a planned community of at least 15,000 acres of land, of which a majority of the developed acreage is subject to restrictive covenants containing ad valorem assessments.

Added by Acts 2003, 78th Leg., ch. 343, Sec. 6, eff. Sept. 13, 2003.

Amended by:

Acts 2007, 80th Leg., R.S., Ch. 291 (H.B. 1127), Sec. 1, eff. June 15, 2007.

Sec. 49.465. STANDARDS. The board by rule shall establish standards for recreational facilities to be developed and maintained by a district and for the allocation of a district's funds for developing and maintaining recreational facilities in relation to a district's financial requirements for other purposes. To prevent duplication of recreational facilities provided by other governmental entities, rules adopted by the board under this section must require a district, before developing recreational facilities, to make findings that the size and location of the facilities have been established in consideration of municipal or county recreational facilities, whether existing or proposed, that serve or will serve the area in which the district is located.

Added by Acts 2001, 77th Leg., ch. 1423, Sec. 24, eff. June 17, 2001.

Sec. 49.466. COMMISSION RULES. (a) The commission shall adopt

rules regarding the provision and financing of recreational facilities funded through the issuance of bonds that are supported by ad valorem taxes.

(b) The commission rules shall:

- (1) emphasize the primary goal of financing water, sewer, and drainage facilities to serve the district;
- (2) emphasize and encourage the secondary goal of financing recreational facilities; and
- (3) encourage the conveyance of land to be used for recreational facilities.

- (1) that borders the Gulf of Mexico and the United Mexican States; or
- (2) that is adjacent to a county described by Subdivision (1).

Added by Acts 2007, 80th Leg., R.S., Ch. 1430 (S.B. 3), Sec. 2.24, eff. September 1, 2007.

Sec. 49.503. PETITION BY MUNICIPAL WATER SUPPLIER TO CONVERT WATER USE AFTER SUBDIVISION. (a) This section applies only to land:

(1) that is:

(A) subdivided into town lots or blocks or small parcels of the same general nature as town lots or blocks;

(B) designed, intended, or suitable for residential or other nonagricultural purposes, including streets, alleys, parkways, parks, detention or retention ponds, and railroad property and rights-of-way; or

(C) in a subdivision created to meet the requirements of a governmental entity authorized to require a recorded plat of subdivided lands;

(2) that is in a subdivision for which a plat or map has been filed and recorded in the office of the county clerk of each county in which the subdivision is wholly or partly located; and

(3) that is or was assessed as flat rate irrigable property in the municipal water supplier's certificated service area or its corporate area.

(b) A municipal water supplier that serves land described by Subsection (a) may petition the district in accordance with this section to convert the proportionate irrigation water right to the Rio Grande from irrigation use to municipal use with municipal priority of allocation under commission rules, for the use and benefit of the municipal water supplier.

(c) The municipal water supplier must file the petition with the district not later than January 1 after the expiration of two years after the date the plat or map was recorded under Subsection (a). The district shall consider the petition not later than January 31 of the year following the year in which the petition was filed.

(d) The petition must identify by subdivision name or other sufficient description the land that the municipal water supplier supplies or has the right to supply potable water.

(e) This section applies only to one subdivision of the land recorded under Subsection (a). This section does not apply to any further subdivision of the same property.

Added by Acts 2007, 80th Leg., R.S., Ch. 1430 (S.B. 3), Sec. 2.24, eff. September 1, 2007.

Sec. 49.504. EFFECT OF MUNICIPAL WATER SUPPLIER'S FAILURE TO FILE A PETITION. (a) If a municipal water supplier does not file a

petition under Section 49.503, the district may retain the water rights for use by the district or may declare the water as excess and contract for the sale or use of the water as determined by the district.

(b) Before a district may contract for the sale or use of water for more than one year with a purchaser located outside of a county described by Section 49.502, the district must, for 90 days:

(1) make the water available under the same terms to all municipal water suppliers located in those counties; and

(2) advertise the offer to sell or contract for the use of the water by posting notice on:

(A) any website of the Rio Grande Watermaster's Office;

(B) any website of the Rio Grande Regional Water Authority; and

(C) the official posting place for the district's board meetings at the district's office.

(c) If, after the 90th day after the last date on which the district posted notice, a municipal water supplier in a county described by Section 49.502 has not contracted with the district for the sale or use of the water, the district may contract with any other person for the sale or use of the water under the terms of the offer advertised under Subsection (b).

Added by Acts 2007, 80th Leg., R.S., Ch. 1430 (S.B. 3), Sec. 2.24, eff. September 1, 2007.

Sec. 49.505. CALCULATION OF PROPORTIONATE WATER RIGHTS. A district that receives a petition under Section 49.503 shall compute the proportionate amount of water rights to the Rio Grande. The proportionate amount of water rights is equal to the amount of irrigable acres of land in the subdivision multiplied by the lesser of:

(1) 1.25 acre-feet per irrigable acre; or

(2) the sum of all irrigation water rights owned by the district on September 1, 2007, as if the water rights had been converted to municipal use under applicable commission rules, divided by the total amount of irrigable acres of land in the district on September 1, 2007.

Added by Acts 2007, 80th Leg., R.S., Ch. 1430 (S.B. 3), Sec. 2.24,

eff. September 1, 2007.

Sec. 49.506. PROVISION OR CONVERSION OF PROPORTIONATE WATER RIGHTS BY DISTRICT. (a) Not later than the second anniversary of the date the municipal water supplier files a petition under Section 49.503:

(1) a district shall provide the municipal water supplier with the proportionate water rights described by Section 49.505 from the district's existing water rights; or

(2) a district shall, if the district does not have sufficient existing water rights:

(A) apply for appropriate amendments to the district's water rights under commission rules to convert the proportionate water rights from irrigation use to municipal use with municipal priority of allocation; and

(B) provide to the municipal water supplier the converted rights described by Section 49.505.

(b) The district may continue to use the irrigation use water for district purposes until:

(1) the commission approves the amendment to the district's water rights; or

(2) the water is otherwise provided to the municipal water supplier.

(c) A district that applies for appropriate amendments under Subsection (a)(2) shall provide the municipal water supplier with an estimate of the district's reasonable costs for the administrative proceedings. The district is not required to begin the proceedings until the municipal water supplier deposits the amount of the estimate with the district. The municipal water supplier shall pay the district any reasonable costs that exceed the estimate. The district shall refund the balance of the deposit if the actual cost is less than the estimate.

Added by Acts 2007, 80th Leg., R.S., Ch. 1430 (S.B. 3), Sec. 2.24, eff. September 1, 2007.

Sec. 49.507. CONTRACT TO PURCHASE PROPORTIONATE WATER RIGHTS; WATER RIGHTS SALE CONTRACT. (a) A municipal water supplier may

contract to purchase the proportionate water rights described by Section 49.505.

(b) The purchase price may not exceed 68 percent of the current market value, as determined under Section 49.509, for the year that the municipal water supplier petitions the district.

(c) The contract must be in writing in a document entitled "Water Rights Sales Contract."

(d) The contract must include the purchase price for the water rights or, if the consideration for the sale is not monetary, the terms of the sale.

(e) The municipal water supplier shall file the contract with the Rio Grande watermaster not later than the 10th day after the date the contract is executed.

(f) The municipal water supplier shall pay the purchase price when the proportionate amount of water rights is made available to the municipal water supplier.

Sec. 49.508. CONTRACT TO USE PROPORTIONATE WATER RIGHTS; WATER SUPPLY CONTRACT. (a) A municipal water supplier may contract to use water associated with the proportionate water rights described by Section 49.505.

(b) The contract must be for at least 40 years.

(c) The price for the contractual right to use the municipal use water is based on an amount for one acre-foot of municipal use water with a municipal use priority of allocation and may not exceed the sum of:

(1) an amount equal to the district's annual flat rate charge per assessed acre; and

(2) the equivalent of the charge for four irrigations per flat rate acre of irrigable property in the district.

(d) The parties to the contract shall agree on the terms of payment of the contract price.

(e) The board periodically shall determine the flat rate charge and irrigation per acre charge described by Subsection (c).

(f) The contract must be in writing in a document entitled "Water Supply Contract." The contract may contain any terms to which

the parties agree.

(g) The municipal water supplier shall file the contract with the Rio Grande watermaster not later than the 10th day after the date the contract is executed.

Sec. 49.509. DUTY OF RIO GRANDE REGIONAL WATER AUTHORITY TO CALCULATE CURRENT MARKET VALUE. (a) Subject to Subsection (d), the Rio Grande Regional Water Authority annually at its January meeting shall calculate the current market value by using the average price per acre-foot of municipal use water after conversion from irrigation use water to municipal use water with a municipal priority of allocation under commission rules of the last three purchases involving:

- (1) a municipal water supplier;
- (2) a party other than a municipal water supplier; and
- (3) at least 100 acre-feet of municipal use water, with municipal priority of allocation.

(b) The Rio Grande Regional Water Authority shall use information from the water rights sales contracts reported to the Rio Grande Watermaster's Office to calculate the current market value.

(c) The Rio Grande Regional Water Authority shall make the calculation:

- (1) without charging any of the parties involved; and
- (2) using 100 percent of the value of monetary exchanges, not in-kind exchanges.

(d) For purposes of this subsection, "outer boundaries of a district" means a district's boundaries without considering any exclusion of land from inside the district. The Rio Grande Regional Water Authority shall exclude from the calculation of current market value under Subsection (a) any sale between a municipal water supplier and a district if any territory inside the outer boundaries of the district is:

- (1) subject to the municipal water supplier's certificate of convenience and necessity; or
- (2) in the corporate limits of the municipality served by the municipal water supplier, if the municipal water supplier does

not hold a certificate of convenience and necessity.

Added by Acts 2007, 80th Leg., R.S., Ch. 1430 (S.B. 3), Sec. 2.24, eff. September 1, 2007.

Sec. 49.512. MAP OF SERVICE AREA. (a) In this section, "outer boundaries of a district" means district boundaries without considering any exclusion of land from inside the district.

(b) Each municipal water supplier that has a certificate of convenience and necessity service area in the outer boundaries of a district shall file a map of the service area with the district.

(c) The municipal water supplier shall update the map and forward the map to the district when changes are made.

(d) A district periodically shall provide to a municipal water supplier that serves territory in the district a copy of the district's map showing the outer boundaries of the district.

(e) A district may request from a municipal water supplier a map of the municipal water supplier's service area, and a municipal water supplier may request from the district a map of the district's outer boundaries. On request, the district and a municipal water supplier shall provide the map free of charge to each other at least

one time each year. If the district or municipal water supplier receives more than one request a year for a map, the district or municipal water supplier may charge a reasonable fee for the map.

The board shall levy annually sufficient assessments to collect the money required to pay all the district's obligations in full when due regardless of any delinquency in payment of assessments by any tract of land. If collections in any year are insufficient to pay the obligations of the district, the levy shall be increased sufficiently the following year to cover the deficit.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.164. DURATION OF ANNUAL LEVIES FOR CONTRACTS WITH THE UNITED STATES. Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.165. SUPERIORITY OF LIEN TO SECURE CONTRACT WITH THE UNITED STATES. The lien against district land created by a contract

with the United States shall be superior to the lien created by any district bonds approved subsequent to the date of the contract with the United States.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.166. DISTRICT'S AUTHORITY TO SOLICIT COOPERATION, DONATIONS AND CONTRIBUTIONS FROM OTHER AGENCIES. A district organized under the provisions of this chapter may solicit cooperation, donations, and contributions from the United States, the state, or any other state or nation; any county, municipality, water improvement district, water control and improvement district, drainage district, or any other political subdivision of the state; or any person, copartnership, corporation, or association.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.167. EXPENSE OF PROCURING COOPERATION AND CONTRIBUTIONS FROM OTHER AGENCIES. A district may incur reasonable expense to procure cooperation under Section 51.166 of this code in adding to the area of the district or with contributions to the cost of improvements made by the district. The contributions may be either a percentage of cost or a definite annual sum.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.168. AUTHORITY OF CONTRIBUTOR. (a) Any water improvement district, water control and improvement district, levee improvement district, county, city, town, or other political subdivision of the state may contract to contribute to the cost of the construction of drainage, flood-control or water-supply improvements, or the changing of land elevations which need correction. The improvements to be constructed may be outside the contributing district, municipality, or other political subdivision of the state, and may be located outside the state or the United States.

(b) The works may be constructed by any agency.

(c) The contribution shall be proportionate to the benefit

which the contributor will derive from the proposed improvements.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.169. ISSUANCE OF BONDS BY CONTRIBUTOR. (a) The contract may provide for the issuance of bonds by the contributor and for direct payment from the proceeds of the bonds to contractors on the estimates of the engineer for the contributor.

(b) Before issuing bonds, a contributing political subdivision shall submit the contract for contribution to its electors for approval and for authority to issue the bonds, fix a lien to secure the bonds, and levy, assess, and collect taxes to retire the bonds. The procedure by a contributing political subdivision of the state shall conform to the applicable law under which the political subdivision was organized and authorized to create bonded indebtedness.

(c) The disposition of the proceeds of the bonds shall conform to the approved contract of contribution.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.170. ANNUAL TAX BY CONTRIBUTOR. (a) The contract for contribution may provide that instead of issuing bonds the contributor may levy, assess, and collect an annual tax in a specific sum. The levy or assessment is a lien on the property subject to the contributor's taxing power.

(b) The contributor shall collect the tax at its own expense and pay it annually to the district to which the contribution is to be made. The district shall hold the annual payment as a trust fund and annually apply it to the bonds issued by it to provide funds for the construction of the improvements to which the contribution is made.

(c) The contributor shall submit the contract of contribution to its electors for approval and for authority to levy and assess a sufficient tax to meet the annual payments fixed in the contract. The election for the approval of the contract and the authorized taxes for the fulfillment of the contract shall conform to appropriate law under which the contributing political subdivision was organized and authorized to create bonded indebtedness.

(d) Payment of the annual sums of contribution shall conform to the contract of contribution.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.171. CONTRIBUTIONS FROM UNAPPROPRIATED OR AVAILABLE FUNDS OF CONTRIBUTOR. (a) If the proposed contributor has an unappropriated fund or a fund which is not required for actual use even though otherwise appropriated, the fund may be withdrawn from the project which does not need it and may be applied to pay contributions to the cost of the improvements considered to be a benefit to the contributor but to be constructed by another agency or jointly by the contributor and another agency.

(b) The board of the contributing political subdivision may contract for contributions and contribute from an unappropriated or available fund without submitting the contract and contributions to a vote of the electors of the contributor. However, the contributions shall not be made if they impair the ability of the contributor to meet any outstanding obligation or to adequately and economically discharge the contributor's duty to its electorate or constituency.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.172. LIABILITY ON CONTRACTS OF ACQUIRED IRRIGATION SYSTEM. If a district acquires an established irrigation system which has contracted to supply water to others and the holders of the contracts or the lands entitled to service of water are not within the district, the contracts and duties shall be performed by the district in the same manner and to the same extent that any other purchaser of the system would be bound.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.173. AUTHORITY TO LEASE IRRIGATION SYSTEM SERVING THE DISTRICT. (a) The board, by resolution, may lease all or part of any irrigation system serving all or part of the district, including distribution laterals, trunk or transmission canals, pumping plants, intakes, and all usual or necessary appurtenances. The board's

resolution will specify the term of the lease, which may not be more than 40 years.

(b) The board may lease property located partly outside the boundaries of the district and may sell surplus water to other districts and to other consumers.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.174. COVENANTS AND AGREEMENTS INCLUDED IN LEASE. (a) The lease shall expressly state that the sums payable under the terms of the lease and the lease itself shall not constitute an indebtedness or pledge of the general credit of the district within the meaning of any constitutional or statutory limitation of indebtedness. The lease shall contain a statement that payments due under it are not payable from any funds raised or to be raised by taxation.

(b) The lease may contain covenants and agreements which are not inconsistent with the provisions of this code which authorize the lease for:

- (1) the management and operation of the leased properties;
- (2) the imposition and collection of charges for water;
- (3) the disposition of the proceeds of charges;
- (4) the insurance, protection, and maintenance of the leased properties;
- (5) the creation of other obligations payable from the revenues derived from the operation of the leased properties;
- (6) the keeping of books and records by the district; and
- (7) other pertinent provisions which the board considers desirable to assure the payment of amounts due under the lease.

Sec. 51.175. REVENUE FOR PAYMENT OF LEASE RENTAL. (a) All money due the lessor under the lease shall be payable solely from the revenue derived by the district from the sale of water supplied through the leased system.

(b) The board shall set and collect charges for the water supplied through the leased properties to produce sufficient revenue at all times to allow for delinquencies and to pay promptly all

rental payments becoming due under the terms of the lease. The board may agree to deposit this money in a separate fund as a first charge on the gross revenue received each year from sales of water, and which shall not be used for any other purpose.

(c) The board may agree in the lease to pay all expenses of operating and maintaining the leased properties from the fund provided by the board each year for the maintenance and operation expenses of the district so that the gross revenue from sale of water will be available exclusively for payment of rentals until the amount required for rentals each year is paid into the separate rental fund.

(d) If the board includes this agreement in the lease, the board shall provide for the payment of sums into the maintenance fund from sources other than the remaining portions of the gross revenue from the sale of water not required to pay rentals which are sufficient each year to pay all expenses of operating the district and maintaining and operating its properties and facilities, including the leased properties.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.1751. ADDITIONAL SOURCES FOR PAYMENT OF LEASE. (a) Notwithstanding any other provision of this chapter, a district may make payments from tax revenue under a lease of all or any part of an irrigation system as provided in Section 51.173 of this code if the lease is approved by a majority of the qualified voters voting at an election held for that purpose.

(b) An election for the approval of a lease shall be called and conducted, the returns canvassed, and notice of the election given under the same procedure as a bond election in the district. The election may be held on the same day as a bond election of the district.

(c) If the lease is approved at the election and authorized by the board of directors, it shall constitute an obligation against the taxing power of the district, and the district shall levy, assess, and collect taxes to the extent provided in the lease.

Added by Acts 1979, 66th Leg., p. 883, ch. 403, Sec. 2, eff. June 6, 1979.

Sec. 51.176. RECEIVER FOR LEASED IRRIGATION SYSTEM. (a) If the district defaults in the payments due under a lease, the lessor may petition a court of competent jurisdiction to appoint a receiver for the leased properties.

(b) The receiver shall operate the properties and collect and distribute the revenue according to the terms of the lease and the direction of the court.

(c) The receiver has the same rights and powers as the board in its operation of the leased properties.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.177. JOINT LEASE BY TWO OR MORE DISTRICTS. The boards of two or more districts may adopt resolutions to enter into a joint lease under the provisions of Section 51.173 of this code. The joint lease shall specify clearly the respective rights and liabilities of the districts and shall be subject to all the provisions of Sections 51.173-176 of this code.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.178. AUTHORITY TO ACQUIRE IRRIGATION SYSTEM SUBJECT TO MORTGAGE. A district may acquire by gift, grant, or purchase any part of an irrigation system serving the district which is subject to a mortgage or encumbrance. The mortgage or encumbrance shall not be assumed by the district and shall not be an indebtedness of the district but shall constitute solely a charge on the encumbered property and the revenue from it.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.179. REVENUE FOR PAYMENT OF MORTGAGE. (a) The board may determine conclusively by resolution whether the mortgage or encumbrance represents all or part of the cost of the acquired property and constitutes a purchase money lien on the property.

(b) The board may contract to use and pledge its revenue derived solely from the sale of water and services supplied through the acquired properties for the payment of a purchase money lien.

(c) The board also may use revenue from taxation or from the issuance and sale of bonds to pay all or part of the amount due under the encumbrance if a majority of the electors of the district voting at an election on this proposition approve its use.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.180. ELECTION TO APPROVE REVENUE FOR PAYMENT OF MORTGAGE. (a) If tax and bond revenue is pledged to pay amount due under the encumbrance, the district must hold an election and receive the approval of the electors.

(b) An election to approve the use of tax and bond revenue shall be held in the same manner and with the same voters' qualifications as provided for elections on the issuance of the bonds of the district.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

(a) Two or more districts jointly may acquire by gift, grant, or purchase any part of an irrigation system serving the districts subject to a mortgage or encumbrances in the same manner that a single district may acquire the system.

(b) In the proceedings authorizing the acquisition, the boards of the respective districts shall define clearly the respective rights, interest, and liability of the districts in the acquired property and in the mortgage or encumbrance.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.182. AUTHORITY TO LEASE FACILITIES TO WATER CUSTOMERS. (a) A district may lease to any person, firm, or corporation which is a bona fide water customer of the district any of its river pump stations, conveyance canals, off-channel reservoirs, reservoir pump stations, water mains, water treatment plants, or other facilities used in connection with them. The lease may include any of the district's land which is appropriate to the utilization of the leased facilities, including but not limited to land acquired by eminent

domain.

(b) The board and the lessee shall agree on the form of the lease and its terms, conditions, provisions, and stipulations; however, the duration of the lease shall not be longer than the duration of the water contract between the district and the lessee under the primary term of the water contract and any renewal or extension of it.

(c) After a lease to a water customer is authorized by the board, the lease shall be executed by the president or vice president of the board and attested by the secretary. The lease is valid and effective without any other requirement or prerequisite by the district.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.184. PREFERENCE IN USE OF WATER. (a) The board may award the use of district water in the following order of preference and superiority:

- (1) domestic and municipal use;
- (2) industrial use, other than the development of hydroelectric power;
- (3) irrigation;
- (4) development of hydroelectric power;
- (5) pleasure and recreation.

(b) The board may withdraw water from an inferior use and appropriate the water to a superior use when required for the welfare of the district.

(c) The board must use the condemnation procedures in Subchapter F of this chapter for a withdrawal or diversion of the use of water which affects a vested right.

(d) The board may implement the action prescribed in Subsection (b) or in Subsections (b) and (c) above, and shall obtain necessary amendments to the district's permit, certified filing, or certificate of adjudication in the manner provided in Section 11.122 of this code.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.186. TRANSFER OF WATER RIGHT. If there is land in a district which has a water right from a source of supply acquired by the district but the land is difficult or impracticable to irrigate from that source of supply, the district may allow transfer of the water right to other land which is adjacent to the district. The adjacent land may be admitted to the district with the same right of water service as the land from which the water was transferred.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.187. SELLING WATERPOWER PRIVILEGES. (a) The district may enter into a contract to sell waterpower privileges if power can be generated from water flowing from the district's reservoirs or within its canal system.

(b) The sale of waterpower privileges may not interfere with the district's obligation to furnish an adequate supply of water for the purpose for which the district was organized and for municipal purposes in districts which furnish water for municipal purposes.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.194. SALE OF PROPERTY NOT ACQUIRED TO CARRY OUT THE PLANS OF THE DISTRICT. The board may sell property bid in by it at any sale under foreclosure of its tax lien or of its lien for charges or assessments, or any property acquired by it other than for the purpose of carrying out the plans of the district, without formally determining that the property is not required to carry out the plans of the district, without giving notice of the intent of the district to sell the property, and without applying the proceeds of the sale as provided in Section 51.192 of this code.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

1, proposing to provide or actually providing water and sewer services or either of these services to household users as the principal function of the district, may adopt and impose on the owners of undeveloped property in the district a charge or fee on the undeveloped property that is in addition to taxes levied on that property.

(c) If the board of directors of a district covered by this section desires to adopt and impose a charge or fee prohibited by Subsection (b) of this section, it shall submit to the commission a petition for authority to adopt and impose the charge or fee. If the commission finds that it will be in the best interest of the district and property owners of the district, the commission shall approve the adoption and imposition of the charge or fee for a period of not more than three years. The imposition of a charge or fee may be renewed for additional periods of three years in the manner provided in this section for initial approval of the charge or fee.

(b) If a person irrigates more acreage than the person's contract specifies, the person shall pay for the additional service.

(c) The directors also may require a person using irrigation water to execute a negotiable note or notes for all or part of the amount owed under the contract.

This assessment shall be levied against all irrigable land in the district on a per acre basis, whether or not the land is actually irrigated.

(b) The board shall determine from year to year the proportionate amount of the expenses which will be borne by all water users receiving water delivery from the district.

(c) The remainder of the estimated expenses shall be paid by

assessments, charges, fees, rentals, or deposits required of persons in the district who use or who make application to use water. The board shall prorate the remainder among the applicants for irrigation water and may consider:

(1) the acreage each applicant will plant, the crop the applicant will grow, and the amount of water per acre used for irrigation purposes; and

(2) other factors deemed appropriate by the board with respect to water used for other nonirrigation uses.

(d) A landowner of irrigable land in the district or a user of water delivered by the district for any purpose other than irrigation who disputes all or a part of a board order that determines the amount of an assessment, charge, fee, rental, or deposit may file a petition under Section 11.041. (c) The board shall publish notice of the adoption of the resolution once a week for two consecutive weeks in a newspaper with general circulation in the district. (f) If a supplemental contract is made with the United States and bonds are not to be deposited with the United States, it is not necessary to issue bonds. If the district is required to raise money in addition to the amount of the contract, the bonds shall be issued only in the additional amount needed.

(b) The proceeds of the tax shall be devoted exclusively to the payment of the principal and interest on the interim bonds.

(c) None of the provisions of this subchapter relating to interim bonds shall be construed as prohibiting the sale of bonds deposited to the credit of the interest and sinking fund to pay interim bonds or of any other bonds of the district, but if any of these bonds are sold, the district depository shall apply the proceeds to the payment of principal and accrued interest on the interim bonds and the remainder to the purposes for which the bonds were authorized.

(d) If none of the bonds are sold at the time an installment on the principal and interest of interim bonds matures, the depository shall cancel the deposited bonds and attached interest coupons in an amount equal to the principal and interest of the interim bonds paid off and discharged.

(a) As used in this section and in Sections 51.450-51.454 of this code, "net revenue" means income or increment which may come from ownership and operation of the improvements which are encumbered less the proportion of the district's revenue income reasonably required to provide for administration, efficient operation, and adequate maintenance of the district's services and facilities which are encumbered. Net revenue does not include money derived from taxation.

(b) A district which expects net revenue from operations may secure its bonds in any one of the following:

(1) as provided in Section 51.433 of this code;

(2) by entering into a contract to pledge the net revenue of the district and to mortgage and encumber part or all of the property and facilities, franchise, revenue and income from operations, and everything acquired or to be acquired by the district; or

Sec. 51.451. TAXES TO SECURE CERTAIN BONDS. (a) If bonds are secured as provided in Section 51.450(b)(3) of this code, at the time that net revenue together with money derived from taxes accumulates a surplus in the sinking fund equal to the amount required in the succeeding year to liquidate the interest and principal on the district's bonds maturing in that year, the district's annual tax levies may be lowered to produce not less than 25 percent of the bond maturities for the succeeding year.

(b) If three successive years demonstrate that this net revenue is adequate to protect the district's bonds as they mature, the district's tax may be discontinued until further experience demonstrates the necessity to continue the tax to avoid default in the payment of the district's bonds as they mature.

Acts 1971, 62nd Leg., p. 348, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.452. ELECTION. (a) If the district proposes to issue bonds which will be secured under either Section 51.450(b)(2) or 51.450(b)(3) of this code, the proposition shall be presented at an election held under Section 51.413 of this code.

(b) The proposition for issuance of bonds may be submitted at the election held to confirm the creation of the district or at an election called by the board.

If a district issues its original bonds under Section 51.450(b)(2) of this code and later desires to issue bonds payable in whole or in part from taxes or to levy a tax for maintenance purposes, the district shall hold a hearing to exclude land, and at the time provided by law, shall hold another hearing to adopt a plan of taxation. These hearings shall be held before an election is called to approve the issuance of tax-supported bonds or the levy of a maintenance tax.

(b) The district may pay the revenue bonds by entering into contracts to pledge the net revenue derived from the sale of water for irrigation purposes and service charges obtained from the sale and distribution of water for irrigation purposes.

(c) The bonds may be issued in one or more issues under the terms and conditions considered by the board to be advisable.

#### **SUBCHAPTER O. ADDING AND EXCLUDING TERRITORY AND CONSOLIDATING DISTRICTS**

Sec. 51.702. EXCLUSION OF NONAGRICULTURAL AND NONIRRIGABLE LAND FROM THE DISTRICT. After the district is organized, acquires facilities with which to function as an irrigation district, and votes, issues, and sells bonds for the purposes for which the district was organized, land within the district subject to taxation which is not agricultural land or cannot be irrigated in a practicable manner may be excluded from the district by complying with the provisions of Sections 51.703-51.713 of this code.

Acts 1971, 62nd Leg., p. 371, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.703. PREREQUISITE TO APPLICATION FOR EXCLUSION. Acts 1971, 62nd Leg., p. 371, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.704. SUBSTITUTING LAND OF EQUAL ACREAGE AND VALUE. Land which can be irrigated in a practicable manner of at least equal acreage and equal value to the land being excluded must be added to the district simultaneously with the exclusion of the nonagricultural or nonirrigable land.

Acts 1971, 62nd Leg., p. 372, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.705. SECURING APPLICATION TO SUBSTITUTE LAND. The board may require an owner of land in the district who has applied for the exclusion of his nonagricultural or nonirrigable land from the district to procure an application of the owner of land adjoining the boundaries or the canals of the district, and capable of being irrigated in a practicable manner from the facilities of the district, for inclusion in the district of his land in an amount and value at least equal to the land which is to be excluded under the application of the owner of nonagricultural or nonirrigable land. Each application shall set forth the facts concerning the land to be excluded from and the land to be added to the district, including evidence of their reasonable market value.

Acts 1971, 62nd Leg., p. 372, ch. 58, Sec. 1, eff. Aug. 30, 1971.

The application also shall set forth an agreement by the owner of the new land that the land will be subject to future taxes for bond tax and flat rate and all other assessments levied and assessed by the district as though the land had been incorporated originally in the district. The application also shall contain an agreement by the owner of the new land that the land will be subject to the same liens and provisions as all other land in the district and subject to the statutes governing all other land in the district.

Acts 1971, 62nd Leg., p. 372, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.707. CONSENT OF OUTSTANDING BONDHOLDERS. (a) The board shall communicate the contents of the applications to exclude nonagricultural or nonirrigable land and to include an equal amount of irrigable land to the holders of outstanding bonds voted, issued, sold, and delivered by the district and payable from taxes levied on property in the district.

(b) If the consent in writing of 95 percent or more of the bondholders to the plan is filed with the board, the board may hold a hearing on the applications.

Sec. 51.708. NOTICE OF HEARING ON APPLICATIONS. The board shall give notice of the hearing on the applications by publishing the time, place, and nature of the hearing one time in a newspaper published in a county in which all or part of the district is located. The newspaper must have been published regularly for more than 12 months preceding the date of the publication of the notice and must have circulation in the district. The notice shall be published not less than 10 days nor more than 20 days before the date of the hearing.

Acts 1971, 62nd Leg., p. 372, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.710. BOARD'S RESOLUTION TO SUBSTITUTE LAND. If the board finds that all the conditions provided for the exclusion of land and inclusion of other land in the district exist, it may adopt and enter in its minutes a resolution to exclude land which is nonagricultural or nonirrigable in a practicable manner and include

land which may be irrigated from the facilities of the district in a practicable manner.

Acts 1971, 62nd Leg., p. 373, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.711. LIABILITY OF EXCLUDED AND INCLUDED LAND. The land excluded from the district is free from any lien or liability created on the excluded land by reason of its having been included in the district. Land added to the district is subject to all laws, liens, and provisions governing the district and the land in the district.

Acts 1971, 62nd Leg., p. 373, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 51.713. RIGHT TO SERVE NEW LAND INCLUDED IN DISTRICT. The district has the same right to furnish water service to the included land that it previously had to furnish service to the excluded land. The mere inclusion of a larger total acreage than that excluded does not give the district the right to irrigate a larger total acreage or to appropriate a larger quantity or volume of public water for irrigation than the district would have had the right to irrigate or to appropriate before the exclusion and inclusion of the land.

Acts 1971, 62nd Leg., p. 373, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Without reference to the amendment of this section by Acts 1995, 74th Leg., ch. 778, Sec. 2, this section was repealed by Acts 1995, 74th Leg., ch. 715, Sec. 40 effective September 1, 1995.

Sec. 51.714. ADDING LAND BY PETITION OF LANDOWNER. The owner of land may file with the board a petition requesting that the land described by metes and bounds in the petition be included in the district. Notwithstanding any municipal ordinance, resolution, or any other statute to the contrary, a municipality may not require the annexing district or the landowner who is requesting annexation to obtain the municipality's consent to the district's annexation of the additional land if, at the time the petition is filed, the land to be annexed is contiguous to the district and at any time within the preceding 12 months was not located within an area designated by ordinance or resolution of the municipality's governing body as the municipality's water and sewer service area or corporate limits, and the district has not previously issued any bonded indebtedness. The land shall be deemed to be contiguous to the district if it is separated from the district by public land or right of way. A district may not increase its total land area by more than 100 percent in any one calendar year. A municipality's consent shall not be required for the inclusion or annexation of irrigable land within the boundaries of a district primarily engaged in providing irrigation service to lands within its boundaries.

Sec. 51.734. GOVERNING CONSOLIDATED DISTRICTS. (a) After two or more districts are consolidated, they become one district, except for the payment of debts created before consolidation, and are governed as one district.

(b) During a period of 90 days after the date of the election to approve consolidation, the officers of each district shall continue to act jointly as officers of the original districts to wind up the affairs of their respective districts.

(c) The consolidation agreement may provide that the officers of the original districts shall continue to act jointly as officers of the consolidated district until the next general election or name persons to serve as officers of the consolidated district until the next general election if all officers of the original districts agree to resign.

(d) New officers of the consolidated district must qualify as officers of the district within the period of 90 days after the election and shall assume their offices at the expiration of the 90-day period.

(e) The current board shall approve the bond of each new officer.

(f) The consolidation agreement may provide for the establishment of five voting precincts described in the agreement and for the election of one director from each precinct. had not consolidated or contributions from the consolidated district on terms stated in the consolidation agreement.

Acts 1971, 62nd Leg., p. 377, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Upon petition of any landowner or upon the board's own motion, the board may consider a proposal to divide the original district.

(b) A district that:

(1) is located in two or more counties;

(b) The board of the original district shall order the election to be held and shall give notice of the election at least 20 days prior to the election in the manner provided by law for other elections.

(c) The original district shall be divided if a majority of the qualified electors in the original district vote in favor of the division. The resulting districts shall be assigned consecutive letters, corresponding to the number of the original district. For example, Harris County WCID #1 if divided into two districts shall become Harris County WCID #1A and Harris County WCID #1B. No other confirmation election shall be necessary. Provided, however, each resulting district desiring to issue bonds payable wholly or partially from ad valorem taxes shall be required to obtain authorization for the issuance of such bonds by a majority vote of the resident electors of such district voting in an election called for that purpose. Notice of such election shall be given as generally set forth for bond elections in this chapter. Upon the election of such directors, the three directors receiving the greatest number of votes shall serve until May of the first even-numbered year after the expiration of four years from the date of the election and two directors shall serve until May of the first even-numbered year after the expiration of two years from the date of the election.

(d) The temporary directors of each of the resulting districts must qualify as directors of the district pursuant to Section 51.072 within the period of 90 days after the election approving the division of the original district and shall assume their offices at the expiration of the 90-day period.

Added by Acts 1989, 71st Leg., ch. 280, Sec. 1, eff. Aug. 28, 1989.

Sec. 51.752. POWERS OF RESULTING DISTRICTS. (a) After

division, each of the resulting districts shall have all of the power to incur and pay debts created by each district and shall in every respect have the full power and authority of a district created and governed by the provision of this chapter.

(b) Each of the resulting districts shall have the authority to contract with one another for the provision of water, wastewater, and such other matters as the board of directors of each of the districts deems appropriate.

(c) Each of the resulting districts shall assume the obligations of the original district under any agreements or resolutions consenting to the creation of the original district imposed by any municipality having jurisdiction over such creation to the extent that such agreements and resolutions (i) are applicable, (ii) are not contrary to any other law or the provisions of this chapter, and (iii) do not impose obligations that limit the district's powers and authority to issue bonds for any purpose authorized under this chapter. Any such obligations that so limit the district's powers and authority to issue bonds for any purpose authorized under this chapter are void.

(d) Any other obligations of the original district shall be divided pro rata among the resulting districts either on an acreage basis or on such other terms as are satisfactory to such resulting districts.

Sec. 53.178. REGISTERING BONDS. When the attorney general approves the bonds, the comptroller shall register them in a book kept for that purpose. The comptroller shall record the certificate of the attorney general as to the bonds' validity. The bonds are then prima facie valid in any action, suit, or proceeding. In a suit to enforce collection of the bonds and interest on the bonds, the only defense against the validity of the bonds is forgery or fraud.

When the board receives an interest coupon or a bond, it shall credit the account of the depository with the amount received. The board shall then cancel and destroy the bond or coupon.

- (2) the operation of the district's sanitary sewer system, less the reasonable cost of maintaining and operating the system; or
- (3) both the water system and the sanitary sewer system.

(b) The district may also issue bonds for the purposes set out in this section, payable both from ad valorem taxes and the revenues of:

- (1) its water system; or

- (2) its sanitary sewer system; or
- (3) both its water system and sanitary sewer system.

(c) If the district issues combination tax and revenue bonds, it shall levy, assess, and collect ad valorem taxes until the net revenues from the operation of the water system or the sanitary sewer system, together with the revenue from taxes, have accumulated a surplus in the sinking fund at least equal to the principal of and interest on the bonds scheduled to accrue in the next year. When this accumulation is completed, the board may reduce the tax levy to a rate that will produce at least 25 percent of the principal and interest requirements for each of the next succeeding years. When actual experience of three successive years demonstrates that the net revenues are adequate to pay the principal of and the interest on the bonds as they mature, the board may discontinue the tax until it becomes necessary to levy the tax again to avoid default in paying the bonds and interest.

Acts 1971, 62nd Leg., p. 416, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 53.183. ELECTION REQUIRED. (a) A district may not issue bonds as authorized in Section 53.182 of this code unless an election is first held in the district and the proposition is approved by a majority of the electors of the district who vote in the election.

(b) If the election is held to authorize revenue bonds only, the board shall have the ballots printed to allow for voting for or against the proposition: "The issuance of bonds and the pledge of net revenues for the payment of the bonds."

(c) If the election is held to authorize combination tax and revenue bonds, the board shall have the ballots printed to allow for voting for or against the proposition: "The issuance of bonds to be paid for from an adequate pledge of net revenues and levy of ad valorem taxes."

(d) Except as provided in this section, the provisions of Sections 53.172-53.175 of this code, relating to tax bond elections, apply to elections held under this section.

Acts 1971, 62nd Leg., p. 417, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 53.184. REFUNDING BONDS. (a) With the consent of the

holders, a district may refund outstanding bonds by issuing new coupon bonds in their place.

(b) Interest is shown by coupons attached to the bonds. The board may pay the interest on the bonds annually or semiannually.

(c) The board may pay the refunding bonds serially or in any other manner it chooses, but it shall pay the bonds not later than 40 years from the date the bonds are issued.

(d) The board shall issue the bonds in denominations of \$100 or a multiple of \$100. The board shall levy a tax sufficient to meet the payment of principal of and interest on the refunding bonds before the bonds are delivered. The refunding of bonds does not affect any taxes already due.

(e) The board shall issue refunding bonds in the manner provided for other district bonds. The board shall deduct any sum on hand to the credit of any sinking fund account in ascertaining the amount of refunding bonds to be issued, and it shall apply the money to the payment of the outstanding bonds.

(f) The board shall not issue refunding bonds until they are approved by the attorney general and registered by the comptroller. The comptroller shall not register the refunding bonds until the old bonds being replaced are presented to him for cancellation. After the comptroller registers the new bonds, he shall cancel the old bonds and interest coupons and deliver the new bonds to the proper bondholders. The district may present the old bonds for cancellation in installments, and the comptroller may register and deliver a like amount of the new bonds.

Sec. 53.185. RATES AND CHARGES. If the board issues revenue bonds or combination tax and revenue bonds, the board, at the time it authorizes the bonds, shall fix rates and charges for the use of the facilities or the services rendered in an amount which, together with any tax which is levied, will assure the prompt payment of the principal of and interest on the bonds as they mature.

Acts 1971, 62nd Leg., p. 417, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 53.186. INTEREST AND SINKING FUND. (a) A district shall

have an interest and sinking fund. The board shall credit to this fund all taxes collected for the payment of interest or redemption of district bonds.

(b) The board shall use money in this fund only:

- (1) to pay interest on district bonds;
- (2) to cancel and surrender district bonds; and
- (3) to pay the expenses of assessing and collecting the

taxes.

Acts 1971, 62nd Leg., p. 418, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 53.187. INVESTMENT OF SINKING FUND. The board may invest the district's sinking funds in county, municipal, district, or other bonds in which other sinking funds may by law be invested. The board may also invest the sinking funds in bonds of the series to which the funds apply, if the bonds are offered for redemption before maturity on terms the board deems advantageous to the district.

Acts 1971, 62nd Leg., p. 418, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 53.188. LEVY OF TAXES. After the district has issued bonds, the board shall levy taxes on all property in the district, whether real, personal, or mixed. The board shall levy the taxes based on the full value of each piece of property. The board shall levy the taxes in an amount which is enough to pay the interest on the bonds and to create a sinking fund sufficient to redeem and discharge the bonds when they mature. The board shall levy taxes annually for this purpose as long as the bonds are outstanding.

Acts 1971, 62nd Leg., p. 418, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 53.189. ASSESSOR AND COLLECTOR--OFFICE. The assessor and collector shall maintain an office.

Acts 1971, 62nd Leg., p. 418, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 53.190. SUBJECT TO RULES OF BOARD. The assessor and

collector is subject to the rules and regulations of the board in the same manner as provided by law for assessors and collectors of water improvement districts.

Acts 1971, 62nd Leg., p. 418, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 54.011. CREATION OF DISTRICT. A municipal utility district may be created under and subject to the authority, conditions, and restrictions of Article XVI, Section 59, of the Texas Constitution.

Added by Acts 1971, 62nd Leg., p. 774, ch. 84, Sec. 1.

Sec. 54.012. PURPOSES OF A DISTRICT. A district shall be created for the following purposes:

(1) the control, storage, preservation, and distribution of its storm water and floodwater, the water of its rivers and streams for irrigation, power, and all other useful purposes;

(2) the reclamation and irrigation of its arid, semiarid, and other land needing irrigation;

(3) the reclamation and drainage of its overflowed land and other land needing drainage;

(4) the conservation and development of its forests, water, and hydroelectric power;

(5) the navigation of its inland and coastal water;

(8) the preservation of all natural resources of the state.

Added by Acts 1971, 62nd Leg., p. 775, ch. 84, Sec. 1.

Sec. 54.013. COMPOSITION OF DISTRICT. (a) A district may include the area in all or part of any county or counties including all or part of any cities and other public agencies.

(b) The land composing a district need not be in one body, but may consist of separate bodies of land separated by land which is not included in the district.

Added by Acts 1971, 62nd Leg., p. 775, ch. 84, Sec. 1.

Sec. 54.014. PETITION. When it is proposed to create a district, a petition requesting creation shall be filed with the commission. The petition shall be signed by a majority in value of the holders of title of the land within the proposed district, as indicated by the tax rolls of the central appraisal district. If there are more than 50 persons holding title to the land in the proposed district, as indicated by the tax rolls of the central appraisal district, the petition is sufficient if it is signed by 50 holders of title to the land.

(1) describe the boundaries of the proposed district by metes and bounds or by lot and block number, if there is a recorded map or plat and survey of the area;

(2) state the general nature of the work proposed to be done, the necessity for the work, and the cost of the project as then estimated by those filing the petition; and

(3) include a name of the district which shall be generally descriptive of the locale of the district followed by the words Municipal Utility District, or if a district is located within one county, it may be designated "\_\_\_\_\_ County Municipal Utility District No. \_\_\_\_\_." (Insert the name of the county and proper consecutive number.) The proposed district shall not have the same name as any other district in the same county.

Added by Acts 1971, 62nd Leg., p. 775, ch. 84, Sec. 1.

Sec. 54.016. CONSENT OF CITY. (a) No land within the corporate limits of a city or within the extraterritorial jurisdiction of a city, shall be included in a district unless the city grants its written consent, by resolution or ordinance, to the inclusion of the land within the district in accordance with Section 42.042, Local Government Code, and this section. The request to a

city for its written consent to the creation of a district, shall be signed by a majority in value of the holders of title of the land within the proposed district as indicated by the county tax rolls or, if there are more than 50 persons holding title to the land in the proposed district as indicated by the county tax rolls, the request to the city will be sufficient if it is signed by 50 holders of title to the land in the district. A petition for the written consent of a city to the inclusion of land within a district shall describe the boundaries of the land to be included in the district by metes and bounds or by lot and block number, if there is a recorded map or plat and survey of the area, and state the general nature of the work proposed to be done, the necessity for the work, and the cost of the project as then estimated by those filing the petition. If, at the time a petition is filed with a city for creation of a district, the district proposes to connect to a city's water or sewer system or proposes to contract with a regional water and wastewater provider which has been designated as such by the commission as of the date such petition is filed, to which the city has made a capital contribution for the water and wastewater facilities serving the area, the proposed district shall be designated as a "city service district." If such proposed district does not meet the criteria for a city service district at the time the petition seeking creation is filed, such district shall be designated as a "noncity service district." The city's consent shall not place any restrictions or conditions on the creation of a noncity service district as defined by Chapter 54 of the Texas Water Code other than those expressly provided in Subsection (e) of this section and shall specifically not limit the amounts of the district's bonds. A city may not require annexation as a consent to creation of any district. A city shall not refuse to approve a district bond issue for any reason except that the district is not in compliance with valid consent requirements applicable to the district. If a city grants its written consent without the concurrence of the applicant to the creation of a noncity service district containing conditions or restrictions that the petitioning land owner or owners reasonably believe exceed the city's powers, such land owner or owners may petition the commission to create the district and to modify the conditions and restrictions of the city's consent. The commission may declare any provision of the consent to be null and void.

(b) If the governing body of a city fails or refuses to grant

permission for the inclusion of land within its extraterritorial jurisdiction in a district within 90 days after receipt of a written request, a majority of the electors in the area proposed to be included in the district or the owner or owners of 50 percent or more of the land to be included may petition the governing body of the city and request the city to make available to the land the water or sanitary sewer service contemplated to be provided by the district.

(c) If the governing body of the city and a majority of the electors or the owner or owners of 50 percent or more of the land to be included in the district fail to execute a mutually agreeable contract providing for the water or sanitary sewer service requested within 120 days after receipt of the petition, the failure shall constitute authorization for the inclusion of the land in the district under the provisions of this section. Authorization for the inclusion of such land within the district under the provisions of this section shall mean only authorization to initiate proceedings to include the land within the district as otherwise provided by this Act.

(d) The provisions of this section relating to the method of including land in a district without securing the written consent of a city applies only to land within the extraterritorial jurisdiction of a city and does not apply to land within the corporate limits of a city. If the city fails or refuses to grant permission for the inclusion of land in a district or to execute a mutually agreeable contract providing for the water or sanitary sewer service requested within the time limits contained within Subsection (b) or (c) of this section, the applicant may petition the commission for creation of the district or inclusion of the land in a district. The commission shall allow creation or inclusion of the land in a proposed district upon a finding that the city either does not have the reasonable ability to serve or has failed to make a legally binding commitment with sufficient funds available to provide water and wastewater service adequate to serve the proposed development at a reasonable cost to the landowner. The commitment shall provide that construction of the facilities necessary to serve the land shall be commenced within two years, and shall be substantially complete within four and one-half years from the date the petition was filed with the city. Upon any appeal taken to the district court from the commission ruling, all parties to the commission hearing shall be made parties to the appeal. The court shall hear the case within 120

days from the date the appeal is filed. If the case is continued or appealed to a higher court beyond such 120-day period, the court shall require the appealing party in the case of appeal to a higher court or party requesting such continuance to post a bond or other adequate security in the amount of damages that may be incurred by any party as a result of such appeal or delay from the commission action. The amount of the bond or other security shall be determined by the court after notice and hearing. Upon final disposition, a court may award damages, including any damages for delays, attorney's fees, and costs of court to the prevailing party. Under no circumstances shall land within the corporate limits of a city be included in a district without the written consent, by ordinance or resolution, of the city. The provisions of this section shall apply whether the land is proposed to be included in the district at the time of creation of a district or to be included by annexation to a district. A district shall not allow the owner of a tract to connect to the district's water or wastewater system unless such tract is a legally subdivided lot which is part of a recorded subdivision plat or is otherwise legally exempt from the subdivision requirements of the applicable governmental authority.

(e) A city may provide in its written consent to the inclusion of land in a district, that the district construct all facilities to serve the land in accordance with plans and specifications which have been approved by the city. The city may also provide in its written consent that the city shall have the right to inspect all facilities being constructed by a district. The city's consent to the inclusion of land in the district may also contain restrictions on the terms and provisions of the district's bonds and notes issued to provide service to the land and conditions on the sale of the district's bonds and notes if the restrictions and conditions do not generally render the bonds and notes of districts in the city's extraterritorial jurisdiction unmarketable. The city's consent to the inclusion of land in a district may restrict the purposes for which a district may issue bonds to the purposes of the purchase, construction, acquisition, repair, extension and improvement of land, easements, works, improvements, facilities, plants, equipment and appliances necessary to:

- (1) provide a water supply for municipal uses, domestic uses and commercial purposes;
- (2) collect, transport, process, dispose of and control all

domestic, industrial or communal wastes whether in fluid, solid or composite state; and

(3) gather, conduct, divert and control local storm water or other local harmful excesses of water in the district and the payment of organization expenses, operation expenses during construction and interest during construction.

(f) A city may provide in its written consent for the inclusion of land in a district that is initially located wholly or partly outside the corporate limits of the city that a contract ("allocation agreement") between the district and the city be entered into prior to the first issue of bonds, notes, warrants, or other obligations of the district. The allocation agreement shall contain the following provisions:

(1) a method by which the district shall continue to exist following the annexation of all territory within the district by the city, if the district is initially located outside the corporate limits of the city;

(2) an allocation of the taxes or revenues of the district or the city which will assure that, following the date of the inclusion of all the district's territory within the corporate limits of the city, the total annual ad valorem taxes collected by the city and the district from taxable property within the district does not exceed an amount greater than the city's ad valorem tax upon such property;

(3) an allocation of governmental services to be provided by the city or the district following the date of the inclusion of all of the district's territory within the corporate limits of the city; and

(4) such other terms and conditions as may be deemed appropriate by the city.

(g) In addition to all the rights and remedies provided by the laws of the state in the event a district violates the terms and provisions of a city's written consent, the city shall be entitled to injunctive relief or a writ of mandamus issued by a court of competent jurisdiction restraining, compelling or requiring the district and its officials to observe and comply with the terms and provisions prescribed in the city's written consent to the inclusion of land within the district.

(h) A city, other than a city with a population of more than one million that is located primarily in a county with a population

of two million or more, may provide in its written consent for the inclusion of land in a district that after annexation the city may set rates for water and/or sewer services for property that was within the territorial boundary of such district at the time of annexation, which rates may vary from those for other properties within the city for the purpose of wholly or partially compensating the city for the assumption of obligation under this code providing that:

(1) such written consent contains a contract entered into by the city and the persons petitioning for creation of the district setting forth the time and/or the conditions of annexation by the city which annexation shall not occur prior to the installation of 90 percent of the facilities for which district bonds were authorized in the written consent; and that

(2) the contract sets forth the basis on which rates are to be charged for water and/or sewer services following annexation and the length of time they may vary from those rates charged elsewhere in the city; and that

(3) the contract may set forth the time, conditions, or lands to be annexed by the district; and that

(4)(A) Each purchaser of land within a district which has entered into a contract with a city concerning water and/or sewer rates as set forth herein shall be furnished by the seller at or prior to the final closing of the sale and purchase with a separate written notice, executed and acknowledged by the seller, which shall contain the following information:

(i) the basis on which the monthly water and/or sewer rate is to be charged under the contract stated as a percentage of the water and/or sewer rates of the city;

(ii) the length of time such rates will be in effect;

(iii) the time and/or conditions of annexation by the city implementing such rates.

The provisions of Sections 49.452(g)-(p) and (s), Water Code, are herein incorporated by reference thereto, and are applicable to the separate written notice required by Section 54.016(h)(4).

A suit for damages under the provisions of these referenced sections must be brought within 90 days after the purchaser receives his or her first water and/or sewer service charge following annexation, or the purchaser loses his or her right to seek damages

under this referenced section.

(B) The governing board of any district covered by the provisions of this subsection shall file with the county clerk in each of the counties in which all or part of the district is located a duly affirmed and acknowledged statement which includes the information required in Section 54.016(h)(4)(A) and a complete and accurate map or plat showing the boundaries of the district.

The provisions of Sections 49.455(c)-(j), Water Code, are herein incorporated by reference thereto.

(i) This subsection applies only to a city with a population of 500,000 or more located in a county with a population of 1.4 million or more in which two or more cities or towns with a population of 300,000 or more are predominately located. A city may provide in its written consent to the inclusion of land in a district that a district water facility that serves land developed and subdivided into lots of less than one acre must meet the fire flow requirements to which the city is subject.

(j) A city may supplement its written consent in settlement of a water rate dispute with a district, and the terms of the supplement remain in effect after expiration of the written consent unless the city and the district agree otherwise.

A copy of the resolution must be filed in the same manner as required by Subsection (a)(6).

In giving its consent, the municipality may not place any conditions or other restrictions on the expansion of the political subdivision other than those expressly permitted by Section 54.016(e).

(b) In determining if the project is feasible and practicable and if it is necessary and would be a benefit to the land included in the district, the commission shall consider:

(1) the availability of comparable service from other systems, including but not limited to water districts, municipalities, and regional authorities;

proposed district's boundaries accordingly.

(d) If the commission finds that the petition does not conform to the requirements of Section 54.015 of this code or that the project is not feasible, practicable, necessary, or a benefit to the land in the district, the commission shall so find by its order and deny the petition.

(e) A copy of the order of the commission granting or denying a petition shall be mailed to each city having extraterritorial jurisdiction in the county or counties in which the district is located who requested a hearing under Section 49.011.

(b) If the commission finds that the conversion of the district would not serve the best interest of the district and would not be a benefit to the land and property included in the district, it shall enter an order against conversion of the district into one operating under this chapter.

(b) Any district converted into a municipal utility district shall continue to have the power to issue bonds voted before the conversion but yet unissued and levy and collect maintenance taxes, bond taxes, or other taxes which were voted before the conversion.

Sec. 54.037. REGIONAL PLAN IMPLEMENTATION AGENCIES. (a) This section applies only to regional plan implementation agencies, referred to in this section as agency, created as provided below. An agency may only be created in connection with regional planning efforts, and only then when requested by a city. The purpose of this section is to encourage and promote regional planning by cities and to facilitate the implementation of areawide, systematic solutions to water, waste disposal, drainage, and other problems.

(b) The creation of an agency requires that a special petition be filed with the commission. The special petition shall:

(1) describe the boundaries of the proposed agency by metes and bounds or by lot and block number, if there is a recorded map or plat and survey of the area;

(2) describe the regional planning efforts which are in progress or completed as of the date of the petition and the anticipated role of the proposed agency in connection with the implementation of the regional plan;

(3) include a name of the proposed agency, which must be generally descriptive of the locale followed by the words "regional plan implementation agency" and must be different from the name of any other agency in the same county;

(4) be signed by or on behalf of the owner or owners of the fee simple title to 50 percent or more of the surface of the land within the boundaries of the proposed agency, as of the date of the petition, as indicated by the county tax rolls or other title data

acceptable to the commission;

(5) be approved by the governing body of each city having extraterritorial jurisdiction over land within the boundaries of the proposed agency as of the date of the petition, by motion, resolution, or ordinance which certifies that:

(A) the regional planning efforts described in the petition are approved by the city;

(B) in the opinion of the governing body, the creation of the proposed agency would assist in the implementation of such regional plan; and

(C) the city requests and consents to the creation of the proposed agency; and

(6) be endorsed by an officer of each such city to indicate that the petition has been so approved by the governing body.

(c) The application fee for such a special petition is the same as for any ordinary district. After the petition is filed, the standards and procedures for commission review and action are the same as for any ordinary district, except that:

(1) the commission must consider the scope of the regional plan in connection with its findings; and

(2) the requirements for the special petition, above, shall apply in lieu of the requirements for ordinary districts set out in Section 54.014, 54.015, 54.016, or other sections of this code.

(d) The application of an agency for approval of a bond issue must include an agreement between the agency and each city having extraterritorial jurisdiction over land within the agency as of the date of the application. The agreement must identify those facilities which are proposed to be financed from the proceeds of the bond issue in question. It must also identify which of those facilities are part of the regional plan and which are not part of the plan. Those which are part of the regional plan:

(1) may be larger than would otherwise be necessary to serve just the needs of the agency; and

(2) may be constructed by, conveyed to, or otherwise acquired by the city, subject to the terms of such agreement. Those facilities which are not part of the regional plan and are to be financed by the agency must be agreed upon by the city and the agency as being consistent with the regional plan.

(e) An agency may acquire any land, easements, or other property, real or personal, within or without the agency, for any

purpose or function permitted to a district and may elect to condemn either the fee simple title or an easement only. Section 54.212(a) of this code does not apply to an agency. If the mode and manner for condemnation of any type of property is not otherwise prescribed by law, the Texas Water Development Board may prescribe the same by rule.

(f) An agency is a district subject to all provisions of this chapter and other laws relating to districts, except that the special provisions of this section shall take precedence over differing or conflicting provisions elsewhere.

(g) Nothing in this Act waives the requirements of this chapter or other applicable laws relating to voter approval of bond issues.

(3) a municipal utility district's ability to accomplish its purposes.

(b) It is the policy of the state to authorize a municipal utility district in certain circumstances to take action that is necessary to prevent the condition of a street within the district from adversely affecting the control, storage, preservation, and distribution of the state's storm and flood waters, adversely affecting the control, abatement, or change of any shortage or harmful excess of water, or otherwise impeding a district's ability to accomplish its purposes.

(c) A district created by general law or special act of the legislature in existence for at least 10 years may issue bonds for the purpose of repairing or maintaining streets within the district if the bonds are authorized by a majority vote of the resident electors of the district voting in an election called and held for that purpose.

#### **SUBCHAPTER G. TAXES**

Sec. 54.601. TAX LEVY FOR BONDS. At the time bonds payable in whole or in part from taxes are issued, the board shall levy a continuing direct annual ad valorem tax for each year while all or part of the bonds are outstanding on all taxable property within the district in sufficient amount to pay the interest on the bonds as it becomes due and to create a sinking fund for the payment of the principal of the bonds when due or the redemption price at any earlier required redemption date and to pay the expenses of assessing and collecting the taxes.

Added by Acts 1971, 62nd Leg., p. 801, ch. 84, Sec. 1.

Sec. 54.602. ESTABLISHMENT OF TAX RATE IN EACH YEAR. (a)  
 Repealed by Acts 1979, 66th Leg., p. 2330, ch. 841, Sec. 6(a)(3),

eff. Jan. 1, 1982.

(b) In determining the actual rate to be levied in each year, the board shall consider among other things:

(1) the amount which should be levied for maintenance and operation purposes, if a maintenance tax has been authorized;

(2) the amount which should be levied for the payment of principal, interest, and redemption price of each series of bonds or notes payable in whole or in part from taxes;

(3) the amount which should be levied for the purpose of paying all other contractual obligations of the district payable in whole or in part from taxes; and

(4) the percentage of anticipated tax collections and the cost of collecting the taxes.

(c) In determining the amount of taxes which should be levied each year, the board may consider whether proceeds from the sale of bonds have been placed in escrow to pay interest during construction and whether the board reasonably expects to have revenue or receipts available from other sources which are legally available to pay principal of or interest or redemption price on the bonds. The board shall levy a tax in the first full year after issuance of its first series of bonds.

Added by Acts 1971, 62nd Leg., p. 801, ch. 84, Sec. 1. Amended by Acts 1979, 66th Leg., p. 2330, ch. 841, Sec. 6(a)(3), eff. Jan. 1, 1982.

Sec. 54.603. MANDAMUS BY BONDHOLDERS. In the event the board fails or refuses to levy a sufficient tax in each year which, together with other revenues or receipts which may be legally used for these purposes, will be sufficient to pay the required principal of or interest or redemption price on the bonds, notes, or other contractual obligations when due, or to pay the district's other contractual obligations payable from taxes in addition to all other remedies which may be available, the owner of the district's bonds, notes, or other contractual obligations shall be entitled to a writ of mandamus issued by a court of competent jurisdiction to compel the board to levy a sufficient tax to meet the district's obligations to the owners of its bonds, notes, or other contractual obligations.

Added by Acts 1971, 62nd Leg., p. 801, ch. 84, Sec. 1.

(a) After the board of each district has agreed on the terms and conditions of consolidation, which may include the assumption by each district of the bonds, notes, or other obligations and voted but unissued bonds of the other consolidating districts payable in whole or in part from taxation, the levy of taxes to pay for the bonds, and adoption of a name for the consolidated district, the board shall order an election in each district to determine whether the districts should be consolidated.

(b) The directors of each district shall order the election to be held on the same day in each district and shall give notice of the election for the time and in the manner provided by law for bond elections.

Sec. 54.730. GOVERNING CONSOLIDATED DISTRICTS. (a) After two or more districts are consolidated, they become one district and are

governed as one district, except for the payment of debts created before consolidation if the conditions of consolidation do not provide for the assumption by each district of the bonds, notes, or other obligations and voted but unissued bonds of the other consolidating districts.

(b) During a period of 90 days after the date of the election to approve consolidation, the officers of each district shall continue to act jointly as officers of the original districts to settle the affairs of their respective districts.

(c) The consolidation agreement may provide that the officers of the original districts shall continue to act jointly as officers of the consolidated district until the next general election or name persons to serve as officers of the consolidated district until the next general election if all officers of the original districts agree to resign. At the next general election, directors will be elected for the consolidated district in the same manner and for the same term as directors elected at a confirmation election.

(b) If each district assumed the other's bonds, notes, and other obligations, taxes may be levied uniformly on all taxable property within the consolidated district in payment of the debts.

Added by Acts 1971, 62nd Leg., p. 811, ch. 84, Sec. 1.

Sec. 54.732. ASSESSMENT AND COLLECTION OF TAXES. After consolidation, the district shall assess and collect taxes on property in the original districts to pay debts created by the original districts unless each district has assumed the bonds, notes, or other indebtedness payable in whole or in part from taxation of the other consolidating districts.

Added by Acts 1971, 62nd Leg., p. 811, ch. 84, Sec. 1. Amended by Acts 1995, 74th Leg., ch. 715, Sec. 21, eff. Sept. 1, 1995.

Sec. 54.733. VOTED BUT UNISSUED BONDS. In the event any consolidating district has voted but unissued bonds payable in whole or in part from taxation and the consolidated district assumed the voted but unissued bonds and the consolidated district was authorized to levy taxes to pay for the bonds, then the consolidated district shall be authorized to issue the voted but unissued bonds in the name of the consolidated district and levy a uniform tax on all taxable property in the consolidated district to pay for the bonds.

Added by Acts 1971, 62nd Leg., p. 811, ch. 84, Sec. 1. Amended by Acts 1995, 74th Leg., ch. 715, Sec. 22, eff. Sept. 1, 1995.

(b) If a majority of the board finds at any time before the authorization of bonds, notes, or other obligations or the final lending of its credit in another form that the proposed undertaking for any reason is impracticable or apparently cannot be successfully and beneficially accomplished, the board may issue notice of a hearing on a proposal to dissolve the district.

Added by Acts 1971, 62nd Leg., p. 811, ch. 84, Sec. 1.

Sec. 54.735. NOTICE OF HEARING. The board shall post notice of the hearing on the bulletin board at the courthouse door of each

county in which the district is located and at three or more other public places within the boundaries of the district and shall publish notice of the hearing two times in a newspaper with general circulation in the district. The notice must be posted and published at least 14 days before the hearing on the proposed dissolution of the district.

Added by Acts 1971, 62nd Leg., p. 811, ch. 84, Sec. 1.

Otherwise the board shall enter its order providing that the district has not been dissolved.

Added by Acts 1971, 62nd Leg., p. 812, ch. 84, Sec. 1.

Added by Acts 1971, 62nd Leg., p. 812, ch. 84, Sec. 1.

Sec. 54.739. SUBSTITUTING LAND OF EQUAL VALUE. may be excluded and other land not within the boundaries of the district may be included within the boundaries of the district without impairment of the security for payment of the bonds or invalidation of any prior bond election, as provided by this section and Sections 54.740 through 54.747.

Sec. 54.740. REQUISITES FOR APPLICATION FOR EXCLUSION. An owner of land in the district not receiving services from the district may apply for its exclusion from the district boundaries if all taxes levied and assessed by the district on the land to be excluded have been fully paid. The application shall set forth facts concerning the land proposed for exclusion, including evidence of the reasonable market value of the land, and state that the other requisites for the exclusion of the land and substitution of other land have been fulfilled or will be fulfilled at the hearing on the application. The application shall be verified and acknowledged in a recordable form as conveyances of real property.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 23, eff. Sept. 1, 1995.

Sec. 54.741. INCLUSION OF SUBSTITUTE LAND REQUIRED. An application for exclusion can only be considered by the board if an application is filed by an owner of other land lying outside the boundaries of the district seeking inclusion of land that can be served in a practical manner by the district of at least equal value to the land proposed for exclusion. Such land must be included within the district boundaries and taxing jurisdiction of the district simultaneously with the exclusion of the land proposed for exclusion. Such included land must be of sufficient acreage to avoid an impairment of the security for payment of voted and issued bonds and any other contract obligations payable or secured, in whole or in part, from ad valorem taxes or revenues of the district.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 23, eff. Sept. 1, 1995.

Sec. 54.742. APPLICATION FOR INCLUSION. The application submitted by an owner of land proposed for inclusion shall set forth that the owner of the new land assumes the payment of all taxes, assessments, and fees levied on the land and assessed by the district after the date the land is included in the district. The application shall also set forth an agreement by the owner of the land proposed for inclusion that the land will be subject to future taxes for bond tax and other assessments and fees levied and assessed by the district and be subject to the same liens and provisions and statutes governing all other lands in the district as though the land had been incorporated originally in the district. The application for inclusion shall be verified and acknowledged in a recordable form as conveyances of real property.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 23, eff. Sept. 1, 1995.

Sec. 54.743. NOTICE OF HEARING AND HEARING PROCEDURES. Added by Acts 1995, 74th Leg., ch. 715, Sec. 23, eff. Sept. 1, 1995.

Sec. 54.744. IMPAIRMENT OF SECURITY. (a) For purposes of the board's consideration of the applications, the lands proposed for inclusion shall be deemed to be sufficient to avoid an impairment of the security for payment of obligations of the district if:

(1) according to the most recent tax roll of the district or the most recently certified estimates of taxable value from the chief appraiser of the appropriate appraisal district, the taxable value of such included lands equals or exceeds the taxable value of the excluded lands; and

(2) either the estimated costs of providing district facilities and services to such included lands is equal to or less

than the estimated costs of providing district facilities and services to the excluded lands or any increased estimated costs of providing district facilities and services to the included land, as determined by the district's engineer, can be amortized at prevailing bond interest rates and maturity schedules and the prevailing debt service tax rate of the district, as determined by the district's professional financial advisor, when applied to the increase in taxable value of the included land over the taxable value of the excluded land.

(b) If the district has any outstanding bonds or contract obligations payable in whole or in part by a pledge of net revenues from the ownership or operation of the district's facilities at the time the board considers an application, the lands proposed for inclusion shall be deemed to be sufficient to avoid an impairment of the security for payment of obligations of the district if the projected net revenues to be derived from the lands to be included during the succeeding 12-month period, as determined by the district's engineer, equals or exceeds the projected net revenues that would otherwise have been derived from the lands to be excluded during the same period.

(c) In this section, the taxable value of included land means the market value of the land if, before or contemporaneously with the inclusion of the land in the district, the owner of the land waives the right to special appraisal of the land as to the district under Section 23.20, Tax Code.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 23, eff. Sept. 1, 1995.  
Amended by Acts 2003, 78th Leg., ch. 248, Sec. 32, eff. June 18, 2003.

Sec. 54.745. BOARD'S RESOLUTION TO SUBSTITUTE. If the board finds that all the conditions provided for the exclusion of land and inclusion of other land in the district exist and that it is in the best interest of the district to grant such applications, it may adopt and enter in its minutes a resolution and order excluding all or part of the land proposed for exclusion and including all or part

of the land proposed for inclusion. Prior to the effective date of the exclusion and inclusion of lands, the district shall have received payment of all fees, charges, assessments, taxes, together with any associated penalties and interest due or overdue in respect to the lands excluded, and if no ad valorem taxes or fees have yet been established by the district for the current year, an amount determined by the district to equal the estimated ad valorem taxes and standby fees to be established by the district for the current year, prorated to the date of exclusion with respect to such excluded lands, shall also be paid.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 23, eff. Sept. 1, 1995.

Sec. 54.746. LIABILITY OF EXCLUDED AND INCLUDED LAND. The land excluded from the district is free from any lien or liability created on the excluded land by reason of its having been included in the district. Land included in the district is subject to all laws, liens, and provisions governing the district and the land in the district.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 23, eff. Sept. 1, 1995.

Sec. 54.747. SERVICE TO INCLUDED LAND. The district has the same right and obligation to furnish services to the included land that it previously had to furnish to the excluded land.

Added by Acts 1995, 74th Leg., ch. 715, Sec. 23, eff. Sept. 1, 1995.

Sec. 54.748. EXCLUSION OF LAND FOR FAILURE TO PROVIDE SUFFICIENT SERVICES; BONDS OUTSTANDING. (a) This section applies only to a district that has a total area of more than 5,000 acres.

(b) The board shall call a hearing on the exclusion of land from the district on a written petition filed with the secretary of the board by a landowner whose land has been included in and taxable by the district for more than 28 years if any bonds issued by the district payable in whole or in part from taxes of the district are outstanding and the petition:

(1) includes a signed petition evidencing the consent of

the owners of a majority of the acreage proposed to be excluded, as reflected by the most recent certified tax roll of the district;

(2) includes a claim that the district has not provided the land with utility services;

(3) describes the property to be excluded;

(4) provides, at the petitioner's expense, facts necessary for the board to make the findings required by Subsection (c); and

(5) is filed before August 31, 2005.

(c) The board may exclude land under this section only on finding that:

(1) the district has never provided utility services to the land described by the petition;

(3) all taxes the district has levied and assessed against the land and all fees and assessments the district has imposed against the land or the owner that are due and payable on or before the date of the petition are fully paid; and

(4) the executive director has reviewed the economic impact of the proposed exclusion of land and does not oppose the exclusion.

(d) If evidence presented at the hearing conclusively demonstrates that the requirements and grounds for exclusion described by Subsections (b) and (c) have been met, the board may enter an order excluding the land from the district. If the board enters an order excluding the land, the board shall redefine in the order the boundaries of the district to embrace all land not excluded.

(e) A copy of an order excluding land and redefining the boundaries of the district shall be filed in the deed records of the county in which the district is located.

(f) The exclusion of land under this section does not impair the rights of holders of any outstanding bonds, warrants, or other certificates of indebtedness of the district.

(g) After any land is excluded under this section, the district may issue any unissued additional debt approved by the voters of the district before exclusion of the land under this section without holding a new election. Additional debt issued after land is excluded from the district may not be payable from and does not create a lien against the taxable value of the excluded land.

(h) For purposes of this section and Section 54.749, "land"

includes any improvements to the land, and when used in the context of property taxes, "land" has the meaning assigned to "real property" by Section 1.04, Tax Code.

Sec. 54.749. TAX LIABILITY OF EXCLUDED LAND; BONDS OUTSTANDING. (a) Land excluded from the district under Section 54.748 that is pledged as security for any outstanding debt of the district remains pledged for its pro rata share of the debt until final payment is made. The district shall continue to levy and collect taxes on the excluded land at the same rate levied on land remaining in the district until the amount of taxes collected from the excluded land equals the land's pro rata share of the district's debt outstanding at the time the land was excluded from the district.

(b) The district shall apply the taxes collected on the excluded land only to the payment of the excluded land's pro rata share of the debt.

Added by Acts 2003, 78th Leg., ch. 248, Sec. 33, eff. June 18, 2003.

For the remainder of the term of the bonds, the coupons shall be paid annually in equal amounts which are sufficient to liquidate the remainder of the bonds within 40 years from the date

(c) The members of the commissioners court are not entitled to receive any compensation for the exercise of these functions, powers, rights, and duties.

(b) The engineer shall make maps and profiles of the canals, drains, ditches, and levees located in the district and their outlets extending beyond the boundaries of the district.

(c) A copy of the land office map of the county which shows the name and number of each survey and the area or number of acres within the district is sufficient to comply with the requirement for a map of the district, and any recognized map of a city or town in the district is sufficient to comply with the requirement for a map of that city or town.

Acts 1971, 62nd Leg., p. 507, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 56.116. MAPS AND ESTIMATES. (a) The map and profile shall include the relation that each canal, drain, ditch, or levee bears to each tract of land through which it passes and the shape into which the canal, drain, ditch, or levee divides each tract.

(b) If any canal, drain, ditch, or levee cuts off any tract containing less than 20 acres of land, the map shall show:

- (1) the number of acres divided from the tract;
- (2) the number of acres in the whole tract;

(3) the shape of the small tract; and

(4) the relation of the small tract to the canal, ditch, drain, or levee.

(c) The profile may show the number of cubic yards necessary to be excavated to make each canal, drain, or ditch and to build any levee located in the district and may give the estimated cost of each.

(d) When the map, profile, and estimates are completed, the engineer shall sign them in his official capacity and file them with the clerk of the commissioners court.

Acts 1971, 62nd Leg., p. 507, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 56.120. RAILROAD CULVERTS. (a) At the expense of the district, the board may construct necessary bridges and culverts across or under a track or right-of-way of a railroad to enable the district to construct and maintain a necessary canal, drain, or ditch.

(b) Before the board constructs a bridge or culvert, the board shall give notice to the railroad authorities authorized to build or construct bridges and culverts and shall allow the railroad 30 days to build the bridge or culvert at its own expense and according to its own plans.

(c) Bridges or culverts shall be constructed so they will not interfere with the free and unobstructed flow of water passing through the canals and drains and shall be placed at points designated by the engineer.

Acts 1971, 62nd Leg., p. 508, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Acts 1971, 62nd Leg., p. 508, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 56.122. CONSTRUCTING BRIDGES AND CULVERTS IN CERTAIN

COUNTIES. (a) If it is necessary to build a bridge or culvert across or over a state highway located in a county having a population of more than 350,000 inhabitants, according to the last preceding federal census, the board may construct or assist in constructing the bridge or culvert.

(b) After the bridge or culvert is constructed, the board may pay or may join with any county or other governmental agency or subdivision to pay the expenses of making necessary and needed repairs. The expenses shall be paid from the funds of the district.

Acts 1971, 62nd Leg., p. 508, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 56.123. CHANGE IN PLANS WITHOUT ADDITIONAL EXPENDITURES.

(a) After the board authorizes bonds to be issued, the board may make changes in the district or its improvements which will be an advantage to the district but which will not increase the cost of the proposed work beyond the amount of bonds authorized.

(b) The board may make the changes by entering on their minutes a notation of the changes, with the district maps and profiles showing the changes. Notice of the changes shall be given by publishing the notation with the book and page number of the minutes for two consecutive weeks in a newspaper of general circulation published in the English language in the county in which the district is located.

Acts 1971, 62nd Leg., p. 509, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Amended by Acts 1999, 76th Leg., ch. 222, Sec. 6, eff. Sept. 1, 1999.

Sec. 56.124. CHANGE IN PLANS WITH ADDITIONAL EXPENDITURES. (a)

If the board decides that changes or additions in the preliminary survey would be of advantage to the district but would necessitate issuing additional bonds of the district, it shall certify the need for additional bond authorization and file the certification with maps and profiles prepared by the district engineer showing the changes and their estimated cost in the district office.

(b) At the first regular meeting after the documents are filed, the board shall give notice of an election to determine whether or not the changes and improvements should be made and shall order the election held within the time and the returns made as provided in the

original election.

(c) If two-thirds of the electors of the district vote in favor of the proposition, the board shall enter the approval in the records and shall order the bonds issued as in the manner provided for issuance of the original bonds.

Amended by Acts 1999, 76th Leg., ch. 222, Sec. 7, eff. Sept. 1, 1999.

Sec. 56.125. ADDITIONAL IMPROVEMENTS. (a) After completion of improvements, including bridges and culverts, and after payment of all expenses, if surplus money or bonds remain to the credit of the district, the board may order the engineer to make a detailed report of additional or supplemental drains, ditches, levees, or other surface drainage improvements, including tile drainage, which are needed by the district. The engineer shall make the report and the board shall act on the report in the manner provided in this chapter for the initial report of the engineer.

(b) After the engineer's report is approved or modified by the board, the board shall order an election to be held in the district at the earliest legal time. The only proposition that may be submitted at the election is whether or not the district will construct additional improvements and pay for them with funds currently available. A majority of those persons voting at the election must approve the proposition for it to carry.

(c) Notice of the election shall be given, election officials appointed, returns made and canvassed, and the result declared as provided in Sections 56.027-56.031 of this code. The notice of election shall state:

- (1) the character and scope of the proposed improvements;
- (2) the estimated cost of the proposed improvements; and
- (3) the time and place for holding the election.

(d) The provisions of this chapter relating to awarding contracts, constructing improvements, and the authority of the board and the commissioners court to award contracts and construct improvements apply as far as applicable to constructing and paying for additional improvements.

(e) The estimated cost of the additional improvements may not be more than the amount of surplus money or bonds to the credit of

the district.

Amended by Acts 1999, 76th Leg., ch. 222, Sec. 8, eff. Sept. 1, 1999.

Sec. 56.126. CHANGES, ADDITIONS, AND IMPROVEMENTS. When the board determines that a necessity exists, it may make changes in, additions to, and improvements in the drainage system of the district and shall pay for the changes, additions, and improvements with funds collected under the provisions of Section 56.242 of this code.

Sec. 56.128. INJURING DRAINAGE CANAL OR DITCH. Any person who wilfully fills up, cuts, injures, destroys, or impairs the usefulness of any canal, drain, ditch, watercourse, or other work constructed, repaired, or improved by a district to drain and protect from overflow of water, upon conviction is punishable by confinement in the county jail for not more than two months or by a fine of not more than \$1,000.

Acts 1971, 62nd Leg., p. 510, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Amended by Acts 2001, 77th Leg., ch. 298, Sec. 5, eff. Sept. 1, 2001.

Sec. 56.135. INTEREST IN DRAINAGE CONTRACT. A county judge, county commissioner, director of the board, or drainage engineer who becomes interested in any contract for construction of any work by the district or in any fee paid by the district from which he will receive money, consideration, or other thing of value, upon conviction is punishable by confinement in the county jail for not less than six months nor more than one year.

Acts 1971, 62nd Leg., p. 512, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Amended by Acts 1999, 76th Leg., ch. 222, Sec. 9, eff. Sept. 1, 1999.

Sec. 56.140. PUBLIC AND PRIVATE IMPROVEMENTS. (a) Canals, drains, ditches, and levees which are constructed by a district and

watercourses which are cleaned or constructed by a district are the public property of the district.

(b) A person who owns land in the district may drain into one or more of the public drains, and at his own expense, the landowner may make drains according to the natural slope of the land through other lands intervening between his land and the nearest public drain or watercourse or along any public highway.

(c) Before constructing any drains, the landowner shall notify the board of his intention to construct a drain through another person's land or along a public highway, and the directors shall go on the premises and acting as a jury of view shall determine the place for constructing the drain.

Acts 1971, 62nd Leg., p. 513, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 56.141. OUTSIDE DRAINS. (a) Before a person artificially drains adjacent land located outside the district into the canals, drains, or ditches of the district, the person must submit a written application to the board, and the board must grant permission to make the connections. The application shall include the width, depth, and length of the connecting drains and ditches.

(b) When the application is filed with the board, the engineer shall estimate the quantity of water which the connecting drains or ditches would probably empty into the established canals or drains and shall indicate whether or not the established canals or drains have sufficient capacity to carry the excess water without risk or damage to the canals, drains, or adjacent territory. The engineer shall report to the board the result of his examination and his estimate.

(c) Unless an agreement is reached with the applicants, the board may authorize the connection on condition that the applicant first pay to the construction and maintenance fund an amount of money which bears the same ratio to the cost of the original canal or drain from the point of connection to its outlet as the water to be emptied into the canal or drain by the connecting drains bears to the water then flowing into and being carried by the original canal or drain as estimated by the engineer.

Acts 1971, 62nd Leg., p. 513, ch. 58, Sec. 1, eff. Aug. 30, 1971.  
Amended by Acts 1999, 76th Leg., ch. 222, Sec. 10, eff. Sept. 1,

1999.

Sec. 56.142. ENLARGEMENT OF CANALS, DRAINS, AND OTHER OUTLETS.

(a) If the engineer's report indicates that the capacity of the canals, drains, or outlets of the district are insufficient to carry the excess water that would be discharged into them by connecting drains or that the additional discharge of water will endanger the canals and drains or the lands and property adjacent to them, the board may give the applicant permission to construct connecting drains and secure the desired outlet on condition that the applicant make necessary enlargements of the canals and drains of the district at the applicant's own expense. The increased capacity of the canals of the district shall be sufficient to carry any increase of water caused by the connection without danger to canals and drains or lands adjacent to them.

(b) The engineer shall supervise and direct the enlargement of the canals and drains, and after the work is completed to his satisfaction, the engineer shall report to the board under his official certificate. The report shall show:

- (1) the kind of work done;
- (2) the extent of the work;
- (3) the new capacity to be sufficient to carry excess water from the connecting drain;
- (4) the number of days spent by the engineer supervising the work; and
- (5) the amount due to the engineer for his services.

(c) On approving the engineer's report, the board shall issue an order authorizing the connections to be made with the canals and drains on payment of the amount due to the engineer as shown by the engineer's report and shall order the applicant to pay the engineer's salary.

Sec. 56.143. CONTRACT FOR IMPROVEMENTS WITH THE UNITED STATES.

(a) Any district which is converted under Section 56.032 of this

code and which lies wholly within one county may enter into contracts with the United States, including the Bureau of Reclamation of the Department of Interior, to construct improvements.

(b) The board must approve the project, plans and specifications, and methods of constructing or reconstructing the improvements.

(c) After approval, the board may execute a contract for a specified number of years or until the plans or programs of the district are completed and shall pay the obligations incurred under the contract by issuing bonds that are approved by the voters in the manner provided for issuing other bonds of the district. The board shall deliver the bonds to the United States.

Sec. 56.247. LEVYING TAXES ON THE BENEFIT BASIS. A district operating under Article XVI, Section 59, of the Texas Constitution, may levy taxes on the benefit basis, which means the levy of a tax on an equal or uniform basis or rate on each acre of land in the district.

Acts 1971, 62nd Leg., p. 520, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 56.248. AUTHORIZING TAXATION ON THE BENEFIT BASIS FOR NEWLY CREATED DISTRICTS. (a) In a petition to create a district under Article XVI, Section 59, of the Texas Constitution, the petitioner may request that taxes in the proposed district be levied on the benefit basis, and the notice of hearing on the petition shall state this request in addition to other information required by V.T.C.A., Water Code Sec. 56.017.

(b) At the hearing on the petition, the commissioners court shall consider whether or not it will be fair and equitable to levy taxes on the benefit basis, and any person who would be affected by creation of the district may appear before the commissioners court and support or oppose the levy of taxes on the benefit basis.

(c) If the commissioners court finds that creation of and drainage of the district is feasible and practicable under V.T.C.A., Water Code Sec. 56.019, the commissioners court shall further determine whether or not the levy of taxes on the benefit basis would be fair and equitable to the landowners in the district.

(d) If the commissioners court determines that levying taxes on a benefit basis would not be fair and equitable to the landowners, the order of the commissioners court shall state these findings, and if the district is created, district taxes shall be levied on an ad valorem basis.

(e) If the commissioners court favors creation of the district and determines that levying taxes on a benefit basis will be fair and equitable to the landowners, the order of the commissioners court shall include these findings and an election shall be called to create the district and levy taxes on the benefit basis.

(f) Findings of the commissioners court relating to the basis on which taxes will be levied are final and conclusive on all parties.

(b) Any person may present to the board a petition, signed by 75 of the resident freehold taxpayers of the district whose land would be affected or by one-third of the freehold resident taxpayers of the district whose land would be affected if there are less than 75 in the district, requesting that taxes of the district be levied on the benefit basis and showing that the levy of taxes on the benefit basis will be fair and equitable to all landowners in the district.

(c) At the same meeting at which the petition is presented, the board shall schedule a hearing on the petition for either a regular meeting or a special meeting called for that purpose to be held during the period beginning on the 30th day and ending with the 60th day after the day the petition is presented.

The board shall post one of the copies at the courthouse door and the other four copies at four places within the boundaries of the district.

(e) At the hearing, any person whose land would be affected may appear before the board and may support or oppose the levy of taxes on a benefit basis and may offer testimony to show whether or not the levy of taxes on the benefit basis will be fair and equitable to landowners in the district. The board has exclusive jurisdiction to hear and determine this issue and matters relating to it and has exclusive jurisdiction in all subsequent proceedings. The board may adjourn the hearing from day to day, and judgments of the board are final.

(f) If the board finds that levying taxes on the benefit basis will not be fair and equitable to landowners in the district, an order shall be entered dismissing the petition, and the district shall continue to levy taxes on an ad valorem basis, but if the board finds that levying taxes on the benefit basis will be fair and equitable to landowners in the district, the board shall order an election to be held in the district.

(g) An election to approve the levy of taxes on the benefit basis must be held on the earliest legal date that occurs on or after the 30th day after the date the board orders the election. Notice of the election shall be given in the same manner as notice is given for the hearing on the petition. The board shall name polling places

within the district and shall appoint judges and other necessary election officers. The ballots shall be printed to provide for voting for or against the following proposition: "The levy of taxes in the district on the benefit basis."

(h) At least two-thirds of those persons voting in the election must vote in favor of the proposition for it to carry.

(i) If the proposition carries at the election, the order of the board canvassing the election shall provide that taxes of the district are to be levied on the benefit basis, but if the proposition fails to carry at the election, the order of the board canvassing the election shall provide that taxes of the district are to continue to be levied on an ad valorem basis.

A person appointed by the board shall qualify by taking an oath to fairly and impartially hold hearings and determine acreage.

(b) The committee to determine acreage shall give notice of the time and place of the hearing on the acreage before the 10-day period immediately preceding the day of the hearing.

the defendant, and no further pleadings are required.

(i) Appeals may be taken from the judgment of the district court as in other civil cases.

(j) No appeal may delay carrying out the engineer's report, and if the board pays to the district clerk the amount of damages awarded by the commissioners of appraisement to a claimant who is appealing their decree, and if the board makes bond to pay to the claimant any additional amount that he may be awarded on his appeal, title to the condemned property that is the subject of the appeal vests in the district, and the district is entitled to immediate possession.

(k) No person may claim damages against the district, its board, officers, or agents because of the prosecution of the engineer's report if he owns or has an interest in land in a county in which notice has been published of the hearing before the commissioners of appraisement, and he has failed to file a claim for damages or an objection to the damages assessed by the commissioners of appraisement against his land, or if he has filed a claim or objection but has failed to appeal from an adverse ruling on his claim or objection.

assessor for a district levying taxes on the benefit basis.

(b) When a tax is levied, the secretary shall, at the expense of the district, prepare a tax roll substantially in the same form as the assessment roll made by county assessor and collector, except the roll shall state net benefits assessed against property.

(c) The secretary shall compute the amount of taxes assessed against each piece of property and enter the amount on the tax roll and shall file with the assessor and collector of each county in which a portion of the district is located a certified copy of the part of the tax roll which relates to property in the district located in that county.

(b) If the engineer's report is changed or modified, or if extensive repairs or additions to the engineer's report are desired, the board shall file a petition with the commissioners court describing the changes, modifications, repairs, or additions.

(c) When a petition is filed, the commissioners court shall set a day for a hearing on the petition.

(d) The commissioners court shall issue notice informing all persons concerned of the time and place of the hearing, and of their rights to appear and contend for or contest a reassessment of benefits. The notice must be posted as provided in Section 57.015 of this code for posting notice of the hearing for establishing the district.

Sec. 57.274. HEARING ON PETITION FOR REASSESSMENT. (a) At the hearing on readjustment of assessments, the commissioners court shall hear the petition and receive evidence for or against the petition.

(b) The commissioners court shall order a reassessment of benefits if it finds that the aggregate amount of assessed benefits as shown by the previous final judgment and decree is insufficient to carry out the original engineer's report or changes, repairs, or additions to the report or there has been a material change in the relative value of the benefits conferred on the property in the district, or for some reason the assessment of benefits is inadequate or inequitable.

(c) If the commissioners court orders a reassessment, it shall appoint commissioners of appraisement as provided in Section 57.263 of this code, and the new commissioners of appraisement have the same powers, rights, privileges, and duties as provided in Section 57.267 of this code.

Amended by Acts 2003, 78th Leg., ch. 248, Sec. 54, eff. June 18, 2003.

Sec. 57.275. TAX COLLECTION ON REASSESSMENT. (a) The judgment and decree of the commissioners of appraisement reassessing benefits in the district are the basis of the assessment of taxes in the district.

(b) The assessment can again be modified or changed but there can be no reassessment of benefits that will in any way render any outstanding bonds or other indebtedness of the district insecure. The sum of benefits as reassessed may never be less than the sum of all outstanding bonds and other indebtedness of the district.

(c) The commissioners court of each county in which the district is located shall levy and have assessed and collected taxes based on the reassessment, at a rate sufficient to provide funds to pay the interest on all outstanding bonds and other indebtedness of the district, to pay the bonds or other indebtedness at maturity, and to provide the necessary sinking funds to pay all bonds or other indebtedness that may be issued.

(d) If the engineer's report is modified, or if extensive repairs or additions are made, the provisions of this section apply

to districts that levy taxes on the ad valorem basis, but the commissioners of appraisal shall assess only the damages which will accrue to the property inside or outside the district as a result of the changes in the report.

Sec. 57.279. COLLECTION OF DELINQUENT TAXES. (a) Taxes levied on the benefit basis under this chapter are a first and prior lien on all property against which they are assessed and are payable, mature, and become delinquent as provided in the Property Tax Code for ad valorem taxes.

(b) The Property Tax Code governs the collection of delinquent taxes levied on the benefit basis and the sale of property for the payment of the taxes.

The district shall hold the annual payment as a trust fund and annually apply it to the bonds issued by it to provide funds for the construction of the improvements to which the contribution is made.

(c) The contributor shall submit the contract of contribution to its electors for approval and for authority to levy and assess a sufficient tax to meet the annual payments fixed in the contract. The election for the approval of the contract and the authorized taxes for the fulfillment of the contract shall conform to appropriate law under which the contributing political subdivision was organized and authorized to create bonded indebtedness.

(a) If the proposed contributor has an unappropriated fund or a fund which is not required for actual use even though otherwise appropriated, the fund may be withdrawn from the project which does not need it and may be applied to pay contributions to the cost of the improvements considered to be a benefit to the contributor but to be constructed by another agency or jointly by the contributor and another agency.

(b) The board of the contributing political subdivision may contract for contributions and contribute from an unappropriated or available fund without submitting the contract and contributions to a vote of the electors of the contributor. However, the contributions shall not be made if they impair the ability of the contributor to meet any outstanding obligation or to adequately and economically discharge the contributor's duty to its electorate or constituency.

The lease shall contain a statement that payments due under it are not payable from any funds raised or to be raised by taxation.

(b) The lease may contain covenants and agreements which are not inconsistent with the provisions of this code which authorize the lease for:

(b) The board shall set and collect charges for the water supplied through the leased properties to produce sufficient revenue at all times to allow for delinquencies and to pay promptly all rental payments becoming due under the terms of the lease. The board may agree to deposit this money in a separate fund as a first charge on the gross revenue received each year from sales of water, and which shall not be used for any other purpose.

(c) The board may agree in the lease to pay all expenses of operating and maintaining the leased properties from the fund provided by the board each year for the maintenance and operation expenses of the district so that the gross revenue from sale of water will be available exclusively for payment of rentals until the amount required for rentals each year is paid into the separate rental fund.

(d) If the board includes this agreement in the lease, the board shall provide for the payment of sums into the maintenance fund from sources other than the remaining portions of the gross revenue from the sale of water not required to pay rentals which are sufficient each year to pay all expenses of operating the district and maintaining and operating its properties and facilities, including the leased properties.

(b) The receiver shall operate the properties and collect and distribute the revenue according to the terms of the lease and the direction of the court.

(c) The receiver has the same rights and powers as the board in its operation of the leased properties.

Sec. 58.174. AUTHORITY TO ACQUIRE IRRIGATION SYSTEM SUBJECT TO MORTGAGE. A district may acquire by gift, grant, or purchase any part of an irrigation system serving the district which is subject to a mortgage or encumbrance. The mortgage or encumbrances shall not be assumed by the district and shall not be an indebtedness of the district but shall constitute solely a charge on the encumbered property and the revenue from it.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.175. REVENUE FOR PAYMENT OF MORTGAGE. (a) The board may determine conclusively by resolution whether the mortgage or encumbrance represents all or part of the cost of the acquired property and constitutes a purchase money lien on the property.

(b) The board may contract to use and pledge its revenue derived solely from the sale of water and services supplied through the acquired properties for the payment of a purchase money lien.

(c) The board also may use revenue from taxation or from the issuance and sale of bonds to pay all or part of the amount due under the encumbrance if a majority of the electors of the district voting at an election on this proposition approve its use.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.176. ELECTION TO APPROVE REVENUE FOR PAYMENT OF MORTGAGE. (a) If tax and bond revenue is pledged to pay amount due under the encumbrance, the district must hold an election and receive the approval of the electors.

(b) An election to approve the use of tax and bond revenue shall be held in the same manner and with the same voters' qualifications as provided for elections on the issuance of the bonds of the district.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.177. JOINT ACQUISITION OF MORTGAGED SYSTEM BY TWO OR MORE DISTRICTS. (a) Two or more districts jointly may acquire by gift, grant, or purchase any part of an irrigation system serving the districts subject to a mortgage or encumbrances in the same manner that a single district may acquire the system.

(b) In the proceedings authorizing the acquisition, the boards of the respective districts shall define clearly the respective rights, interest, and liability of the districts in the acquired property and in the mortgage or encumbrance.

The notice shall include a statement of the purpose for issuing the bonds, the amount of the proposed bond issue, and the time the hearing is to be held, which may not be less than 30 days after the notice is first published.

(c) The board shall hold the hearing and any taxpayer, bondholder, or other interested person may appear and be heard.

(d) If the board approves the issuance of the additional bonds in the amount and for the purpose stated in the notice, the question of issuing the bonds shall be submitted to the electors of the district at an election.

(d) The election shall be held and the returns made in the manner provided in this chapter for the original election.

(e) If the result of the election favors the issuance of the bonds or the supplemental contract with the United States, the board may order the bonds issued or the contract made with the United States in the manner provided in this chapter.

(f) If a supplemental contract is made with the United States and bonds are not to be deposited with the United States, it is not necessary to issue bonds. If the district is required to raise money in addition to the amount of the contract, the bonds shall be issued only in the additional amount needed.

(2) if it is considered necessary to make repairs, replacements, or additions to the district's improvements which cost more than \$25,000; or

(3) if additional money is needed to complete the improvements as planned.

(b) The district shall provide the additional money for the particular purpose in accordance with the provisions of this chapter regulating the creation of bond obligations subject to every limitation with respect to the original proceedings and the substantial protection of the substantive rights of holders of any of the district's outstanding obligations.

(c) The interim bonds may be sold in the same manner and on the same terms provided by law for the sale of other bonds of the district.

(d) If interim bonds are sold at less than par value and accrued interest, the improvement bonds issued by the district must be sold at an increase over the price authorized by law in an amount sufficient to equal the discount allowed on the interim bonds.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.478. PAYMENT OF INTERIM BONDS. (a) The board shall appropriate the tax levied to pay the bonds deposited to the credit of the interest and sinking fund to pay the interim bonds or as much of that tax as necessary to secure the loan evidenced by the interim bonds.

(b) The proceeds of the tax shall be devoted exclusively to the payment of the principal and interest on the interim bonds.

(c) None of the provisions of this subchapter relating to interim bonds shall be construed as prohibiting the sale of bonds deposited to the credit of the interest and sinking fund to pay interim bonds or of any other bonds of the district, but if any of these bonds are sold, the district depository shall apply the proceeds to the payment of principal and accrued interest on the interim bonds and the remainder to the purposes for which the bonds were authorized.

(d) If none of the bonds are sold at the time an installment on the principal and interest of interim bonds matures, the depository shall cancel the deposited bonds and attached interest coupons in an amount equal to the principal and interest of the interim bonds paid off and discharged.

Sec. 58.480. ALTERNATE METHODS FOR PAYING BONDS. (a) As used in this section and in Sections 58.481-58.484 of this code, "net revenue" means income or increment which may come from ownership and operation of the improvements which are encumbered less the proportion of the district's revenue income reasonably required to provide for administration, efficient operation, and adequate maintenance of the district's services and facilities which are encumbered. Net revenue does not include money derived from taxation.

(b) A district which expects net revenue from operations may secure its bonds in any one of the following:

(1) as provided in Section 58.463 of this code;

(2) by entering into a contract to pledge the net revenue of the district and to mortgage and encumber part or all of the property and facilities, franchise, revenue, and income from operations, and everything acquired or to be acquired by the district; or

(3) as provided in both Subdivisions (1) and (2) of this

subsection.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.481. TAXES TO SECURE CERTAIN BONDS. (a) If bonds are secured as provided in Section 58.480(b)(3) of this code, at the time that net revenue together with money derived from taxes accumulates a surplus in the sinking fund equal to the amount required in the succeeding year to liquidate the interest and principal on the district's bonds maturing in that year, the district's annual tax levies may be lowered to produce not less than 25 percent of the bond maturities for the succeeding year.

(b) If three successive years demonstrate that this net revenue is adequate to protect the district's bonds as they mature, the district's tax may be discontinued until further experience demonstrates the necessity to continue the tax to avoid default in the payment of the district's bonds as they mature.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.482. ELECTION. (a) If the district proposes to issue bonds which will be secured under either Section 58.480(b)(2) or 58.480(b)(3) of this code, the proposition shall be presented at an election held under Section 58.443 of this code.

(b) The ballots for the election shall be printed to provide for voting for or against one of the following propositions:

(1) "The issuance of bonds and the pledge of net revenue for the payment of the bonds.";

(2) "The issuance of bonds, the pledge of net revenue, and the creation of a lien on physical property to secure payment of the bonds."; or

(3) "The issuance of bonds, the pledge of net revenue, and the levy of adequate taxes to pay the bonds."

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.483. HEARING AND ELECTION ON CERTAIN BONDS. (a) A district which plans to issue bonds payable from and secured by a pledge of net revenue and a lien on the physical property, either or both, without the levy of taxes, is not required to hold a hearing to exclude land or adopt a plan of taxation.

(b) The proposition for issuance of bonds may be submitted at the election held to confirm the creation of the district or at an election called by the board.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.484. HEARING BEFORE ISSUING CERTAIN BONDS. If a district issues its original bonds under Section 58.480(b)(2) of this code and later desires to issue bonds payable in whole or in part from taxes or to levy a tax for maintenance purposes, the district shall hold a hearing to exclude land, and at the time provided by law, shall hold another hearing to adopt a plan of taxation. These hearings shall be held before an election is called to approve the issuance of tax-supported bonds or the levy of a maintenance tax.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

(b) If the tax plan is not based wholly on the ad valorem basis or on the benefit basis, the order adopting the proposed plan shall specify the portion of the tax to be based on the ad valorem basis and the portion to be based on the benefit basis. The board also shall state the physical and economic reasons, the peculiar diverse local needs, or the comparative potential benefits of different areas of designated property in the district which make it necessary or equitable to levy all or part of the tax on a defined part of the district on the ad valorem or benefit basis.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

(c) The board shall enter its order establishing the tax plan, and the plan shall become the basis for the assessment and collection of taxes until the district adopts a different plan.

(d) The order is not subject to judicial review except on the ground of fraud, palpable error, or arbitrary and confiscatory abuse of discretion.

(e) A new plan may be adopted if required to preserve equity of distribution in the manner provided for adopting the original plan; however, no change may be made in the tax plan which will impair the ability of the district promptly to meet all outstanding obligations of the district within the intent of Sections 58.464 and 58.467 of this code.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

(c) The board shall adopt a plan of taxation to apply to the defined area or designated property which may or may not be in addition to other taxes imposed by the district on the same area or property. The proportional tax or income contributions of the defined area or designated property and the proportional and equitable interest of the entire district shall be taken into consideration in imposing any tax to an area or piece of property.

Sec. 58.521. ELECTION NOT REQUIRED IN SEPARATE ELECTION PRECINCT. If proposed improvements are considered to be required to promote the public welfare or if the owners of the land in a defined area file a petition acknowledged as required for deeds requesting the district to provide improvements and assess a tax only in the defined area, it is not necessary to constitute the area a separate election precinct and have a separate election in that area.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.522. BALLOTS. The ballots for an election under this subchapter shall be printed to provide for voting for or against substantially the proposition: "Designation of the area, issuance of bonds, and levy of a tax to retire the bonds."

Sec. 58.524. PLEDGE OF FAITH AND CREDIT. If at an election the electors approve the issuance of bonds and the levy of a tax which applies only to a defined area, the district may issue bonds which pledge only the faith and credit based on the property values in the defined area; however, the district may pledge the full faith and credit of the entire district under the condition of authorization in Section 58.528 of this code.

Added by Acts 1977, 65th Leg., p. 1537, ch. 627, Sec. 1, eff. Aug. 29, 1977.

Sec. 58.525. ELECTION IN SEPARATE ELECTION PRECINCT. (a) If the improvements to be provided in a defined area are considered peculiarly for the benefit of that area and not required to conserve the public or general welfare in the district as a whole, and if the proposed improvements in that area will require the imposition of a tax only on the property in the area, the defined area is constituted a separate election precinct in which a separate election shall be held to determine if the improvements will be provided and a separate tax levied.

(b) The election shall be held in the manner provided for issuance of bonds under this subchapter.

(c) If a majority of the electors in the defined area approve the propositions, the district shall provide money when necessary and shall provide the improvements and levy the tax.

(d) Permanent directors shall be elected in accordance with

## Chapter 49.

(e) If the petition for creation has requested the election of seven directors as provided by Subsection (c), unless otherwise agreed, the three directors elected who received the fewest number of votes, whether their election is by precinct or at large, shall serve until the next directors election following the confirmation election and the four who received the highest number of votes shall serve until the second directors election after the confirmation election.

(f) After the creation of the district, the persons or entities that petitioned for creation or 50 qualified voters of the district may file a petition with the commission requesting to expand the district's board to seven members. If the commission grants the petition, the commission shall appoint two temporary directors. One temporary director shall serve until the next directors election and one shall serve until the next succeeding directors election. If the petition requesting creation of the district is granted, the commission shall establish precincts from which the directors are to be elected. In establishing the precincts the commission shall attempt to have directors represent geographic areas with equal numbers of people and shall comply with the federal Voting Rights Act of 1965 (42 U.S.C. (c) At the time of the district's confirmation election, a separate voting precinct shall be used for the qualified voters in each municipal district that has filed a petition requesting exclusion. The votes in each precinct shall be tallied separately to determine whether that municipal district will be excluded from the district boundaries.

(d) If a majority of the votes cast in a municipal district requesting exclusion vote against confirmation of the district, the votes cast in the confirmation election shall not be counted for the

confirmation election, bond election, or maintenance tax election, and that municipal district must be excluded from the boundaries of the district by the board of directors of the district at the time the results of the election are canvassed.

(e) After a confirmation election at which the district is authorized to be created, the board of directors of the district shall adopt an order redefining the boundaries of the district to exclude those municipal districts petitioning for exclusion that have voted not to confirm creation of the district.

(f) Before the creation hearing, any municipal district located within the proposed district may petition the commission for a separate voting precinct to be used within the boundaries of the petitioning district at the time of the district's confirmation election. If the commission grants the petition requesting a separate voting precinct, Subsections (c) through (e) apply.

provide for the creation of a sinking fund which shall include sums fully sufficient to pay principal of and interest on the obligations. Money deposited in the sinking fund shall be taken from revenue pledged for the payment of the obligations and shall be deposited in the fund as the revenue is collected.

(b) The money in the sinking fund shall be applied solely to the payment of interest on the obligations for the payment of which the fund is created and for the retirement of the obligations at or before maturity in the manner provided by this subchapter.

(c) The commission, at the time obligations are authorized under this subchapter, may provide that all money in the sinking fund which is in excess of the amount required for the payment of the principal of and interest on the outstanding obligations, for a period of time it may determine, shall be spent once each year pursuant to the commission's orders for the purchase of obligations, if any can be purchased at a price the commission finds reasonable, for the account of which the sinking fund has been accumulated.

(d) If the obligations contain an option permitting retirement before maturity, the commission may provide that the excess sums shall be paid out as authorized by Subsection (b) of this section for the purchase of the obligations, but if the commission is unable to purchase sufficient obligations of the issue to absorb all the surplus, it shall call a sufficient amount of the obligations for redemption to absorb insofar as practicable the entire surplus remaining in the sinking fund.

(e) The commission may provide that any excess in the sinking fund which cannot be applied to the purchase or redemption of obligations shall remain in the sinking fund for payment of principal and interest and for subsequent call for purchase or redemption.

(b) In determining the amount of revenue to be set aside, the

commission shall provide that the amount to be set aside and paid into the fund in any year shall not be less than a fixed sum which shall be at least sufficient to provide for the payment of the principal of and interest on all obligations which mature and become payable each year and shall include a surplus or margin of 10 percent in excess of that amount.

proceeds of the sale exchanged for the same par amounts of outstanding obligations.

**SUBCHAPTER F. CONTRACTS WITH THE UNITED STATES**

Sec. 60.151. PURPOSE. It is the purpose and intent of this subchapter to confer on districts individually, jointly, or mutually interested in a navigation project, including a project relating to improvements and facilities described in Sections 60.032 and 60.101 of this code, the fullest possible power of contract with regard to navigation or other projects of individual or common interest.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.  
Amended by Acts 1991, 72nd Leg., ch. 794, Sec. 1, eff. June 16, 1991;  
Acts 2003, 78th Leg., ch. 588, Sec. 5, eff. June 20, 2003.

Sec. 60.152. AUTHORITY TO ENTER INTO CONTRACT. (a) One or more districts, which are interested in or may, in the judgment of the commission, be benefited by a navigation or other project, may enter into contracts with the United States or with another district, or both, to consummate navigation or other projects of common interest.

(b) The contract may provide for:

- (1) the assumption of several, joint, or joint and several liability for construction, completion, and consummation of the project;
- (2) the acquisition of property in connection with the project;
- (3) the lending and contribution of funds of the district to the United States or to any other district in support or in aid of the project;
- (4) the issuance of bonds or notes by one or more of the districts to fund all or part of the project;
- (5) the obligation of one or more of the districts to fully or partially reimburse another district that has spent its own funds on the project or has issued bonds or notes to fund the project;
- (6) the securing of bonds or notes issued by one district to fund the project with a pledge of payments to be made by one or more of the other districts; and
- (7) the assumption of responsibility for valid obligations, incurred in furtherance of the common project, of the United States or of any district.

(c) A contract may provide that a district will make payment

under the contract from proceeds from the sale of bonds or notes, from taxes, or from any other income of the district or any combination of these. A district may make payments under a contract from taxes other than maintenance taxes, after the provisions of the contract have been approved by a majority of the electors voting at an election held for that purpose. A contract election may be held alone or at the same time and in conjunction with an election to authorize bonds. The procedure for calling the election, giving notice, conducting the election, and canvassing the returns is the same as the procedure for a bond election. If the contract is approved, it constitutes an obligation against the taxing power of the district to the extent provided in the contract.

(d) A district all or part of which is in another district may exercise the authority granted a district under this section.

(b) As additional security, the encumbrance may pledge the net income and revenue from the operation of properties and facilities of the district and may provide for a grant, to a purchaser under sale or foreclosure, of a franchise to operate, subject to all regulatory laws, the encumbered property and facilities for a term of not more than 20 years from the date of purchase.

(d) The commission may, in respect to the issuance, sale, and delivery of securities evidencing the indebtedness, adopt all necessary resolutions, orders, certificates, and trust indentures.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

(b) Revenue and income from the encumbered property and facilities of the district shall not be considered in determining the power of the district to issue any bonds for any purpose authorized by law.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 60.177. LIEN ON REVENUE; FORECLOSURE OF ENCUMBRANCE. (a) If the revenue and income from the properties and facilities of the district are encumbered under the provisions of this subchapter, the expense of operation and maintenance necessary to render efficient service of the properties and facilities shall be a first lien and charge against the revenue and income. The first lien shall be prior to and superior to the lien of the encumbrance.

(b) No encumbrance shall be foreclosed because of default of the district until the default has existed for a period of 90 days and notice of the default has been served on the commission.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

#### **SUBCHAPTER H. PROMOTION AND DEVELOPMENT FUND IN CERTAIN DISTRICTS**

Sec. 60.201. PURPOSE. Districts in this state which operate ports or waterways and harbor and terminal facilities are in keen competition with other ports, waterways, harbors, and terminals outside the state and with privately owned port and terminal facilities inside the state. Well-situated and well-equipped ports and waterways in other nearby states and owners of substantial port and terminal facilities located inside and outside the state are advertising, promoting and developing their competing ports, waterways, harbors, and terminals through expenditure of large amounts of money without any audit or restriction on expenditure of the money. This activity or expenditure is thwarting and impeding the use, progress, and development of the ports, waterways, harbors, and terminals of this state. Continuation of this hardship and injustice can best be met and coped with by more liberal use of some relatively small fund set aside from the gross income from operations of the ports of this state to be used in the manner provided in this subchapter.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.  
Amended by Acts 1993, 73rd Leg., ch. 114, Sec. 1, eff. Aug. 30, 1993.

Sec. 60.202. CREATION OF FUND. A district organized under general or special law may set aside out of current income from its operations a promotion and development fund of not more than five percent of its gross income from operations in each calendar year.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.  
Amended by Acts 1993, 73rd Leg., ch. 114, Sec. 1, eff. Aug. 30, 1993.

Sec. 60.203. EXPENDITURE OF FUND. Money in the promotion and development fund shall be spent by the commission or as the commission may direct to pay any expenses connected with:

- (1) any activity or matter incidental to the advertising, development, or promotion of the district or its ports, waterways, harbors, or terminals;
- (2) furthering the general welfare of the district and its facilities; or
- (3) the betterment of the district's relations with steamship and rail lines, shippers, consignees of freight, governmental officials, or others interested or sought to be interested in the ports, waterways, harbors, or terminals.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Sec. 60.204. MANAGEMENT AND CONTROL OF PROMOTION AND DEVELOPMENT FUND. (a) The money in the promotion and development fund shall be kept separate from all other funds and accounts of the district, and no money collected from assessing or levying taxes may be mingled with the fund.

(b) The promotion and development fund shall be under the exclusive control of the commission, and the commission shall have full responsibility for auditing, approving, and safeguarding the expenditure of money from the fund.

(c) The county auditor shall exercise his usual supervision and control to assure that the commission sets aside no more than five percent of its gross income from operations in each calendar year in the promotion and development fund. The county auditor may audit disbursements from the fund and shall be entitled to a monthly statement showing the:

- (1) date of each disbursement from the fund;
- (2) amount disbursed;
- (3) person or concern to whom disbursed; and
- (4) general purpose of each disbursement.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

Amended by Acts 2001, 77th Leg., ch. 183, Sec. 1, eff. May 18, 2001.

Sec. 60.205. OTHER EXPENSES NOT AFFECTED. Since this

subchapter authorizes disbursements from the promotion and development fund for unusual purposes and occasions not covered by other law, the setting aside of the fund and disbursements from the fund shall not affect payment of other expenses customarily approved, audited, and paid out of the regular funds of the district.

Acts 1971, 62nd Leg., p. 110, ch. 58, Sec. 1, eff. Aug. 30, 1971.

#### **SUBCHAPTER I. REVENUE BONDS**

Sec. 60.221. MODIFICATION OF REVENUE BOND RESOLUTION. Sec. 60.457. DELEGATION. (a) The commission of a district may, as it considers appropriate, delegate its authority under this subchapter regarding an action authorized or required by this subchapter to be taken by a district to a designated person, representative, or committee. In procuring construction services, the district shall provide notice of the delegation and the limits of the delegation in the request for bids, proposals, or qualifications, or in an addendum to the request. If the district fails to provide that notice, a ranking, selection, or evaluation of bids, proposals, or qualifications for construction services other than by the commission in an open meeting is advisory only.

(b) A commission may not delegate the authority to act regarding an action authorized or required by this subchapter to be taken by the commission of a district.

Sec. 60.458. PURCHASE CONTRACT AWARD CRITERIA. Except as provided by this subchapter, in determining to whom to award a contract, the district may consider:

- (1) the purchase price;
- (2) the reputation of the vendor and of the vendor's goods or services;
- (3) the quality of the vendor's goods or services;
- (4) the extent to which the goods or services meet the district's needs;
- (5) the vendor's past relationship with the district;
- (6) the impact on the ability of the district to comply with laws and rules relating to historically underutilized businesses, the district's small business development program, or

another contracting program approved by the district, if any;

(7) the total long-term cost to the district to acquire the vendor's goods or services; and

(8) any other relevant factor specifically listed in the request for bids or proposals.

Added by Acts 2003, 78th Leg., ch. 307, Sec. 1, eff. June 18, 2003.

Sec. 60.459. EVALUATION OF BIDS AND PROPOSALS FOR CONSTRUCTION SERVICES. (a) The commission of a district that is considering a construction contract using a method specified by Section 60.454 must, before advertising, determine which method provides the best value for the district.

(b) The district shall base its selection among offerors on criteria authorized to be used under Section 60.458. The district shall publish in the request for bids, proposals, or qualifications the specific criteria that will be used to evaluate the offerors and the relative weights given to the criteria.

(c) The district shall document the basis of its selection and shall make the evaluations public not later than the later of:

(1) the 30th day after the date of the award of the contract; or

(2) the next scheduled commission meeting.

Sec. 60.460. DESIGN-BUILD CONTRACTS FOR FACILITIES. (a) A district may award a design-build contract for the construction, rehabilitation, alteration, or repair of a facility provided that the contracting district and the design-build firm follow the procedures provided by this section.

(b) The district shall designate an engineer or architect independent of the design-build firm to act as its representative for the duration of the work on the facility. If the district's engineer or architect is not a full-time employee of the district, the district shall select the engineer or architect as provided by

Section 2254.004, Government Code.

(c) The district shall prepare a request for qualifications that includes general information on the project site, project scope, budget, special systems, selection criteria, and other information that may assist potential design-build firms in submitting proposals for the project. The district shall also prepare a design criteria package that includes more detailed information on the project. If the preparation of the design criteria package requires engineering or architectural services that constitute the practice of engineering within the meaning of Chapter 1001, Occupations Code, or the practice of architecture within the meaning of Chapter 1051, Occupations Code, those services shall be provided in accordance with the applicable law. An engineer shall have responsibility for compliance with the engineering design requirements and all other applicable requirements of Chapter 1001, Occupations Code. An architect shall have responsibility for compliance with the requirements of Chapter 1051, Occupations Code.

(d) The district shall evaluate statements of qualifications and select a design-build firm in two phases:

(1) In phase one, the district shall prepare a request for qualifications and evaluate each offeror's experience, technical competence, and capability to perform, the past performance of the offeror's team and members of the team, and other appropriate factors submitted by the team or firm in response to the request for qualifications, except that cost-related or price-related evaluation factors are not permitted. Each offeror must certify to the district that each engineer or architect who is a member of its team was selected based on demonstrated competence and qualifications, in the manner provided by Section 2254.004, Government Code. The district shall qualify a maximum of five offerors to submit additional information and, if the district chooses, to interview for final selection.

(2) In phase two, the district shall evaluate the information submitted by the offerors on the basis of the selection criteria stated in the request for qualifications and the results of any interview. The district may request additional information regarding demonstrated competence and qualifications, considerations of the safety and long-term durability of the project, the feasibility of implementing the project as proposed, the ability of the offeror to meet schedules, costing methodology, construction

cost, engineering and architectural design, or other factors as appropriate. The district shall rank each proposal submitted on the basis of the criteria set forth in the request for qualifications. The district shall select the design-build firm that submits the proposal offering the best value for the district on the basis of the published selection criteria and on its ranking evaluations. The district shall first attempt to negotiate a contract with the selected offeror. If the district is unable to negotiate a satisfactory contract with the selected offeror, the district shall, formally and in writing, end negotiations with that offeror and proceed to negotiate with the next offeror in the order of the selection ranking until a contract is reached or negotiations with all ranked offerors end.

(e) Following selection of a design-build firm under Subsection (d), that firm's engineers or architects shall complete the design, submitting all design elements for review and determination of scope compliance to the district or the district's engineer or architect before or concurrently with construction.

(f) The district shall provide or contract for, independently of the design-build firm, the inspection services, the testing of construction materials, and the verification testing services necessary for acceptance of the facility by the district. The district shall select those services for which it contracts in accordance with Section 2254.004, Government Code.

(g) The design-build firm shall supply a signed and sealed set of as-built construction documents for the project to the district at the conclusion of construction.

(h) A payment or performance bond is not required for, and may not provide coverage for, the portion of a design-build contract under this subchapter that includes design services only. If a fixed contract amount or guaranteed maximum price has not been determined at the time a design-build contract is awarded, the penal sums of the performance and payment bonds delivered to the district must each be in an amount equal to the project budget, as specified in the design criteria package. The design-build firm shall deliver the bonds not later than the 10th day after the date the design-build firm executes the contract unless the design-build firm furnishes a bid bond or other financial security acceptable to the district to ensure that the design-build firm will furnish the required performance and payment bonds when a guaranteed maximum price is established.

(i) The district shall pay an unsuccessful design-build firm that submits a response to the district's request for additional information on engineering or architectural design under Subsection (d)(2) the stipulated amount of up to one-half of one percent of the final contract price for any reasonable costs incurred in preparing that proposal. After payment of the stipulated amount, the district may make use of any design contained in the proposal, including the technologies, techniques, methods, processes, and information contained in the design. The use by the district of any design element contained in an unsuccessful proposal is at the sole risk and discretion of the district and does not confer liability on the recipient of the stipulated amount under this section. The methodology for computing the stipulated amount must be stated in the request for additional information under Subsection (d)(2).

(j) The district may use a design-build firm to assist the district in obtaining a permit necessary for a facility, but the district is responsible for obtaining the permit.

(k) A successful design-build firm shall not be eligible for another design-build contract with the district for a period of 12 months after the date the successful design-build firm's contract has been completed if:

(1) the successful design-build firm's contract value exceeds \$5 million; or

(2) the design-build firm is awarded design-build contracts by a district that total more than \$5 million in a 12-month period.

Added by Acts 2003, 78th Leg., ch. 307, Sec. 1, eff. June 18, 2003.

Sec. 60.461. CONTRACTS FOR FACILITIES: CONSTRUCTION MANAGER-AGENT. (a) A district may award a contract to a construction manager-agent for the construction, rehabilitation, alteration, or repair of a facility provided that the construction manager-agent and the district follow the procedures prescribed by this section.

(b) A district may, under the contract between the district and the construction manager-agent, require the construction manager-agent to provide administrative personnel, equipment necessary to perform duties under this section, and on-site management and other services specified in the contract. A construction manager-agent represents the district in a fiduciary capacity.

(c) Before or concurrently with selecting a construction manager-agent, the district shall select or designate an engineer or architect who shall prepare the construction documents for the project and who has full responsibility for complying with Chapter 1001 or 1051, Occupations Code, as applicable. If the engineer or architect is not a full-time employee of the district, the district shall select the engineer or architect as provided by Section 2254.004, Government Code. The district's engineer or architect may not serve, alone or in combination with another person, as the construction manager-agent unless the engineer or architect is hired to serve as the construction manager-agent under a separate or concurrent procurement conducted in accordance with this subchapter. This subsection does not prohibit the district's engineer or architect from providing customary construction phase services under the engineer's or architect's original professional service agreement in accordance with applicable laws.

(d) A district shall select a construction manager-agent on the basis of demonstrated competence and qualifications in the same manner as provided for the selection of engineers or architects under Section 2254.004, Government Code.

(e) A district contracting with a construction manager-agent shall procure, in accordance with applicable law, and in any manner authorized by this chapter, a general contractor, trade contractors, or subcontractors who will serve as the prime contractor for their specific portion of the work.

(f) The district or the construction manager-agent shall procure in accordance with Section 2254.004, Government Code, and in any manner authorized by this chapter, all of the testing of construction materials, the inspection services, and the verification testing services necessary for acceptance of the facility by the district.

Added by Acts 2003, 78th Leg., ch. 307, Sec. 1, eff. June 18, 2003.

Sec. 60.462. CONTRACTS FOR FACILITIES: CONSTRUCTION MANAGER-AT-RISK. (a) A district may award a contract to a construction manager-at-risk for the construction, rehabilitation, alteration, or repair of a facility provided that the construction manager-at-risk and the district follow the procedures prescribed by this section.

(b) Before or concurrently with selecting a construction manager-at-risk, the district shall select or designate an engineer or architect who shall prepare the construction documents for the project and who has full responsibility for complying with Chapter 1001 or 1051, Occupations Code, as applicable. If the engineer or architect is not a full-time employee of the district, the district shall select the engineer or architect in accordance with Section 2254.004, Government Code. The district's engineer, architect, or construction manager-agent for a project may not serve, alone or in combination with another, as the construction manager-at-risk.

(c) The district shall provide or contract for, independently of the construction manager-at-risk, the inspection services, the testing of construction materials, and the verification testing services necessary for acceptance of the facility by the district. The district shall select those services for which it contracts in accordance with Section 2254.004, Government Code.

(d) The district shall select the construction manager-at-risk in either a one-step or two-step process. The district shall prepare a request for proposals, in the case of a one-step process, or a request for qualifications, in the case of a two-step process, that includes general information on the project site, project scope, schedule, selection criteria, and estimated budget, the time and place for receipt of proposals or qualifications, as applicable, a statement as to whether the selection process is a one-step or two-step process, and other information that may assist the district in its selection of a construction manager-at-risk. The district shall state the selection criteria in the request for proposals or qualifications, as applicable. The selection criteria may include the offeror's experience, past performance, safety record, proposed personnel and methodology, and other appropriate factors that demonstrate the capability of the construction manager-at-risk. If a one-step process is used, the district may request, as part of the offeror's proposal, proposed fees and prices for fulfilling the general conditions.

(e) If a two-step process is used, the district may not request fees or prices in step one. In step two, the district may request that five or fewer offerors, selected solely on the basis of qualifications, provide additional information, including the construction manager-at-risk's proposed fee and its price for fulfilling the general conditions.

(f) At each step, the district shall receive, publicly open, and read aloud the names of the offerors. At the appropriate step, the district shall also read aloud the fees and prices, if any, stated in each proposal as the proposal is opened. Not later than the 45th day after the date of opening the proposals, the district shall evaluate and rank each proposal submitted in relation to the criteria set forth in the request for proposals.

(g) The district shall select the offeror that submits the proposal that offers the best value for the district based on the published selection criteria and on its ranking evaluation. The district shall first attempt to negotiate a contract with the selected offeror. If the district is unable to negotiate a satisfactory contract with the selected offeror, the district shall, formally and in writing, end negotiations with that offeror and proceed to negotiate with the next offeror in the order of the selection ranking until a contract is reached or negotiations with all ranked offerors end.

(h) If a fixed contract amount or guaranteed maximum price has not been determined at the time the contract is awarded, the penal sums of the performance and payment bonds delivered to the district must each be in an amount equal to the project budget, as specified in the request for proposals or qualifications. The construction manager-at-risk shall deliver the bonds not later than the 10th day after the date the construction manager-at-risk executes the contract unless the construction manager-at-risk furnishes a bid bond or other financial security acceptable to the district to ensure that the construction manager-at-risk will furnish the required performance and payment bonds when a guaranteed maximum price is established.

Sec. 60.463. SELECTING CONTRACTOR FOR CONSTRUCTION SERVICES THROUGH COMPETITIVE SEALED PROPOSALS. (a) In selecting a contractor for construction, rehabilitation, alteration, or repair services for a facility through competitive sealed proposals, a district shall follow the procedures prescribed by this section.

(b) The district shall select or designate an engineer or architect to prepare construction documents for the project. The selected or designated engineer or architect has full responsibility

for complying with Chapter 1001 or 1051, Occupations Code, as applicable. If the engineer or architect is not a full-time employee of the district, the district shall select the engineer or architect as provided by Section 2254.004, Government Code.

(c) The district shall provide or contract for, independently of the contractor, the inspection services, the testing of construction materials, and the verification testing services necessary for acceptance of the facility by the district. The district shall select those services for which it contracts in accordance with Section 2254.004, Government Code, and shall identify them in the request for proposals.

(d) The district shall prepare a request for competitive sealed proposals that includes construction documents, selection criteria, project scope, schedule, and other information that contractors may require to respond to the request. The district shall state in the request for proposals the selection criteria that will be used in selecting the successful offeror.

(e) The district shall receive, publicly open, and read aloud the names of the offerors and, if any lump-sum prices are required to be stated, all such lump-sum prices stated in each proposal. Not later than the 45th day after the date of opening the proposals, the district shall evaluate and rank each proposal submitted in relation to the published selection criteria.

(e-1) Notwithstanding Subsection (e), if the district demonstrates 45 days is not sufficient time for thorough evaluation, the district may specify in the request for competitive sealed proposals a deadline, not later than the 90th day after the date of opening the proposals, to evaluate and rank each proposal submitted in relation to the published selection criteria.

(f) The district shall select the offeror that offers the best value for the district based on the published selection criteria and on its ranking evaluation. The district shall first attempt to negotiate a contract with the selected offeror. The district and its engineer or architect may discuss with the selected offeror options for a scope or time modification and any price change associated with the modification. If the district is unable to negotiate a contract with the selected offeror, the district shall, formally and in writing, end negotiations with that offeror and proceed to the next offeror in the order of the selection ranking until a contract is reached or all proposals are rejected.

(g) In determining best value for the district, the district is not restricted to considering price alone, but may consider any other factor stated in the selection criteria.

Sec. 60.464. JOB ORDER CONTRACTS FOR FACILITIES CONSTRUCTION OR REPAIR. (a) A district may award job order contracts for the construction, repair, rehabilitation, or alteration of a facility if the work is of a recurring nature but the delivery times are indefinite and indefinite quantities and orders are awarded substantially on the basis of predescribed and prepriced tasks.

(b) The district may establish contractual unit prices for a job order contract by:

(1) specifying one or more published construction unit price books and the applicable divisions or line items; or

(2) providing a list of work items and requiring the offerors to bid or propose one or more coefficients or multipliers to be applied to the price book or work items as the price proposal.

(c) The district shall advertise for, receive, and publicly open sealed proposals for job order contracts.

(d) The district may require offerors to submit, in addition to information on rates, other information, including experience, past performance, and proposed personnel and methodology.

(e) The district may award job order contracts to one or more job order contractors in connection with each solicitation of bids or proposals.

(f) An order for a job or project under the job order contract must be signed by the district's representative and the contractor. The order may be a fixed price, lump-sum contract based substantially on contractual unit pricing applied to estimated quantities or may be a unit price order based on the quantities and line items delivered.

(g) The contractor shall provide payment and performance bonds, if required by law, based on the amount or estimated amount of any order.

(h) The base term of a job order contract is for the period and with any renewal options that the district sets forth in the request for proposals. If the district fails to advertise that term, the base term may not exceed two years and is not renewable without further advertisement and solicitation of proposals.

(i) If a job order contract or an order issued under the contract requires engineering or architectural services that constitute the practice of engineering within the meaning of Chapter 1001, Occupations Code, or the practice of architecture within the meaning of Chapter 1051, Occupations Code, the district shall select or designate an architect or engineer to prepare the construction documents for the facility. If the architect or engineer is not a full-time employee of the district, the district shall select the architect or engineer on the basis of demonstrated competence and qualifications as provided by Section 2254.004, Government Code.

(a) Any district organized under this chapter or any special law or any general law under which navigation districts may be created may apply for a lease from the State of Texas of the surface estate of any lands and flats belonging to the state which are covered or partly covered by the water of any of the bays or other arms of the sea; however, any navigation district created after the effective date of this Act may not lease the surface estate of any such lands or flats which are located within 10 miles of the boundary of any navigation district in existence on the effective date of this Act, without first receiving the written approval of the district now in existence. The words "navigation district," "district," or "districts" as used in Sections 61.116, 61.117, and 60.038 of the Texas Water Code shall apply to any incorporated city in this state which owns and operates wharves, docks, and other marine port facilities.

(b) The state, through the School Land Board, may lease these state owned lands or flats to eligible navigation districts only for purposes reasonably related to the promotion of navigation. The term "navigation" as used herein refers to marine commerce and immediately related activities, including but not limited to port development; channel construction and maintenance; commercial and sport fishing; recreational boating; industrial site locations; transportation, shipping, and storage facilities; pollution abatement facilities; and all other activities necessary or appropriate to the promotion of marine commerce; but specifically does not refer to residential development.

(c) In making application for a lease of state owned lands or flats, the district shall include the following information:

(1) a description of the lands or flats sought to be leased;

(2) a plan showing how it proposes to utilize the land and a timetable indicating approximately when such utilization will take place;

(3) a draft environmental impact statement assessing the effect of the proposed use on the environment, which statement shall generally conform to the requirements of the National Environmental Policy Act, until such time as the legislature shall impose different requirements; however, a draft environmental impact statement shall not be required if the proposed use requires no dredging, filling, or bulkheading. If the proposed use does require dredging, filling, or bulkheading, but the lease shall be processed as provided in Subsections (d), (e), and (f) of this section without the filing of a draft environmental impact statement if the applicant so requests in writing; but in such a case, the School Land Board shall include in the lease provisions requiring (i) that the draft environmental impact statement required by federal law be filed with the School Land Board before the district makes any use of such lands or flats which requires dredging, filling, or bulkheading; (ii) that approval of such use be obtained from the School Land Board after copies of the summary of the draft environmental impact statement and a description of the proposed use are circulated for comment and a hearing held as provided in Subsections (d) and (e) of this section and the School Land Board shall be authorized to give its approval to make such amendments to the lease as may then be deemed necessary by it as a result of information developed in the draft environmental impact statement; and (iii) that the lease shall cease to be effective at a time specifically stated in the lease unless prior to that time accord concerning environmental issues has been reached between the district and the School Land Board;

(4) proof satisfactory to the board establishing the public convenience and necessity for acquisition of lands sought to be leased.

(d) Upon receipt of an application and accompanying information, the School Land Board shall submit copies thereof to the member agencies of the Interagency Council on Natural Resources and the Environment and all other appropriate state agencies for review and comment. In addition, the board shall submit for review and comment the proposed terms and conditions of the lease. The board

shall allow 30 days for such review and comment, and may extend the review period for an additional 30 days upon written request by the executive director of any state agency.

(e) Following the expiration of the period provided for review and comment, or following the expiration of the 30 day extension of such period, if applicable, the School Land Board shall cause a hearing to be held in the county in which the land proposed to be leased is located. Notice of the hearing shall be given by publication for at least three days, not less than two weeks nor more than four weeks prior to the hearing, in the daily paper having the greatest circulation in the county. Members of the board or their designated representatives shall conduct the hearing, at which any party may offer testimony in support of or in opposition to the application, and the board shall consider the record of the hearing in making a decision on the application.

(f) After submission of all evidence, the School Land Board shall authorize the issuance or denial of the proposed lease and shall determine the reasonable cost to the district, term of years, special limitations, if any, and other conditions necessary to best serve the interest of the general public. In establishing the consideration to be paid to the state for the lease, due weight shall be given to the depth of the water over the submerged land, its proximity to development activities, and its proposed use. Final action shall be taken by the board no more than 60 days following the public hearing.

(g) The funds derived from the lease shall be paid to the General Land Office for transfer to the proper funds of the state.

(h) Districts may sublease lands leased from the state under the provisions of this section to third parties for activities reasonably related to navigation, but such sublease shall be subject to the approval of the School Land Board according to the procedures, requirements, and criteria set forth in Subsections (c) and (d) of Section 61.116 of this code; provided, however, that no approval by the School Land Board shall be required if the sublease is for a purpose contemplated by the district and approved by the board in the district's original lease. It is further provided that no environmental impact statement shall ever be necessary for any sublease which requires no dredging, filling, or bulkheading, and which would not have a substantial impact upon the environment, or which requires only insubstantial dredging, filling, or bulkheading,

as determined by the board; nor shall a district in obtaining approval for a sublease under any circumstances be required to reveal the name of the tenant to whom the sublease is to be made.

(i) If lands or flats leased from the state under the provisions of this section are utilized by the district or its sublessee for any purpose or use not approved by the School Land Board, the district shall be given notice and an opportunity to change and correct the use. If the use is not changed and corrected within a reasonable time after receipt of such notice, the lease may be terminated by the School Land Board and the lands or flats shall revert to the State of Texas.

Sec. 61.117. LIMITATIONS ON SALES AND USE OF STATE LANDS AND FLATS. (a) The State of Texas shall retain its rights in all mines and minerals, including oil, gas, and geothermal resources, in and under the land, together with the right to enter the land for the purpose of development when it leases land under Section 61.116 of this code.

(b) All leases of land under Section 61.116 are subject to oil, gas, or mineral leases in existence at the time of the lease to the district.

(c) Any land which has been franchised or leased or is being used by any navigation district or by the United States for the purpose of navigation, industry, or other purpose incident to the operation of a port shall not be entered or possessed by the State of Texas or by anyone claiming under the State of Texas for the purpose of exploring for oil, gas, or other minerals except by directional drilling. No easement, lease, or permit may be granted on land which has been leased to a navigation district which will interfere with the proposed use of the land by the navigation district, and the prior approval of the navigation district shall be obtained for such purpose.

(d) No surface drilling location may be nearer than 660 feet and special permission from the Commissioner of the General Land

Office is necessary to make any surface location nearer than 2,160 feet, measured at right angles from the nearest bulkhead line designated by a navigation district or the United States as the bulkhead line or from the nearest dredged bottom edge of any channel, slip, or turning basin which has been dredged, or which has been authorized by the United States as a federal project for future construction, whichever is nearer.

(e) In the event land is leased to a navigation district for construction of a navigation project, the School Land Board may in the lease designate the district to be the agent of the State of Texas with authority to grant to the United States of America such easements for dredging and disposal of dredged material as may be required for federal participation in the project. In designating the district to be the agent of the State of Texas for the purpose of granting spoil easements, the board may include a requirement that the district obtain the approval of the board before granting any such easement. Such approval may be given in the form of accepting a master plan for spoil disposal.
